Characteristics; Technical Education

ABSTRACT

This document, consisting of 7 chapters, 35 figures, 395 tables, plus 22 appendix tables, provides statistical data on most aspects of United States education, both public and private, from kindergarten through graduate school. The chapters cover the following topics: (1) all levels of education; (2) elementary and secondary education; (3) postsecondary education; (4) federal programs for education and related activities; (5) outcomes of education; (6) international education; and (7) learning resources and technology. A wide range of information is presented on a variety of subjects including the number of schools and colleges, teachers, enrollments, and graduates, in addition to educational attainment, finances, federal funds for education, employment and income of graduates, libraries, and international education. Supplemental information on population trends, attitudes on education, education characteristics of the labor force, government finances, and economic trends provides background for evaluating education data. Included among data not appearing in previous editions are the following: expenditures for interest on school debt and capital outlay, by state; work-related training; student proficiency in mathematics content areas; student performance on mathematics tests, by state; characteristics of college faculty, by type and control of institution; and faculty salaries, by field of instruction. A short introduction provides a brief overview of current trends in American education, and each chapter highlights significant trends. Guides to tabular presentations and sources are provided, along with a definitions section and an index. (MLF)

"The purpose of the Center shall be to collect, and analyze, and disseminate statistics and other data related to education in the United States and in other nations."—Section 406(b) of the General Education Provisions Act, as amended (20 U.S.C. 1221e-1).

November 1991

Foreword

This 1991 edition of the *Digest of Education Statistics* is the 27th in a series initiated in 1962. (The *Digest* has been issued annually except for combined editions for the years 1977-78, 1983-84, and 1985-86.) Its primary purpose is to provide a compilation of statistical information covering the broad field of American education from kindergarten through graduate school. The *Digest* includes a selection of data from many sources, both government and private, and draws especially on the results of surveys and activities carried out by the National Center for Education Statistics (NCES). The publication contains information on a variety of subjects in the field of education statistics, including the number of schools and colleges, teachers, enrollments, and graduates, in addition to educational attainment, finances, Federal funds for education, employment and income of graduates, libraries, and international education. Supplemental information on population trends, attitudes on education, education characteristics of the labor force, government finances, and economic trends provides background for evaluating education data.

The *Digest* is divided into seven chapters: "All Levels of Education," "Elementary and Secondary Education," "Postsecondary Education," "Federal Programs for Education and Related Activities," "Outcomes of Education," "International Education," and "Learning Resources and Technology." To qualify for inclusion, material must be nationwide in scope and of current interest and value. The introduction includes a brief overview of current trends in American education, which supplements the tabular materials in chapters 1 through 7. Information on the structure of the statistical tables is contained in the "Guide to Tabular Presentation." The "Guide to Sources" pro-

vides a brief synopsis of the surveys used to generate the tabulations for the *Digest*. Also, a "Definitions" section is included to help readers understand terms.

In addition to updating many of the statistics that have appeared in previous years, this edition contains a substantial amount of new material, including:

- Expenditures for interest on school debt and capital outlay, by State;
- Work-related training;
- Student proficiency in mathematics content areas;
- Student performance on mathematics tests, by State;
- Characteristics of college faculty, by type and control of institution; and
- Faculty salaries, by field of instruction.

In the past, the *Digest of Education Statistics* has proved to be of interest and value to education researchers and administrators, government officials, the media, the business community, and the general public. Recently, we have implemented a program to expand the scope of materials included in the *Digest* to make it even more comprehensive. We welcome comments and suggestions to improve future editions. We trust that the users of this 27th edition will find it even more valuable than its predecessors.

Emerson J. Elliott,
Acting Commissioner
National Center for Education Statistics
November 1991

Acknowledgments

Many people have contributed in one way or another to the development of the *Digest*. Foremost among these contributors is W. Vance Grant, who served as an editor of this series from 1962 to 1986. His developmental work made the publication the widely used and respected report it is today. Thomas D. Snyder was responsible for the overall development and preparation of this *Digest*, which was prepared under the general direction of Jeanne E. Griffith.

Charlene M. Hoffman provided technical assistance in all phases of its preparation and was responsible for Chapter 4, "Federal Programs for Education and Related Activities," and for tables on degrees conferred. Irene Baden compiled tabulations on international education and higher education faculty and finances. John Grymes prepared analyses on elementary and secondary school districts and colleges and universities, computer use, and education outcomes. Debra E. Gerald and William J. Hussar prepared projections of school enrollment and finance statistics. Celestine J. Davis provided statistical assistance.

A number of individuals outside the Center also expended large amounts of time and effort on the *Digest*. James J. Corina, Robert Craig, Chris Graziano, and Frank Schneider of Pinkerton Computer Consultants, Inc., provided computer support. Louise Woerner, Barbara Robinson, Donna Grande, Jeannette Bernardo, Linda Burbank, and Theodore

Willis of HCR provided research assistance. In the Public Information Division, Publications Branch, Stephanie Blair, Gerard M. Devlin, and Wilma P. Greene provided editorial assistance, Mamie Brown, typesetting assistance, and Phil Carr designed the cover. Jerry T. Fairbanks and Larry B. Grantham of the U.S. Government Printing Office managed the typesetting, and Evangeline Reese provided typesetting assistance.

This year's edition of the *Digest* has received extensive reviews by individuals within and outside the Department of Education. We wish to thank them for their time and expert advice. In the Office of Educational Research and Improvement (OERI), John Burkett, W. Vance Grant, Mary Frase, and Salvatore Corrallo reviewed the entire manuscript. Elaine El-Khawas (American Council on Education), Lee Greene (National Association of Elementary School Principals) and Rosemary Clark (U.S. Bureau of the Census) also reviewed the entire document. OERI staff who reviewed portions of the manuscript were: Susan Ahmed, Nabeel Alsalam, Patricia Q. Brown, Judy Carpenter, Emmett Fleming, Martin M. Frankel, William Freund, William J. Fowler, Kerry J. Gruber, Edith K. McArthur, Nancy Shantz, and Douglas A. Wright. Agency reviews were conducted by the Office of Under Secretary and the Office of Vocational and Adult Education, U.S. Department of Education.

Figures

1. The structure of education in the United States	7
2. Enrollment and total expenditures in current and constant dollars, by level of education: 1960-61 to 1990-91	8
3. Years of school completed by persons 25 years old and over: 1940 to 1989	9
4. Years of school completed by persons 25 to 29 years of age: 1940 to 1989	9
5. Highest degree earned by persons 18 years old and over: 1987	10
6. Items most frequently cited by the public as a major problem facing the local public schools: 1980 to 1990	10
7. Preprimary enrollment of 3- to 5-year olds, by attendance status: October 1970 to October 1990	43
8. Enrollment, number of teachers, pupil/teacher ratios, and expenditures in public schools: 1960-61 to 1990-91	44
9. Percentage change in public elementary and secondary enrollment, by State: Fall 1985 to fall 1990	45
10. Average annual salary for public elementary and secondary school teachers: 1969-70 to 1990-91	45
11. Sources of revenue for public elementary and secondary schools: 1969-70 to 1988-89	46
12. Current expenditure per student in average daily attendance in public elementary and secondary schools: 1969-70 to 1989-90	46
13. Enrollment, degrees conferred, and expenditures in institutions of higher education: 1960-61 to 1990-91	162
14. Percentage change in total enrollment in institutions of higher education, by State: Fall 1984 to fall 1989	163
15. Enrollment in institutions of higher education, by age: Fall 1970 to fall 1997	163
16. Full-time-equivalent students per staff member in public and private institutions of higher education: 1976 and 1987	164
17. Trends in bachelor's degrees conferred in selected fields of study: 1977-78, 1982-83, and 1988-89	164
18. Sources of current-fund revenue for public institutions of higher education: 1987-88	165
19. Sources of current-fund revenue for private institutions of higher education: 1987-88	165
20. Federal funds for education, by agency: Fiscal year 1991	348
21. Federal on-budget funds for education, by level: 1965 to 1991	349
22. Department of Education outlays, by type of recipient: Fiscal year 1991	349
23. Unemployment rates for persons 16 years old and over, by years of school completed: 1990	373

24. Labor force status of 1988–89 high school dropouts and graduates: October 1989	373
25. Median annual income of full-time workers 25 years old and over, by years of school completed and sex: 1989	374
26. Percentage of 1985–86 bachelor's degree recipients who have pursued additional higher education, by undergraduate major field of study: 1987	374
27. Changes in enrollment, by area of the world and level of education: 1980 to 1988	390
28. Public expenditures for education as a percentage of gross national product: Selected countries, 1988	391
29. Distribution of elementary and secondary enrollment, by major area of the world: 1988	391
30. Distribution of higher education enrollment, by major area of the world: 1988	392
31. Mathematics proficiency at age 13, by country/province: 1988	392
32. Science proficiency at age 13, by country/province: 1988	393
33. Books held by public school libraries, by size of school and level of education: Fall 1985	406
34. Public schools with microcomputers, by level of school: 1982 to 1986	406
35. Student use of computers, by level of instruction: October 1984 and 1989	407

Tables

1. All Levels of Education

Enrollment, Teachers, and Schools

1. Estimated number of participants in elementary and secondary education and in higher education: Fall 1990	11
2. Enrollment in educational institutions, by level and control of institution: Fall 1980 to fall 2000	11
3. Enrollment in educational institutions, by level and by control of institution: 1869–70 to fall 2002	12
4. Teachers in elementary and secondary schools, and senior instructional staff in institutions of higher education, by control of institution: Fall 1970 to fall 2002	13
5. Educational institutions, by level and control of institution: 1976–77 to 1989–90	14

Enrollment Rates

6. Percentage of the population 3 to 34 years old enrolled in school, by age: April 1940 to October 1990	15
7. Percentage of the population 3 to 34 years old enrolled in school, by race/ethnicity, sex, and age: October 1975 to October 1990	16

Educational Attainment

8. Years of school completed by persons age 25 and over and 25 to 29, by race: 1910 to 1989	17
9. Years of school completed by persons age 18 and over, by age, sex, and race/ethnicity: 1989	18

10. Number of persons age 18 and over who hold a bachelor's or higher degree, by field of study, sex, race, and age: Spring 1987	19
11. Highest educational level and degree earned by persons age 18 and over, by sex, race, and age: Spring 1987	20
12. Years of school completed by persons age 25 and over, by State: April 1980	21
13. Years of school completed by persons age 25 and over in the 15 largest States and the 15 largest metropolitan areas: March 1987	22
Population	
14. Estimates of resident population, by age group: July 1, 1960 to July 1, 1989	22
15. Estimates of school-age resident population, by race and sex: July 1, 1960 to July 1, 1989	23
16. Estimated total and school-age populations, by State: 1970 to 1989	24
Characteristics of Families with Children	
17. Families, by family status and presence of own children under 18: 1970 to 1990	25
18. Characteristics of families with own children under 18, by family status and race/ethnicity: 1990	26
19. Poverty status of persons, families, and children under 18, by race/ethnicity: 1959 to 1989	27
Opinions on Education	
20. Average grade that the public would give the schools in their community and in the Nation at large: 1974 to 1990	28
21. Items most frequently cited by the general public as a major problem facing the local public schools: 1970 to 1990	28
22. Parental involvement in 8th graders' school-related activities, by selected parental characteristics: 1988	29
23. Beliefs held by teachers about what activities and programs would help to improve education: 1989	29
24. Rating of school problems by teachers and students: 1988	30
25. Public's level of confidence in various institutions: 1989	30
Charitable Contributions	
26. Percentage of households contributing to education and other charitable organizations and average annual donation, by type of charity: 1987 and 1989	31
27. Contributions of all households to religious and other charities, by age and income: 1989	31
Volunteers	
28. Volunteer workers for schools and other organizations, by selected characteristics: Year ending May 1989	32
Finances	
29. Total expenditures of educational institutions related to the gross national product, by level of institution: 1959-60 to 1990-91	33

30. Total expenditures of educational institutions, by level and control of institution: 1899-1900 to 1990-91	34
31. Estimated total expenditures of educational institutions, by level, control of institution, and source of funds: 1975-76 to 1987-88	35
32. Governmental expenditures, by level of government and function: 1970-71 to 1988-89	36
33. Direct general expenditures of State and local governments for all functions and for education, by level and State: 1988-89	37
34. Direct general expenditures per capita of State and local governments for all functions and for education, by level and State: 1988-89	38
35. Gross national product, State and local expenditures, personal income, disposable personal income, median family income, and population: 1929 to 1990	39
36. Gross national product price deflator, Consumer Price Index, education price indexes, and Federal budget composite deflator: 1919 to 1990	40

2. Elementary and Secondary Education

Enrollment

37. Historical summary of public elementary and secondary school statistics: 1869-70 to 1988-89	47
38. Enrollment in public elementary and secondary schools, by grade: Fall 1975 to fall 1989	49
39. Enrollment in public elementary and secondary schools, by level and State: Fall 1980 to fall 1990	50
40. Enrollment in public elementary and secondary schools, by grade and State: Fall 1989	52
41. Enrollment in public elementary and secondary schools, by grade and State: Fall 1988	54
42. Membership and attendance in public elementary and secondary schools, by State: 1980-81, 1987-88, and 1988-89	56
43. Average daily attendance in public elementary and secondary schools, by State: 1969-70 to 1988-89	57
44. Enrollment in public elementary and secondary schools, by race or ethnicity and State: Fall 1986 and Fall 1989	58
45. Enrollment of 3-, 4-, and 5-year-old children in preprimary programs, by level and control of program and by attendance status: October 1965 to October 1990	59
46. Public school pupils transported at public expense and current expenditures for transportation: 1929-30 to 1988-89	60
47. Children 0 to 21 years old served in federally-supported special education programs, by type of handicap: 1976-77 to 1988-89	61
48. Percentage distribution of handicapped persons 6 to 21 years old receiving special education services, by educational environment: 1987-88	62
49. Number of children 3-5 years old served under The Education of the Handicapped Act, by State: 1986-87, 1987-88, and 1988-89	62

50. State legislation on gifted and talented programs and number and percent of students receiving services in public elementary and secondary schools, by State: 1986-87	63
51. Enrollment in grades 9 to 12 in public and private schools compared with population 14 to 17 years of age: 1889-90 to fall 1989	64
52. Enrollment in foreign language courses compared with enrollment in grades 9 to 12 of public secondary schools: Fall 1948 to fall 1985	65
53. Student participation in school programs and services, by control, level, and community type of school: 1987-88	66

Private Elementary and Secondary Schools

54. Private elementary and secondary enrollment and schools, by selected characteristics: 1987-88	66
55. Private elementary and secondary staff and student-staff ratios, by level and orientation of school: 1987-88	67
56. Private elementary and secondary enrollment and schools, by amount of tuition, level, and orientation of school: 1987-88	68
57. Summary statistics on Catholic elementary and secondary schools, by level: 1919-20 to 1989-90	68
58. Enrollment, teachers, and high school graduates in private elementary and secondary schools, by State: Fall 1980 and 1979-80	69

Teachers and Other Instructional Staff

59. Public and private elementary and secondary teachers and pupil-teacher ratios, by level: Fall 1955 to fall 1991	70
60. Public elementary and secondary teachers, by level and State: Fall 1985 to fall 1990	71
61. Teachers, enrollment, and pupil-teacher ratios in public elementary and secondary schools, by State: Fall 1985 to fall 1989	72
62. Teachers in public and private elementary and secondary schools, by selected characteristics: 1987-88	73
63. Highest degree earned and number of years teaching experience for teachers in public elementary and secondary schools, by State: 1987-88	74
64. Selected characteristics of public school teachers: Spring 1961 to spring 1986	75
65. Public secondary school teachers, by subject taught: Spring 1966 to spring 1986	76
66. Teacher candidates' reasons for majoring in education and their perceptions of readiness to teach: Spring 1986 to 1988	76
67. Selected characteristics of public school teachers' current teaching assignments, by State: 1987	77
68. Percentage of teachers involved in making selected decisions, by State: 1987	78
69. Percentage of teachers reporting various problems in their school, by State: 1987	79
70. Average salaries for full-time teachers in public and private elementary and secondary schools, by selected characteristics: 1987-88	80

71. Job satisfaction of public school teachers: 1984 to 1989	81
72. Estimated average annual salary of teachers in public elementary and secondary schools: 1959-60 to 1990-91	81
73. Estimated average annual salary of teachers in public elementary and secondary schools, by State: 1969-70 to 1989-90	82
74. Minimum and average teacher salaries, by State: 1988-89 and 1989-90	83
75. Average annual salary of instructional staff in public elementary and secondary schools, by State: 1939-40 to 1989-90	84
76. Average annual salary of instructional staff in public elementary and secondary schools and average annual earnings of full-time employees in all industries: 1929-30 to 1990-91	85
77. Staff employed in public elementary and secondary school systems, by functional area: 1949-50 to fall 1989	86
78. Staff employed in public school systems, by type of assignment and State: Fall 1989	87
79. Staff employed in public school systems, by type of assignment and State: Fall 1988	88
80. Staff and teachers in public elementary and secondary schools, by State: Fall 1985 to fall 1989	89
81. Staff, enrollment, and pupil-staff ratios in public elementary and secondary schools, by State: Fall 1985 to fall 1989	90
82. Principals in public and private elementary and secondary schools, by selected characteristics: 1987-88	91
83. Secondary school principals' beliefs about educational issues and purposes: 1965, 1977, and 1987	92
84. Administrative roadblocks reported by secondary school principals: 1965, 1977, and 1987	92

Schools and School Districts

85. Public school districts and public and private elementary and secondary schools: 1929-30 to 1989-90	93
86. Public school districts and enrollment, by size of district: 1986-87, to 1989-90	93
87. Number and percentage of public elementary and secondary education agencies, by State and type of agency: 1989-90	94
88. Selected statistics for public school districts enrolling more than 20,000 pupils, by State: 1989-90	95
89. Enrollment of the 130 largest public school districts: Fall 1989	100
90. Public elementary and secondary schools, by type of school: 1967-68 to 1989-90 ...	101
91. Public elementary and secondary schools, by type and size of school: 1989-90	101
92. Public elementary and secondary schools, by type and State: 1987-88 to 1989-90 ..	102

93. Public elementary schools by grade span, and average school size, by State: 1989-90	103
94. Public secondary schools by grade span, and average school size, by State: 1989-90	104
High School Seniors, Completions, and Dropouts	
95. High school graduates compared with population 17 years of age: 1969-70 to 1990-91	105
96. Public high school graduates, by State: 1969-70 to 1990-91	106
97. General Educational Development (GED) credentials issued and age of test takers: 1974 to 1989	107
98. Percentage of high school dropouts among persons 16 to 24 years old, by sex and race/ethnicity: October 1967 to October 1990	107
99. Percentage of high school dropouts among persons 14 to 34 years old, by age, race/ethnicity, and sex: October 1970 to October 1990	108
100. Students with handicaps exiting the educational system, by age, handicapping condition, and basis of exit: United States and outlying areas, 1987-88	109
101. Employment status, wages earned, and living arrangements of special education students out of high school more than 1 year: 1987	109
Educational Achievement	
102. Student proficiency in reading, by age and selected characteristics of students: 1970-71 to 1987-88	110
103. Student proficiency in reading, by percentile and age: 1970-71 to 1987-88	110
104. Student proficiency in reading, by age, amount of time spent on homework and reading habits: 1979-80, 1983-84, and 1987-88	111
105. Student reading in school, by type of reading material: 1983-84 and 1987-88	111
106. Percentage of students at or above selected reading proficiency levels, by race/ethnicity, and age: 1970-71 to 1987-88	112
107. Writing performance of 4th, 8th, and 11th graders, by sex, race/ethnicity, and region: 1984 and 1988	113
108. Student values and attitudes toward writing, by grade level: 1984 and 1988	113
109. Percentage of students writing at a minimal level or better, by sex and race/ethnicity, by age: 1974, 1979, and 1984	114
110. Student writing in school, by type of writing assignment: 1983-84 and 1987-88	115
111. Student proficiency in geography, U.S. history, and literature, by student characteristics: 1986 and 1988	115
112. Percentage of students at or above selected history proficiency levels, by age, sex, race/ethnicity, and region: 1988	116
113. Average percentage of students responding correctly to history questions, by time period and grade: 1988	116

114.	Mathematics proficiency, by age and by selected characteristics of students: 1977-78, 1981-82, and 1985-86	117
115.	Percentage of students at or above five mathematics proficiency levels, by race/ethnicity and age: 1977-78, 1981-82, and 1985-86	117
116.	Average proficiency in mathematics content areas for 8th graders in public schools, by region and State: 1990	118
117.	Selected characteristics of mathematics instruction for 8th graders in public schools, by region and State: 1990	119
118.	Average proficiency in mathematics content areas by grade, sex, and race/ethnicity: 1990	120
119.	Percentage of students at or above five science proficiency levels, by race/ethnicity and age: 1976-77, 1981-82, and 1985-86	121
120.	Science proficiency, by age and by selected characteristics of students: 1976-77, 1981-82, and 1985-86	121
121.	Student proficiency in civics, by sex, race/ethnicity, and age: 1976, 1982, and 1988 ..	122
122.	Eighth graders' achievement on history, mathematics, reading, and science tests: 1988	122
123.	Scholastic Aptitude Test score averages for college-bound high school seniors, by sex: 1966-67 to 1989-90	123
124.	Scholastic Aptitude Test score averages, by race/ethnicity: 1975-76 to 1989-90	123
125.	Distribution of Scholastic Aptitude Test scores, by sex of student: 1975-76 to 1989-90	124
126.	Scholastic Aptitude Test score averages, by intended area of study: 1977-78 to 1989-90	125
127.	Scholastic Aptitude Test score averages, by State: 1974-75, 1979-80, 1980-81, and 1985-86 to 1989-90	126
128.	Profile of Scholastic Aptitude Test takers: 1989-90	127
129.	American College Testing (ACT) score averages, by sex: 1969-70 to 1988-89	127
130.	Average number of Carnegie units earned by high school graduates in various subject fields, by student characteristics: 1982 and 1987	128
131.	Average number of Carnegie units earned by high school graduates in vocational education courses, by student characteristics: 1982 and 1987	129
132.	Percentage of high school graduates earning minimum credits in selected combinations of academic courses: 1982 and 1987	130
133.	High school courses taken by persons age 18 and over, by sex, race, and age: Spring 1984	130
<i>Student Activities and Behavior</i>		
134.	Eighth graders' attitudes about selected classes, by selected student and school characteristics: 1988	131
135.	Expected occupations of 8th graders at age 30, by selected student and school characteristics: 1988	131

136.	Eighth graders' attitudes about school climate, by student and school characteristics: 1988	132
137.	Sex education in public and private schools: 1986	132
138.	Participation of high school seniors in extracurricular activities, by selected student characteristics: 1972 and 1982	133
139.	Incidence of student infractions, disciplinary actions, and perceived changes in amount of classroom disruption in public secondary schools, by school characteristics: 1983-84	134
140.	Teacher perceptions of changes in disruptive student behavior, by school characteristics: 1986-87	135
141.	Percentage of teachers rating selected factors as limiting their ability to maintain order, by school level and metropolitan status: 1986-87	135
142.	Trends in drug use among high school seniors, by type of drug and frequency of use: 1975 to 1989	136

State Regulations

143.	Ages for compulsory school attendance and compulsory provision of services for special education students, by State: 1989-90	137
144.	Eighth graders' attendance patterns, by student and school characteristics: 1988	138
145.	Average number of days per school year, classes per day, hours of class per day, and minutes per class in public high schools, by selected school characteristics: 1984-85	138
146.	State requirements for high school graduation, in Carnegie units: 1980 and 1990	139
147.	States using minimum-competency testing, by government level setting standards, grade levels assessed, and expected uses of standards: November 1985	144
148.	States requiring testing for initial certification of teachers, by authorization, year enacted, year effective, and test used: 1987 and 1989	145
149.	Percentage of public high schools having or strengthening various policies, programs, or practices: 1987-88	146
150.	States requiring education, minimum curriculum standards, and teacher certification on substance abuse education, by State: 1986-87	146

Revenues and Expenditures

151.	Revenues for public elementary and secondary schools, by source of funds: 1919-20 to 1988-89	147
152.	Revenues for public elementary and secondary schools, by source and State: 1988-89	148
153.	Revenues for public elementary and secondary schools, by source and State: 1987-88	149
154.	Current expenditures for public elementary and secondary education, by State: 1959-60 to 1990-91	150
155.	Summary of expenditures for public elementary and secondary education, by purpose: 1919-20 to 1979-80	152

156.	Current expenditures for public elementary and secondary education, by function and State: 1988-89	153
157.	Current expenditures for public elementary and secondary education, by function and State: 1987-88	154
158.	Total and current expenditure per pupil in public elementary and secondary schools: 1919-20 to 1990-91	155
159.	Current expenditure per pupil in average daily attendance in public elementary and secondary schools, by State: 1959-60 to 1988-89	156

3-A. Postsecondary Education: College and University Education

Enrollment

160.	Historical summary of faculty, students, degrees, and finances in institutions of higher education: 1869-70 to 1988-89	166
161.	Total enrollment in institutions of higher education, by attendance status, sex of student, and control of institution: Fall 1947 to fall 1989	167
162.	Total enrollment in institutions of higher education, by control and type of institution: Fall 1963 to fall 1989	168
163.	Total enrollment in institutions of higher education, by attendance status, sex, and age: Fall 1970 to fall 1997	169
164.	Total enrollment in institutions of higher education, by level, sex, age, and attendance status of student: Fall 1987	170
165.	Total enrollment in institutions of higher education, by type and control of institution, and age and attendance status of student: Fall 1987	171
166.	Total enrollment in institutions of higher education, by level of enrollment, sex, attendance status, and type and control of institution: Fall 1988 and fall 1989	172
167.	Total enrollment in institutions of higher education, by type and control of institution, attendance status, and sex of student: Fall 1970 to fall 1989	173
168.	Enrollment and number of institutions of higher education, by affiliation of institution: Fall 1980 to fall 1985	174
169.	Total first-time freshmen enrollment in institutions of higher education, by sex of student, attendance status, and type and control of institution: Fall 1955 to fall 1989	176
170.	Total first-time freshmen enrollment in institutions of higher education, by attendance status, sex, control of institution, and State: Fall 1987 to fall 1989	177
171.	College enrollment rates of high school graduates, by race/ethnicity: 1960 to 1989 ...	178
172.	College enrollment rates of high school graduates, by sex: 1960 to 1989	179
173.	Graduation, college preparation, and college application rates of 12th graders, by selected school characteristics: 1987-88	180
174.	Enrollment rates of 18- to 24-year-olds in institutions of higher education, by race/ethnicity: 1967 to 1989	181
175.	Total undergraduate enrollment in institutions of higher education, by sex of student, attendance status, and control of institution: Fall 1969 to fall 1989	181

176.	Total graduate enrollment in institutions of higher education, by sex of student, attendance status, and control of institution: Fall 1969 to fall 1989	182
177.	Total first-professional enrollment in institutions of higher education, by sex of student, attendance status, and control of institution: Fall 1969 to fall 1989	182
178.	Total enrollment in institutions of higher education, by State: Fall 1970 to fall 1989 ...	183
179.	Total enrollment in public institutions of higher education, by State: Fall 1970 to fall 1989	184
180.	Total enrollment in private institutions of higher education, by State: Fall 1970 to fall 1989	185
181.	Total enrollment in all institutions of higher education, by attendance status, sex, and State: Fall 1988 and fall 1989	186
182.	Total enrollment in public institutions of higher education, by attendance status, sex, and State: Fall 1988 and fall 1989	187
183.	Total enrollment in private institutions of higher education, by attendance status, sex, and State: Fall 1988 and fall 1989	188
184.	Total enrollment in institutions of higher education, by control and type of institution and State: Fall 1988 and fall 1989	189
185.	Total enrollment in institutions of higher education, by level of enrollment and State: Fall 1987 to fall 1989	190
186.	Total enrollment in institutions of higher education, by control, level of enrollment, and State: Fall 1989	191
187.	Total enrollment in institutions of higher education, by control, level of enrollment, and State: Fall 1988	192
188.	Full-time-equivalent enrollment in institutions of higher education, by control and type of institution: Fall 1970 to fall 1989	193
189.	Full-time-equivalent enrollment in institutions of higher education, by control, type of institution, and State: Fall 1987 to fall 1989	194
190.	Full-time-equivalent enrollment in institutions of higher education, by control and State: Fall 1980 to fall 1989	195
191.	Residence and migration of all new undergraduate students in institutions of higher education, by State: Fall 1988	196
192.	Residence and migration of all freshmen students graduating from high school in the past 12 months, by State: Fall 1988	197
193.	Residence and migration of all freshmen students in 4-year colleges graduating from high school in the past 12 months, by State: Fall 1988	198
194.	Total enrollment in institutions of higher education, by type and control of institution and race/ethnicity of student: Fall 1976 to fall 1988	199
195.	Total enrollment in institutions of higher education, by level of study and race/ethnicity of student: Fall 1976 to fall 1988	200
196.	Total enrollment in institutions of higher education, by race/ethnicity of student and by State: Fall 1988	201

197.	Disabled students enrolled in postsecondary institutions, by type of disability: Fall 1986	202
198.	Percentage of students enrolled in postsecondary institutions, by disability status and selected student characteristics: Fall 1986	202
199.	Enrollment of persons 14 to 34 years of age in institutions of higher education, by race/ethnicity, sex, and year of college: October 1965 to October 1990	203
200.	Total enrollment in selected major fields of study in 4-year institutions of higher education, by sex: Fall 1976 to fall 1988	204
201.	Total enrollment in selected major fields of study in 4-year institutions of higher education, by level, sex, and attendance status: Fall 1988	205
202.	Graduate enrollment in science and engineering programs in institutions of higher education, by field of study: United States and outlying areas, 1981 to 1989	206
203.	Institutions of higher education and branches, by type, control, and size of enrollment: Fall 1989	207
204.	Selected statistics for college and university campuses enrolling more than 14,600 students in 1989	208
205.	Enrollment of the 120 largest college and university campuses: Fall 1989	214
206.	Selected statistics on historically black colleges and universities: 1980, 1988, and 1989	215
207.	Enrollment in historically black colleges and universities, by type and control of institution: Fall 1976 to fall 1989	216

Staff

208.	Employees in institutions of higher education, by primary occupation, employment status, and control of institution: Fall 1976 and fall 1987	216
209.	Employees in institutions of higher education, by primary occupation, employment status, sex, and by type or control of institution: Fall 1987	217
210.	Employees in institutions of higher education, by primary occupation, employment status, sex, and by type and control of institution: Fall 1987	218

Faculty

211.	Full-time and part-time senior instructional faculty in institutions of higher education, by employment status and control and type of institution: Fall 1970 to fall 1990	219
212.	Full-time instructional faculty in institutions of higher education, by race/ethnicity, academic rank, and sex: Fall 1985	219
213.	Full-time regular instructional faculty in institutions of higher education, by selected characteristics and type and control of institution: Fall 1987	220
214.	Full-time regular instructional faculty in institutions of higher education, by faculty characteristics and by field: 1987-88	221
215.	Total regular and temporary instructional faculty in institutions of higher education, by selected characteristics and type and control of institution: Fall 1987	222
216.	Part-time regular instructional faculty in institutions of higher education, by selected characteristics and type and control of institution: Fall 1987	222

217.	Salaries of full-time regular instructional faculty in institutions of higher education, by type and control of institution and by field of instruction: 1987-88	223
218.	Average salary of full-time instructional faculty in institutions of higher education, by academic rank and sex: 1972-73 to 1989-90	224
219.	Average salary of full-time instructional faculty on 9-month contracts in institutions of higher education, by academic rank and sex and by type and control of institution: 1980-81, 1985-86, 1987-88, and 1989-90	225
220.	Average salary of full-time instructional faculty on 9-month contracts in institutions of higher education, by type and control of institution and by State: 1989-90	226
221.	Average salary of full-time instructional faculty on 9-month contracts in institutions of higher education, by type and control of institution and by State: 1987-88	227
222.	Average salary of full-time instructional faculty on 9-month contracts in 4-year institutions of higher education, by type and control of institution and rank of faculty and by State: 1989-90	228
223.	Full-time instructional faculty with tenure for institutions reporting tenure status, by academic rank, sex, and type and control of institution: 1980-81, 1985-86, 1987-88, and 1989-90	229
<i>Institutions</i>		
224.	Institutions of higher education, by control and type of institution: 1949-50 to 1989-90	230
225.	Institutions of higher education and branches, by control of institution, highest level of offering, and sex of student body: 1985-86	231
226.	Institutions of higher education and branches, by type, control of institution, and State: 1989-90	232
227.	Institutions of higher education that have closed their doors, by control and type of institution: 1960-61 to 1989-90	233
<i>Degrees</i>		
228.	Earned degrees conferred by institutions of higher education, by level of degree and sex of student: 1869-70 to 1999-2000	234
229.	Earned degrees conferred by institutions of higher education, by level of degree and by State: 1987-88 and 1988-89	235
230.	1- to 4-year awards and associate degrees, by field of study: 1984-85 to 1988-89 ...	236
231.	Associate degrees and other subbaccalaureate awards, by length of curriculum, sex of student, and field of study: 1988-89	237
232.	Associate degrees and other subbaccalaureate awards, by length of curriculum, sex of student, and field of study: 1987-88	238
233.	Bachelor's, master's, and doctor's degrees conferred by institutions of higher education, by sex of student and field of study: 1988-89	239
234.	Bachelor's, master's, and doctor's degrees conferred by institutions of higher education, by sex of student and field of study: 1987-88	247
235.	Bachelor's degrees conferred by institutions of higher education, by discipline division: 1970-71 to 1988-89	255

236.	Master's degrees conferred by institutions of higher education, by discipline division: 1970-71 to 1988-89	256
237.	Doctor's degrees conferred by institutions of higher education, by discipline division: 1970-71 to 1988-89	257
238.	Degrees conferred by institutions of higher education, by control of institution: 1973-74 to 1988-89	258
239.	Earned degrees conferred by institutions of higher education, by control of institution, level of degree, and discipline division: 1988-89	258
240.	Earned degrees conferred by institutions of higher education, by control of institution, level of degree, and discipline division: 1987-88	259
241.	Number of institutions of higher education conferring degrees, by level of degree and discipline division: 1988-89	260
242.	First-professional degrees conferred in dentistry, medicine, and law, by sex: 1949-50 to 1988-89	260
243.	First-professional degrees conferred by institutions of higher education, by sex of student, control of institution, and field of study: 1981-82 to 1988-89	261
244.	Associate degrees conferred by institutions of higher education, by racial/ethnic group, major field of study, and sex of student: 1988-89	262
245.	Bachelor's degrees conferred by institutions of higher education, by racial/ethnic group and sex of student: 1976-77 to 1988-89	264
246.	Bachelor's degrees conferred by institutions of higher education, by racial/ethnic group, major field of study, and sex of student: 1988-89	265
247.	Master's degrees conferred by institutions of higher education, by racial/ethnic group and sex of student: 1976-77 to 1988-89	267
248.	Master's degrees conferred by institutions of higher education, by racial/ethnic group, major field of study, and sex of student: 1988-89	268
249.	Doctor's degrees conferred by institutions of higher education, by racial/ethnic group and sex of student: 1976-77 to 1988-89	270
250.	Doctor's degrees conferred by institutions of higher education, by racial/ethnic group, major field of study, and sex of student: 1988-89	271
251.	First-professional degrees conferred by institutions of higher education, by racial/ethnic group, major field of study, and sex of student: 1988-89	273
252.	Earned degrees in agriculture and natural resources conferred by institutions of higher education, by level of degree and sex of student: 1970-71 to 1988-89	274
253.	Earned degrees in architecture and environmental design conferred by institutions of higher education, by level of degree and sex of student: 1949-50 to 1988-89 ...	274
254.	Earned degrees in business and management conferred by institutions of higher education, by level of degree and sex of student: 1955-56 to 1988-89	275
255.	Earned degrees in communications conferred by institutions of higher education, by level of degree and sex of student: 1970-71 to 1988-89	275
256.	Earned degrees in computer and information sciences conferred by institutions of higher education, by level of degree and sex of student: 1970-71 to 1988-89	276

257.	Earned degrees in education conferred by institutions of higher education, by level of degree and sex of student: 1949-50 to 1988-89	276
258.	Earned degrees in engineering conferred by institutions of higher education, by level of degree and sex of student: 1949-50 to 1988-89	277
259.	Earned degrees in chemical, civil, and electrical engineering conferred by institutions of higher education, by level of degree: 1970-71 to 1988-89	277
260.	Earned degrees in English and literature conferred by institutions of higher education, by level of degree and sex of student: 1949-50 to 1988-89	278
261.	Earned degrees in modern foreign languages conferred by institutions of higher education, by level of degree and sex of student: 1949-50 to 1988-89	278
262.	Earned degrees in French, German, and Spanish conferred by institutions of higher education, by level of degree: 1949-50 to 1988-89	279
263.	Earned degrees in the health professions conferred by institutions of higher education, by level of degree and sex of student: 1970-71 to 1988-89	279
264.	Earned degrees in the life sciences conferred by institutions of higher education, by level of degree and sex of student: 1951-52 to 1988-89	280
265.	Earned degrees in biology, zoology, and microbiology conferred by institutions of higher education, by level of degree: 1970-71 to 1988-89	280
266.	Earned degrees in mathematics conferred by institutions of higher education, by level of degree and sex of student: 1949-50 to 1988-89	281
267.	Earned degrees in the physical sciences conferred by institutions of higher education, by level of degree and sex of student: 1959-60 to 1988-89	281
268.	Earned degrees in chemistry, physics, and geology conferred by institutions of higher education, by level of degree: 1970-71 to 1988-89	282
269.	Earned degrees in psychology conferred by institutions of higher education, by level of degree and by sex of student: 1949-50 to 1988-89	282
270.	Earned degrees in public affairs and services conferred by institutions of higher education, by level of degree and sex of student: 1970-71 to 1988-89	283
271.	Earned degrees in the social sciences conferred by institutions of higher education, by level of degree and sex of student: 1970-71 to 1988-89	283
272.	Earned degrees in economics, history, political science and government, and sociology conferred by institutions of higher education, by level of degree: 1949-50 to 1988-89	284
273.	Earned degrees in visual and performing arts conferred by institutions of higher education, by level of degree and sex of student: 1970-71 to 1988-89	284
274.	Statistical profile of persons receiving doctor's degrees, by field of study: 1988-89 ...	285
275.	Statistical profile of persons receiving doctor's degrees in education: 1978-79 to 1988-89	286
276.	Statistical profile of persons receiving doctor's degrees in engineering: 1978-79 to 1988-89	286
277.	Statistical profile of persons receiving doctor's degrees in the humanities: 1978-79 to 1988-89	287

278.	Statistical profile of persons receiving doctor's degrees in the life sciences: 1978-79 to 1988-89	287
279.	Statistical profile of persons receiving doctor's degrees in the physical sciences: 1978-79 to 1988-89	288
280.	Statistical profile of persons receiving doctor's degrees in the social sciences: 1978-79 to 1988-89	288
281.	Doctor's degrees conferred by 60 large institutions of higher education: 1979-80 to 1988-89	289

Outcomes

282.	Percentage of the high school class of 1980 enrolled in postsecondary education, by attendance status, sex, race/ethnicity, socioeconomic status, and ability level: Fall 1980 to fall 1985	290
283.	Percentage of the high school class of 1980 enrolled in 4-year colleges, by attendance status, sex, race/ethnicity, socioeconomic status, and ability level: Fall 1980 to fall 1985	290
284.	Mean number of semester credits completed by bachelor's degree recipients, by major and course area: 1972 to 1976 and 1980 to 1984	291
285.	Colleges and universities offering remedial instruction or tutoring, by type and control of institution: 1980-81 to 1990-91	291
286.	Highest level of education attained by 1980 high school seniors, by selected student and school characteristics: Spring 1986	292
287.	Highest level of education attained by 1980 high school seniors, by race/ethnicity and October 1980 postsecondary education attendance status: Spring 1986	293
288.	Highest level of education attained by 1980 high school seniors, by socioeconomic status and race/ethnicity: Spring 1986	293
289.	Cumulative percentage of 1972, 1980, and 1982 high school graduates completing college, by level of degree and selected student characteristics: 1976 to 1986	294
290.	Changes in scores on Graduate Record Examination (GRE) and professional school admission tests: 1964 to 1988	295

Student Charges and Student Financial Assistance

291.	Average undergraduate tuition and fees and room and board rates paid by students in institutions of higher education, by type and control of institution: 1964-65 to 1989-90	296
292.	Average undergraduate tuition and fees and room and board rates paid by students in institutions of higher education, by control of institution and by State: 1989-90 ..	298
293.	Percentage of undergraduates enrolled in fall 1986 and average amount awarded in 1986-87 per student, by type and source of aid and selected student characteristics	299
294.	Undergraduates enrolled in fall 1986, by aid status and source of aid during 1986-87, and control and level of institution	300
295.	Undergraduates enrolled in fall 1986, by type and source of aid received during 1986-87, and by control and level of institution	301

296.	Postbaccalaureate students enrolled in fall 1986, by aid status and source of aid during 1986-87, and by control and level of institution	301
297.	Undergraduates enrolled in fall 1986, by Federal aid program and by control and level of institution: 1986-87	302
298.	Postbaccalaureate students enrolled in fall 1986, by type of aid received during 1986-87, by level of study and by control and level of institution	302
299.	Scholarship and fellowship awards of institutions of higher education, by control of institution: 1959-60 to 1987-88	303
300.	Pell Grant revenue of institutions of higher education compared to current-fund revenue and tuition, by type and control of institution: 1983-84 to 1987-88	304
301.	State awards for need-based undergraduate scholarship and grant programs, by State: 1983-84 to 1990-91	305

Income

302.	Current-fund revenue of institutions of higher education, by source: 1979-80 to 1987-88	306
303.	Current-fund revenue of public institutions of higher education, by source: 1979-80 to 1987-88	307
304.	Current-fund revenue of private institutions of higher education, by source: 1979-80 to 1987-88	308
305.	Revenue of institutions of higher education, by source of funds: 1919-20 to 1987-88	309
306.	Current-fund revenue for public institutions of higher education, by State: 1974-75 to 1987-88	310
307.	Current-fund revenue for public institutions of higher education, by source of funds and State: 1987-88	311
308.	Current-fund revenue from State and local governments of institutions of higher education, by State: 1982-83 to 1987-88	312
309.	Current-fund revenue received from the Federal Government by the 100 institutions of higher education receiving the largest amounts: 1986-87	313

Expenditures

310.	Current-fund expenditures and expenditures per full-time-equivalent student in institutions of higher education, by type and control of institution: 1970-71 to 1987-88	314
311.	Current-fund expenditures of institutions of higher education, by purpose: 1979-80 to 1987-88	315
312.	Current-fund expenditures of public institutions of higher education, by purpose: 1979-80 to 1987-88	316
313.	Current-fund expenditures of private institutions of higher education, by purpose: 1979-80 to 1987-88	317
314.	Voluntary support for institutions of higher education, by source and purpose of support: 1949-50 to 1987-88	318

315.	Expenditures of institutions of higher education: 1929-30 to 1973-74	318
316.	Educational and general expenditures of public universities, by purpose: 1976-77 to 1987-88	319
317.	Educational and general expenditures of public 4-year colleges, by purpose: 1976-77 to 1987-88	320
318.	Educational and general expenditures of public 2-year colleges, by purpose: 1976-77 to 1987-88	321
319.	Educational and general expenditures of private (nonprofit) universities, by purpose: 1976-77 to 1987-88	322
320.	Educational and general expenditures of private (nonprofit) 4-year colleges, by purpose: 1976-77 to 1987-88	323
321.	Educational and general expenditures of private (nonprofit) 2-year colleges, by purpose: 1976-77 to 1987-88	324
322.	Current-fund expenditures of public institutions of higher education, by State: 1974-75 to 1987-88	325
323.	Current-fund expenditures per full-time-equivalent student in institutions of higher education, by control and type of institution and purpose of expenditure: 1987-88	326

Property

324.	Additions to physical plant value of institutions of higher education, by type of addition and control of institution: 1969-70 to 1985-86	326
325.	Capital expenditures for science and engineering programs in institutions of higher education, by field of study and source of funds: United States and outlying areas, 1976-77 to 1988-89	327
326.	Value of property and liabilities of institutions of higher education: 1899-1900 to 1985-86	328
327.	Physical plant value and endowment funds per student in institutions of higher education, by type and control of institution: 1975-76 to 1985-86	329
328.	Endowment funds of the 100 institutions of higher education with the largest amounts: Fiscal year 1987	330

3-B. Postsecondary Education: Vocational and Adult Education

Adult Education

329.	Characteristics of persons who ever received work-related training by Spring 1987 ...	331
330.	Selected characteristics of participants in adult education: 1984	332
331.	Courses taken by participants in adult education, by sex, age, and field of study: Year ending May 1984	333
332.	Courses taken by participants in adult education, by sex, age, and reason for taking course: Year ending May 1984	334
333.	Participants in adult basic and secondary education programs, by sex, level of enrollment, and State: Fiscal years 1980, 1984, and 1988	335

Vocational Education

334. Enrollment, mean charges, and mean number of hours required to complete selected programs in noncollegiate noncorrespondence postsecondary schools offering occupational programs, by control of school: United States and outlying areas, 1980-81 336
335. Number of noncollegiate institutions offering postsecondary education, by control and State: 1988-89 and 1989-90 337

4. Federal Programs for Education and Related Activities

336. Federal education support and estimated Federal tax expenditures, by category: Fiscal years 1965 to 1991 350
337. Federal on-budget funds for education, by agency: Fiscal years 1965 to 1991 351
338. Federal on-budget funds for education, by level of education or activity, agency, and program: Fiscal years 1965 to 1991 352
339. Federal on-budget funds obligated for programs administered by the Department of Education: Fiscal years 1980 to 1991 358
340. Department of Education outlays, by level of education and type of recipient: Fiscal years 1980 to 1991 359
341. Department of Education obligations for major programs, by State or other area: Fiscal year 1990 360
342. Department of Education obligations for major programs, by State or other area: Fiscal year 1989 361
343. Department of Education obligations for major programs, by State or other area: Fiscal year 1988 362
344. Appropriations for Chapter 1 and Chapter 2, Education Consolidation and Improvement Act of 1981, by State or other area: 1989-90 and 1990-91 363
345. Federal obligations to colleges and universities, by agency and State: Fiscal year 1988 364
346. Summary of Federal funds for research, development, and R & D plant: Fiscal years 1983 to 1991 365
347. Federal obligations to colleges and universities for research and development, by field: United States and outlying areas: 1976-77 to 1987-88 367
348. Department of Agriculture obligations for child nutrition programs, by State or other area: Fiscal years 1989 and 1990 368
349. Department of Health and Human Services allocations for Head Start and enrollment in Head Start, by State or other area: Fiscal years 1988, 1989, and 1990 369
350. Public and private school students receiving publicly funded free or reduced price lunch, by selected school characteristics: School year 1987-88 370
351. Public and private school students receiving publicly funded ECIA Chapter I services, by selected school characteristics: School year 1987-88 370

5. Outcomes of Education***Educational Characteristics of the Workforce***

352.	Percentage of 1972 and 1982 high school seniors who felt that certain life values were "very important," by sex: 1972 to 1986	375
353.	Labor force participation of persons 16 years old and over, by age, sex, race/ethnicity, and years of school completed: 1990	375
354.	Occupation of employed persons 16 years old and over, by years of school completed and sex: 1990	376
355.	Unemployment rate of persons 16 years old and over, by age, sex, race/ethnicity, and years of school completed: 1990	377
356.	Employment status and hourly wages of 1972 high school graduates in Spring 1986, by race/ethnicity and socioeconomic status	378
357.	Median annual income of year-round full-time workers 25 years old and over, by years of school completed and sex: 1970 to 1989	379
358.	Total annual money earnings of persons 25 years old and over, by years of school completed, sex, and age: 1989	380

Recent High School and College Graduates

359.	College enrollment and labor force status of 1988 and 1989 high school graduates 16 to 24 years old, by sex and race/ethnicity: October 1988 and October 1989	381
360.	Labor force status of 1979-80 to 1988-89 high school dropouts 16 to 24 years old, by sex and race/ethnicity: October 1980 to October 1989	382
361.	Full-time employment status of bachelor's degree recipients 1 year after graduation, by field of study: 1976 to 1987	383
362.	Occupation of 1985-86 bachelor's degree recipients 1 year after graduation, by field of study and occupational area: 1987	384
363.	Percentage of 1985-86 bachelor's degree recipients who have pursued additional higher education, by type of degree sought or obtained, and undergraduate major field of study: 1987	385
364.	Percentage of 1985-86 bachelor's degree recipients who have applied for additional education and reasons for not applying, by major field of study: 1987	385
365.	Average annual salary of bachelor's degree recipients employed full-time 1 year after graduation, by field of study: 1976 to 1987	386
366.	Income, earnings, and work activity of persons who held a bachelor's or advanced degree, by field of study: Spring 1984	386
367.	Participation of young adults in voluntary organizations, by selected characteristics: 1984 to 1986	387
368.	Literacy skills and reading scores of young adults, by race/ethnicity and level of education: 1985	387

6. International Comparisons of Education

369.	Preprimary enrollment and enrollment rates, by age: Selected countries, 1987-88	393
370.	Estimated population, school enrollment, teachers, and public expenditures for education in major areas of the world: 1970, 1980, and 1988	394

371.	Pupils per teacher in public and private elementary and secondary schools: Selected countries, 1970 to 1988	395
372.	International Assessment of Educational Progress in mathematics for age 13, by content area: 1988	395
373.	Selected statistics for countries with populations over 10 million, by continent: 1970 to 1988	396
374.	Average percentage of items answered correctly on an international mathematics test of 8th grade students: Selected countries, 1981-82	398
375.	International mathematics test scores and percentage of age group taking tests in the 12th grade: Selected countries, 1981-82	398
376.	International Assessment of Educational Progress in science for age 13, by content area: 1988	399
377.	Science test scores for 10- and 14-year-olds, percentage of age groups in school, and mean ages of students tested in selected countries: 1983 to 1986	399
378.	Science test scores for 12th graders enrolled and not enrolled in science classes, by subject: Selected countries, 1983 to 1986	400
379.	Mean number of areas correctly identified in a test of geography knowledge, by country and age: 1988	400
380.	Higher education degrees conferred, by sex and as a ratio of age group: Selected countries, 1987	401
381.	Enrollment and current fund expenditures: Selected countries, 1979-80 and 1987-88	401
382.	Public expenditures for education as a percentage of government expenditures for all purposes: Selected countries, 1960 to 1988	402
383.	Public expenditures for education as a percent of gross national product: Selected countries, 1960 to 1988	402
384.	Foreign students enrolled in institutions of higher education in the United States and outlying areas, by continent, region, and selected countries of origin: 1980-81 to 1989-90	403
7. Learning Resources and Technology		
Libraries		
385.	Selected statistics on public school libraries/media centers, by level and size of school: Fall 1985	407
386.	General statistics of public school libraries/media centers, by level of school: 1973-74 to fall 1985	408
387.	Holdings and expenditures of public school libraries/media centers, by level and size of school: 1984-85	409
388.	Selected statistics on private school libraries/media centers, by level and size of school: 1984-85	410
389.	General statistics of college and university libraries: United States and outlying areas, 1974-75 to 1987-88	411

390.	Selected statistics on the collections, staff, and operating expenditures of 50 large college and university libraries: 1985	412
391.	General statistics of public libraries, by population of area served: Fiscal year 1982 ..	413
392.	Public libraries, books and serial volumes, annual attendance, and reference transactions, by State: 1989	413

Computers and Technology

393.	Microcomputer use by elementary and secondary schools, by level, control, and size of school: 1981 to 1986	414
394.	Percentage of workers using computers on the job, by sex, educational attainment, and selected computer activities: October 1989	414
395.	Student use of computers, by level of instruction and selected characteristics: October 1984 and October 1989	415

INTRODUCTION

In the fall of 1990, about 60.2 million persons were enrolled in American schools and colleges (table 1). About 3.5 million were employed as elementary and secondary school teachers and as college instructors. Other professional, administrative, and support staff of educational institutions numbered 3.8 million. Thus, more than 67 million Americans were involved, directly or indirectly, in providing or receiving formal education. In a nation with a population of about 250 million, more than 1 out of every 4 persons participated in the educational process.

Elementary/Secondary Enrollment

Enrollment in elementary and secondary schools grew rapidly during the 1950s and 1960s and peaked in 1971 (table 3). This enrollment rise was caused by what is known as the "baby boom," a dramatic increase in births following World War II. From 1971 to 1984, total elementary and secondary school enrollment decreased steadily, reflecting the decline in the school-age population over that period. After these years of decline, enrollment in public elementary and secondary schools showed a small increase in the fall of 1985 (table 3). Enrollment in kindergarten through grade eight rose from 27.0 million in fall 1985 to an estimated 29.7 million in fall 1990. Enrollment in the upper grades declined from 12.4 million to an estimated 11.3 million over the same period. The net result of these two divergent trends was an overall increase in public school enrollment.

Private school enrollment was estimated at 5.2 million in fall 1990. About 4.1 million students were enrolled at the elementary level and 1.1 million at the secondary level. Approximately 11 percent of all elementary and secondary students attend private schools.

Recent increases in elementary enrollment indicate a new trend that will affect elementary and secondary schools for a number of years. Projections of the National Center for Education Statistics (NCES) indicate that public elementary school enrollment will continue to increase, reaching 31.8 million in 1995 and 33.0 million in 2000 (table 3). Between fall 1990 and fall 1995, elementary enrollment is projected to grow by 7 percent, while secondary school enrollment is expected to rise by 12 percent. The growing numbers of young pupils that have been filling the elementary schools will begin to cause increases at

the secondary school level during the early 1990s. Record levels of enrollment are expected by the year 2000.

Postsecondary Education

College enrollment in fall 1990 was estimated at 14.0 million—reflecting a slight increase from the record level of the previous fall. Total college enrollment is expected to rise slightly during the early 1990s, despite decreases in the traditional college-age population (table 2). The number of persons in the 18- to 24-year-old age group peaked in 1981 and then began a decline that is expected to continue throughout most of the next decade (table 14). However, recent trends suggest that total enrollment will remain relatively high because of the increased participation of older women students and a high rate of college attendance for recent high school graduates. Although total enrollment may remain relatively stable, some shifts of students from full-time to part-time status are expected (table 163).

Teachers

About 2.7 million elementary and secondary school teachers were engaged in classroom instruction in the fall of 1990 (table 4). This number has risen in recent years, up about 9 percent since 1984. The number of public school teachers in 1990 was about 2.4 million and the number in private schools was estimated at 0.4 million. About 1.6 million teachers were teaching in elementary schools, while about 1.1 million were employed at the secondary level (table 4).

The number of public school teachers has risen at a faster rate than the number of students in recent years, resulting in a continuing decrease in the pupil/teacher ratio. In the fall of 1990, there were 17.2 pupils per public school teacher compared with 18.7 pupils per teacher 10 years earlier. During the same time period, the pupil/teacher ratio in private schools fell from 17.7 to 14.7. The declining pupil/teacher ratio reflects the trend toward smaller classes and more specialized education programs (table 59).

Teacher salaries, which lost purchasing power to inflation during the 1970s, rose faster than the inflation rate in the 1980s. The rising salaries reflect both an interest by State and local education agencies in boosting teacher salary schedules and an increase in

teachers' experience and education levels (table 64). According to data from the National Education Association and NCES projections, the value of teachers' salaries, after adjustment for inflation, rose about 21 percent between 1980-81 and 1990-91. The average salary for teachers in 1990-91 was \$33,015, a record-high level (table 72).

Student Performance: Reading

Some improvements have been registered in reading proficiency of elementary and secondary school students. Reading proficiency of 9- and 13-year-olds rose between 1970-71 and 1979-80 (table 102). Reading proficiency of 17-year-olds rose between 1979-80 and 1983-84, but the proficiency of 9-year-olds declined slightly. No significant changes occurred in the overall reading performance of any of the age groups between 1983-84 and 1987-88. Although the reading proficiency of minority children remains below that of other students, blacks have made very large gains. For example, the proportion of black 9-year-olds reading at a basic level or above rose from 22 percent in 1970-71 to 39 percent in 1987-88 (table 106).

Mathematics

Results from assessments of mathematics proficiency also indicate that students have made some improvements in their skill with basic computations. However, performance on more advanced mathematical operations has shown no improvement. The proportion of 9-year-olds who showed beginning skills and understanding rose from 70 percent in 1977-78 to 74 percent in 1985-86, but there was no change in the proportion demonstrating higher levels of performance (table 114).

Similarly, the proportion of 13- and 17-year-olds with an understanding of basic operations rose between 1977-78 and 1985-86, but no change occurred in the proportion with proficiency in moderately complex procedures or multi-step problem solving and algebra. However, notable improvements were made by minority children at all three age groups. The proportion of black 13-year-olds with proficiency in basic operations rose from 30 percent in 1977-78 to 49 percent in 1985-86; for Hispanics the proportion rose from 36 percent to 55 percent (table 115). A 1990 study of eighth graders' mathematics performance found that proficiency varied widely among the 37 States and the District of Columbia which participated in the program (table 116). In general, States with fewer students in large urban areas, smaller proportions of black and Hispanic students, smaller proportions of students watching 6 or more hours of television each day, and fewer numbers from single-parent households scored relatively high.

States in the Northeast and Central region scored higher than States in the Southwest and West.

Science

Small improvements also were registered on science proficiency exams between 1976-77 and 1985-86. The proportion of 9-year-olds who understood simple scientific principles rose from 68 percent in 1976-77 to 71 percent in 1985-86, but no improvement occurred in more advanced levels of achievement. Similarly, the percentage of 13-year-olds demonstrating application of basic scientific information rose from 49 to 53 percent between 1976-77 and 1985-86, but no improvement was registered at the upper levels of achievement. No significant changes occurred in the overall achievement of 17-year-olds between 1976-77 and 1985-86 (table 119).

International Comparisons

Despite some evidence that student achievement has improved, there is still reason for concern. The national assessment measures have not shown a consistent pattern of improvement, especially for upper-level skills. Recent international tests of mathematics and science have highlighted the relatively low level of achievement of U.S. students compared to their peers in other countries (tables 372 to 379). Also, a major U.S. study of writing achievement found that even 11th-grade students had considerable difficulty with persuasive writing assignments (table 109).

Persistence in Education

The number of high school graduates in 1990-91 totaled about 2.5 million. About 2.3 million graduated from public schools and about 0.3 million graduated from private schools. The number of high school graduates has declined from its peak in 1976-77, when 3.2 million persons earned their diplomas. Although the number of graduates has been lower in recent years, the proportion of 17- and 18-year-olds graduating from high school has remained relatively stable for more than two decades, declining slightly in the 1970s and increasing slightly in the 1980s. (Table 95).

The number of postsecondary degrees to be conferred are expected to be at or near an all-time high during the year 1990-91: 470,000 associate degrees; 1,064,000 bachelor's degrees; 327,000 master's degrees; 38,700 doctor's degrees; and 73,800 first-professional degrees (table 228). The number of first-professional degrees is expected to be down slightly from its 1985 peak.

The Bureau of the Census has collected annual statistics on the educational attainment of the popula-

tion in terms of years of school completed. These data indicate that, between 1980 and 1989, the proportion of the adult population 25 years of age and over with 4 years of high school or more rose from 69 percent to 77 percent, and the proportion of adults with at least 4 years of college increased from 17 percent to 21 percent. In contrast, the proportion of young adults (25- to 29-year-olds) attaining these levels did not change significantly over this time period (table 8).

Expenditures

Expenditures for public and private education, from preprimary through graduate school, are estimated at \$365 billion for 1989-90, and projections indicate that they will be about \$393 billion in 1990-91 (table 30). The expenditures of elementary and secondary schools are expected to total about \$237 billion for 1990-91, while institutions of higher education will spend about \$155 billion. The outlays of public schools and colleges are expected to be about \$319 billion, while for privately controlled institutions, they are expected to reach \$74 billion. Viewed in another context, the total expenditures for education in recent years have amounted to about 7 percent of the gross national product and are expected to remain at that level in 1990-91 (table 29).

The statistical highlights in this section of the report provide a quantitative description of the current American education scene. Clearly, as evidenced by the large number of participants, the number of years that people spend in school, and the vast sums expended by educational institutions, the American people have a high regard for education. Yet, data on student proficiency suggest that improvements in recent years have been limited. Wide variations in mathematics proficiency from State to State and disappointing scores of American students in international tests pose challenges for the future.

NOTE: Readers should be aware of the limitations of statistics. These limitations vary with the exact nature of a particular survey. For example, estimates based on a sample of institutions will differ somewhat from the figures that would have been obtained if a complete census had been taken using the same survey procedures. Although some of the surveys conducted by the National Center for Education Statistics are complete, census-type surveys, all surveys are subject to design, reporting, and processing errors and errors due to nonresponse. More information on survey methodologies can be found in the "Guide to Sources" in the appendix. Price indexes for inflation adjustments can be found in table 36.

CHAPTER 1

All Levels of Education

This chapter provides a broad overview of education in the United States. It brings together material from preprimary, elementary, secondary, and higher education and from the general population to present a composite picture of the American educational system. It contains tables which show the total number of persons enrolled in school, the number of teachers, the number of schools, and total expenditures for education at all levels. This chapter also includes statistics on education-related topics such as education attainment, family characteristics, population, and opinions about schools. Economic indicators and price indexes have been added to assist researchers in preparing comparative analyses.

Figure 1 provides an overview of the structure of education in the United States. It shows the three levels of education (elementary, secondary, and postsecondary) and gives the approximate age of persons at each level. Pupils ordinarily spend from 6 to 8 years in the elementary grades, which may be preceded by 1 or 2 years in nursery school and kindergarten. The elementary school program is followed by a 4- to 6-year program in high school. Pupils normally complete the entire program through grade 12 by age 17 or 18.

High school graduates who decide to continue their education may enter a technical or vocational institution, a 2-year college, or a 4-year college or university. A 2-year college normally offers the first 2 years of a standard 4-year college curriculum and a selection of terminal-vocational programs. Academic courses completed at a 2-year college are transferable for credit at 4-year colleges and universities. A technical or vocational institution offers postsecondary technical training leading to a specific career.

An associate degree requires at least 2 years of college-level work, and a bachelor's degree normally can be earned in 4 years. At least 1 year beyond the bachelor's is necessary for a master's degree, while a doctor's degree usually requires a minimum of 3 or 4 years beyond the bachelor's.

Professional schools differ widely in admission requirements and in program length. Medical students, for example, generally complete a 4-year program of premedical studies at a college or university before they can enter the 4-year program at a medical

school. Law programs normally require 3 years of coursework beyond the bachelor's degree level.

Many of the statistics in this chapter are derived from the statistical activities of the National Center for Education Statistics. In addition, substantial contributions have been drawn from the work of other groups, both government and nongovernment, as shown in the source notes of the appropriate tables. Information on survey methodologies is in the "Guide to Sources" in the appendix and in the publications cited in the source notes.

Highlights

- In the fall of 1985, total elementary and secondary school enrollment increased for the first time since 1971. The increase from 1985 to 1990 occurred in the elementary grades, but this pattern is expected to change in the early 1990s. Between fall 1990 and fall 1995, public elementary enrollment is expected to rise 7 percent, while public secondary enrollment is expected to increase by 12 percent. Overall, enrollment is expected to increase by 3.4 million students, or about 8 percent. (Table 3)
- Over the past 10 years, there has been little change in the proportion of students in private schools and colleges. Between 1980 and 1990, the proportion of elementary and secondary school students in private schools has been around 11 to 12 percent. At the same time, the proportion of college students in private institutions has remained at about 22 percent. (Table 3)
- College enrollment rose to a record level of 14.0 million in fall 1990, reflecting a significant increase in public college enrollment. Enrollment is expected to rise during the 1990s because of the high attendance rates of younger age groups and the large number of older students. (Tables 3 and 163)
- The proportion of some age groups attending school has risen over the past decade, but attendance rates for most groups have remained relatively steady. A relatively small change occurred among 3- and 4-year-olds whose attendance rate rose from 37 percent in 1980 to 44 percent in 1990. Also, the proportion of 18- and 19-year-olds attending high school or college rose from 46 to 57

percent between 1980 and 1990. The proportion of 20- to 24-year-olds enrolled in school rose from 22 percent in 1980 to 29 percent in 1990. (Table 6)

- Increases in the amount of education completed by Americans has continued. In 1989, 77 percent of the population 25 years old and over had completed high school and 21 percent had completed 4 or more years of college. This represents an increase from 1980, when 69 percent had completed high school and 17 percent had 4 years of college. (Table 8)
- The gap in high school achievement between white and black young adults has narrowed in recent years. In 1980, 77 percent of black and other minority races 25- to 29-year-olds had completed high school compared to 87 percent for white 25- to 29-year-olds. By 1989, the proportion of young blacks completing high school had risen to 83 percent while the proportion of whites showed no change from the 1980 level. (Table 8)
- About 17 percent of persons over 18 had completed a bachelor's or higher degree in 1987. About 4 percent held a master's degree, 1 percent held a professional degree (e.g., medicine or law), and 0.6 percent held a doctor's degree. (Table 11)
- Between 1970 and 1990, the composition of families shifted substantially. In 1970, 50 percent of families were married-couple families with children under 18, compared to 37 percent in 1990. The proportion of families headed by women (no husband present) who had children under 18 rose from 6 percent to 10 percent. Altogether, more than one out of five children under 18 lived with one parent in 1990. (Tables 17 and 18)
- According to results of a nationwide survey, Americans rated public schools more favorably in the mid-1980s compared to the later 1980s and the early 1990s. In another opinion survey, Americans indicated that the two largest problems facing public schools in 1990 were drugs (38 percent) and discipline (19 percent). (Tables 20 and 21)
- Parents who had not completed high school were less likely than other parents to report having regular talks with their children about school experiences, high school plans, or plans after high school. (Table 22)
- Education expenditures rose to an estimated high of nearly \$393 billion in the 1990-91 school year. Elementary and secondary schools spent about 60 percent of this total, and colleges and universities accounted for the remaining 40 percent. An estimated 7.2 percent of the gross national product was spent by elementary and secondary schools and colleges and universities in 1990-91. (Tables 29 and 30)
- The proportion of total State and local government funds spent on education declined between 1979 and 1989, at least partly as a result of the drop in elementary and secondary enrollment and the expansion of other governmental services. Of the 1989 State and local funds spent on education, about 70 percent went to elementary and secondary schools, 26 percent to colleges and universities, and 4 percent to other education programs. (Tables 33 and 35)

Figure 1.—The structure of education in the United States

NOTE—Adult education programs, while not separately delineated above, may provide instruction at the elementary, secondary, or higher education level. Chart reflects typical patterns of progression rather than all possible variations.

**Table 1.—Estimated number of participants in elementary and secondary education and in higher education:
Fall 1990**
[In millions]

Participants	All levels (elementary, secondary, and higher education)	Elementary and secondary schools			Institutions of higher education
		Total	Public	Private	
1	2	3	4	5	6
Total	67.5	51.2	45.5	5.7	16.3
Enrollment ¹	60.2	46.2	41.0	5.2	14.0
Teachers and faculty	3.5	2.7	2.4	0.4	0.8
Other professional, administrative, and support staff	3.8	2.3	2.1	0.2	1.6

¹ Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes subcollegiate departments of institutions of higher education, residential schools for exceptional children, and Federal schools. Elementary and secondary includes most kindergarten and some nursery school enrollment. Excludes preprimary enrollment in schools that do not offer first grade or above. Higher education comprises full-time and part-time students enrolled in degree-credit and nondegree-credit programs in universities, other four-year colleges, and two-year colleges.

² Includes full-time and part-time faculty with the rank of instructor or above.

NOTE.—The enrollment figures include all students in elementary and secondary schools and colleges and universities. However, the data for teachers and other staff in public and private elementary and secondary schools are reported in terms of full-time equivalents. The staff data for institutions of higher education include all full-time and part-time professional, administrative, and support personnel. Because of rounding, details may not add to totals.

¹ Beginning in fall 1980, data include estimates for an expanded universe of private schools. Therefore, these totals may differ from figures shown in other tables, and direct comparisons with earlier years should be avoided.

² Data for 1869-70 through 1949-50 include resident degree credit students enrolled at any time during the academic year. Beginning in 1959, data include all resident and extension students enrolled at the beginning of the fall term.

³ Estimated.

⁴ Preliminary data.

⁵ Based on "Early Estimates" surveys.

⁶ Projected.

—Data not available.

NOTE.—Elementary and secondary enrollment includes pupils in local public school systems and in most private schools (religiously affiliated and nonsectarian), but generally excludes pupils in subcollegiate departments of institutions of higher education, resi-

dential schools for exceptional children, and Federal schools. Elementary enrollment includes some prekindergarten pupils. Higher education enrollment includes students in colleges, universities, professional schools, teachers colleges, and 2-year colleges. Higher education enrollment projections are based on the middle alternative projections published by the National Center for Education Statistics. Some data have been revised from previously published figures. Because of rounding, details may not add to totals.

¹ Includes teachers in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes subcollegiate departments of institutions of higher education, residential schools for exceptional children, and Federal schools. Teachers are reported in terms of full-time equivalents.

² Includes full-time and part-time faculty with the rank of instructor or above in colleges, universities, professional schools, teachers colleges, and 2-year colleges. Excludes teaching assistants.

³ Estimated on the basis of enrollment.

⁴ Based on actual survey data. Methodology is not consistent with figures for other years.

⁵ Preliminary data.

⁶ Projected.

— Data not available.

NOTE—Because of rounding, details may not add to totals. Some data have been revised from previously published figures.

¹ Data are for 1985-86. Data were collected from a sample survey that differed significantly from earlier surveys. The sample survey was designed to correct an undercount of about 10 percent that was known to have occurred in earlier surveys.

² Because of changes in survey procedures, figures are not directly comparable with data for later years.

³ Includes only those institutions designated as institutions of higher education by the Higher Education General Information Survey system. Includes branch campuses. Beginning in 1980, total includes some schools accredited by the National Association of Trade and Technical Schools.

⁴ Included under "private nonprofit."

—Data not available.

NOTE.—Because of changes in survey definitions, figures for "other" schools are not comparable from year to year. Because of rounding, details may not add to totals.

¹ Includes enrollment in any type of graded public, parochial, or other private school in regular school systems. Includes nursery schools, kindergartens, elementary schools, high schools, colleges, universities, and professional schools. Attendance may be on either a full-time or part-time basis and during the day or night. Enrollments in "special" schools, such as trade schools, business colleges, or correspondence schools, are not included.

NOTE—Data are based upon sample surveys of the civilian noninstitutional population.

¹ Estimates based on retrojection, by the Bureau of the Census, of 1940 census data on education by age.

² Persons of Hispanic origin are included, as appropriate, in the "white" or in the "black and other races" category.

NOTE.—Data for 1975 and subsequent years are for the noninstitutional population. Some data have been revised from previously published figures.

¹ Civilian noninstitutional population.² Includes persons of Hispanic origin.³ Persons of Hispanic origin may be of any race.

— Data not applicable or available.

NOTE.—Data are based on sample surveys of the noninstitutional population. Although cells with fewer than 75,000 people are subject to relatively wide sampling variation, they are included in the table to permit various types of aggregations. Because of rounding, details may not add to totals.

¹ The respondent was the parent most knowledgeable about the child's education. The responding parent reported on their own and their spouse's activities.

² Socioeconomic status was measured by a composite score on parental education and occupations, and family income.

³ Includes a small number of cases where one parent was a high school dropout.

NOTE —Because of rounding, details may not add to totals.

¹ Some private elementary and secondary school revenues come from Federal, State, and local sources. However, comprehensive data are not available to delineate the sources of revenues for private schools.

NOTE.—Estimates of expenditures by source of funds are derived from data collected on revenue sources. Federally supported student aid that goes to higher education institutions through students' tuition payments is shown under "All other" rather than "Federal." Such payments would add substantial amounts and several percentage points to the Federal share. Other Federal programs, not included in this table because they do not support regular educational institutions, would increase the Federal share even further.

Typical examples of these payments would be Federal support for libraries and museums. Additionally, the Federal contribution to education through tax expenditures is not reflected in this table. Because of rounding, details may not add to totals.

¹ Includes State and local government expenditures for education services, social services and income maintenance, transportation, public safety, environment and housing, governmental administration, interest on general debt, and other general expenditures.

² Includes assistance and subsidies to individuals and private institutions for elementary, secondary, and higher education, as well as miscellaneous education expenditures. —Not applicable.

NOTE—Current expenditure data in this table differ from figures appearing in other tables because of slightly varying definitions used in the *Governmental Finances* and *Common Core of Data* surveys. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Commerce, Bureau of the Census, Governments Division, *Government Finances: 1988–89* (This table was prepared February 1991).

Table 34.—Direct general expenditures per capita of State and local governments for all functions and for education, by level and State: 1988–89

¹ Data for years prior to 1963 include expenditures for government fiscal years ending during that particular calendar year. Data for 1963 and later years are the aggregations of expenditures for government fiscal years which ended on June 30 of the stated year. General expenditures exclude expenditures of publicly owned utilities and liquor stores, and of insurance-trust activities. Intergovernmental payments between State and local governments are excluded. Payments to the Federal Government are included.

² Population of the United States including Armed Forces overseas, includes Alaska and Hawaii beginning 1960. Quarterly data are averages for the period.

³ Population of the United States including Armed Forces overseas, includes Alaska and Hawaii beginning 1958.

⁴ Revised methodology.

—Data not available.

NOTE.—GNP data are adjusted by the GNP implicit price deflator. Personal income data are adjusted by the Consumer Price Index. Some data have been revised from previously published figures.

CHAPTER 2

Elementary and Secondary Education

This chapter contains a variety of statistics on public and private elementary and secondary education. These data are derived from surveys conducted by the National Center for Education Statistics (NCES) and other public and private organizations.

The Center conducts annual surveys of public schools and periodic surveys of teachers and private schools. The Common Core of Data is an administrative records survey of public elementary and secondary schools and school districts. Each State provides summary data on enrollment, staff, revenues, and expenditures. In addition, listings and selected statistics of school districts and schools are obtained. National and State summary statistics from the Common Core of Data have been published annually in the *Digest* and in a series of reports and bulletins.

The Center has released data from a new Schools and Staffing Survey system, which contains comparative statistics on public and private schools as well as detailed information on teacher and school characteristics. This new survey system will provide more information on the finances of elementary and secondary schools and will allow cross comparisons of teacher and school characteristics. The Center has reported periodically on preprimary education and on offerings and enrollments in high school subjects. The most recent statistics in these areas are summarized in the tables which follow.

This chapter of the *Digest* also makes use of data on student achievement from the National Assessment of Educational Progress; on public school enrollment by race or ethnicity from the Office for Civil Rights, U.S. Department of Education; on the characteristics, subjects taught, and average salaries of public school teachers from the National Education Association and the American Federation of Teachers; on private school enrollment from the National Catholic Educational Association; on mandatory ages of attendance, graduation requirements, and minimum-competency testing for students and teachers from the Education Commission of the States; on the Scholastic Aptitude Test scores of college-bound high school seniors from the College Entrance Examination Board; and on the proportion of high school graduates going to college from the Bureau of Labor Statistics.

Additional information on public school libraries and the use of microcomputers in public and private schools is tabulated in chapter 7. Comparisons of the income and employment of high school graduates and dropouts, and college enrollment of high school graduates are in chapter 3. Tabulations of international data are in chapter 6. Further information on survey methodologies is in the "Guide to Sources" in the appendix and in the publications cited in the table source notes.

Highlights

- In fall 1985, public elementary and secondary school enrollments increased for the first time since 1971. Enrollment has continued to rise, resulting in an increase of 4 percent from 1985 to 1990. (Tables 3 and 39)
- In contrast to the declining elementary and secondary school enrollments during the 1970s and early 1980s, preprimary education enrollment grew substantially. Between 1970 and 1980, preprimary enrollment of 3- to 5-year-olds rose by 19 percent; between 1980 to 1990, it increased an additional 37 percent. An important feature of the increasing participation of young children in preprimary schools is the increasing proportion in full-day programs. In 1990 about 39 percent of the children attended school all day, compared with 32 percent in 1980 and 17 percent in 1970. (Table 45)
- Despite drops in total elementary and secondary school enrollment during the late 1970s and early 1980s, increasing numbers of children were served in programs for the handicapped. In 1976-77, 8 percent of children were served in these programs compared with 11 percent in 1988-89. Most of this increase may be attributed to the proportion of children identified as learning disabled, which rose from less than 2 percent of all children in 1976-77 to 5 percent of all children in 1988-89. (Table 47)
- Schools with religious orientation charged significantly lower tuition than nonsectarian schools. In 1987-88, about 6 percent of Catholic schools and 11 percent of schools with other religious orientations charged more than \$2,500 tuition, compared with 58 percent of the nonsectarian private

schools. The mean tuition paid by students at Catholic elementary schools was \$1,005, compared to \$1,619 at other religiously oriented schools, and \$3,091 at nonsectarian schools. Mean tuition paid by secondary school students was substantially higher, averaging \$2,045 at Catholic schools, \$3,592 at other religiously oriented schools, and \$6,391 at nonsectarian schools. (Table 56)

- During the 1970s and early 1980s, public school enrollment decreased, while the number of teachers held steady. As a result, the pupil/teacher ratio declined markedly. Between 1970 and 1980, the pupil/teacher ratio for public schools fell from 22.3 to 18.7. After 1980, the number of pupils per teacher continued downward, reaching 17.2 in 1990. (Table 59)
- Of the 307,000 full-time and part-time private school teachers in 1987–88, about 78 percent were women. About 56 percent of the private school teachers were under age 40, and 34 percent had a master's degree or above. In contrast, 71 percent of public school teachers were women, 49 percent were under 40, and more than 47 percent had a master's degree or above. (Table 62)
- In general, public school teachers have higher salaries than private school teachers. In 1987–88, the average base salary for public school teachers was \$26,231, compared with \$16,562 for private school teachers. (Table 70)
- Teachers have expressed more satisfaction with their jobs in recent years. About 86 percent felt satisfied with their jobs in 1989, compared with 81 percent in 1984 and 1986. (Table 71)
- The average salary for public school teachers has grown rapidly in recent years, reaching \$33,015 in 1990–91. After adjustment for inflation, teachers' salaries rose 21 percent between 1980–81 and 1990–91, more than recouping the losses in purchasing power suffered during the 1970s. (Table 72)
- The number of nonteaching staff employed by public schools has grown at a faster rate than the number of pupils and teachers. In 1969–70, there were 13.5 pupils per staff member (total staff) compared with 9.2 pupils per staff member in 1989. During the same period, the proportion of the total staff who were teachers declined from 60 percent to 53 percent. In 1987–88, the number of pupils per staff member at private schools was 10.3, approximately the same as for public schools. (Tables 55 and 77)
- Comparisons of the number of public and private high school graduates with the 17-year-old popula-

tion show that the proportion of young people graduating from high school has not increased over the past 20 years. At its highest point in 1968–69, there were 77.1 graduates for every 100 persons 17 years of age. This ratio declined during the 1970s, falling to a low point of 71.4 in 1979–80. The ratio has risen since then, reaching 75.4 in 1990–91. (Table 95)

- Students at ages 9 and 17 were reading slightly better in 1988 than they were in 1971, but 13-year-olds showed no improvement. Improvements in the achievement of minority students between 1971 and 1988 have reduced the gap between their performance and that of other students. (Tables 102 and 106)
- Results from the 1988 assessment of history proficiency showed that large numbers of students had some command of basic history facts, but their interpretative skills were relatively weak. Among 12th graders, 89 percent knew beginning historical information, but only 5 percent demonstrated an ability to interpret historical information. (Table 112)
- Results from a national assessment of mathematics achievement found that performance on basic skills improved between 1977–78 and 1985–86, but performance on more advanced operations remained the same or deteriorated. Between 1977–78 and 1985–86, the proportion of 13-year-olds who could perform basic operations rose from 65 percent to 73 percent. Similarly, the proportion of 17-year-olds who could perform basic operations rose from 92 percent to 96 percent. (Table 115)
- Student achievement in science rose between 1976–77 and 1985–86 for 9- and 13-year-olds, but showed no significant change for 17-year-olds. Between 1976–77 and 1985–86, the proportion of 9-year-olds who could understand simple scientific principles rose slightly, from 68 to 71 percent. The proportion of 13-year-olds who could apply scientific information rose from 49 percent to 53 percent. (Table 119)
- Between 1979–80 and 1989–90, mathematics SAT scores increased by 10 points, while verbal scores remained relatively stable. However, considerable difference existed among students from different racial/ethnic groups. Between 1979–80 and 1989–90, combined mathematics and verbal scores for white students rose by only 9 points compared with an increase of 47 points for black students and 33 points for Asian American students. (Tables 123 and 125)
- The average number of science and mathematics courses completed by high school graduates increased substantially between 1982 and 1987. The

mean number of mathematics courses (Carnegie units) completed in high school rose from 2.5 in 1982 to 3.0 in 1987, and the number of science courses rose from 2.2 to 2.6. As a result of the increased course load, the proportion of students completing the recommendations of the National Commission on Excellence (4 units of English; 3 units of social studies; 3 units of science; 3 units of mathematics; and .5 units of computer science) rose from 2.7 percent in 1982 to 13.6 percent in 1987. (Tables 130 and 132)

- The average number of courses in vocational-technical areas completed by all high school graduates dropped slightly, from 4.0 units in 1982 to 3.6 units in 1987. The average number of vocational units completed by vocational and academic program students remained stable or increased slightly between 1982 and 1987. Thus, the increase in the number of academic credits taken by graduates between 1982 and 1987 did not result in a decrease in the number of vocational-technical credits completed. (Table 131)
- Eighth-grade students at Catholic and other private schools were more likely to say that they "get along well with teachers" than students at public schools. Students at private schools were also

more likely to feel that "rules for behavior are strict" than students at public schools. (Table 136)

- The proportion of public and private high school seniors who reported ever using an illicit drug rose from 55 percent in 1975 to 66 percent in 1981. After 1981, the proportion of seniors who had ever used drugs fell, reaching 51 percent in 1989. Also, the proportion of high school seniors who have used cocaine fell from 17 percent in 1985 to 10 percent in 1989. Alcohol remains the most often used drug. The proportion of seniors using alcohol within the previous 30 days declined from 72 percent in 1980 to 60 percent in 1989. (Table 142)
- States are the most important funding source for public elementary and secondary schools. In 1988-89, 48 percent of all revenues came from State sources, 46 percent came from local sources, and 6 percent came from the Federal Government. (Table 152)
- The expenditure per student in public schools has risen significantly in recent years, even after allowing for inflation. In 1990-91, the average current expenditure per student in average daily attendance was \$5,266. After adjustment for inflation, this represents an increase of 36 percent since 1980-81. (Table 158)

¹ Data on population and labor force are from the Bureau of the Census, and data on personal income and national income are from the Bureau of Economic Analysis, U.S. Department of Commerce. Population data through 1959–60 are based on total population from the decennial census. Beginning in 1969–70, population data are resident population, excluding armed forces overseas, as of July 1.

² Data for 1869–70 through 1959–60 are school year enrollment. Data for later years are fall enrollment.

³ Data for 1870–71.

⁴ Estimated by the National Center for Education Statistics.

⁵ Prior to 1919–20, data are for the number of different persons employed rather than number of positions.

⁶ Includes interest on school debt.

⁷ Because of the modification of the scope of "current expenditures" for elementary and secondary schools, data for 1959–60 and later years are not entirely comparable with prior years.

⁸ Includes summer schools, community colleges, and adult education. Beginning in 1959–60, also includes community services, formerly classified with "current expenditures for elementary and secondary schools."

⁹ Excludes community colleges and adult education.

¹⁰ Average includes supervisors, principals, teachers, and other nonsupervisory instructional staff.

¹¹ Estimated by the National Education Association.

¹² Excludes current expenditures not allocable to pupil costs.

¹³ A D A " means average daily attendance in elementary and secondary schools.

¹⁴ The expenditure figure used here is the sum of current expenditures allocable to pupil costs, capital outlay, and interest on school debt.

¹⁵ Per day rates derived by dividing annual rates by average length of term.

— Data not reported.

NOTE: Kindergarten enrollment includes a relatively small number of nursery school pupils. Because of rounding, details may not add to totals. Some data have been revised from previously published figures.

¹ Data estimated by State education agencies.² Includes a relatively small number of prekindergarten students.³ Actual data.⁴ Beginning in 1983, data include students enrolled in public schools on Federal bases and other special arrangements.⁵ Data estimated by NCEs.⁶ Beginning in 1986, data include State vocational/technical schools.

—Data not available.

NOTE.—Some data have been revised from previously published figures.

SOURCE.—U.S. Department of Education, National Center for Education Statistics, Common Core of Data survey. (This table was prepared January 1991.)

¹ Total includes estimates for nonreporting States.

² Data for California are not strictly comparable with those for other states because California's attendance figures include excused absences.

³ Data estimated by State education agencies.

—Data not available.

—Data not available.

NOTE.—The 1986-87 data were derived from the 1986 Elementary and Secondary School Civil Rights sample survey of public school districts. State estimates may differ

from other data sources because of variations in survey methodology. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, Office for Civil Rights, 1986 *State Summaries of Elementary and Secondary School Civil Rights Survey*, and National Center for Education Statistics, "Common Core of Data" survey. (This table was prepared March 1991.)

Table 45.—Enrollment of 3-, 4-, and 5-year-old children in preprimary programs, by level and control of program and by attendance status: October 1965 to October 1990

— Data not available

NOTE.—Data are based on sample surveys of the civilian noninstitutional population. Although cells with fewer than 75,000 children are subject to wide sampling variation, they are included in the table to permit various types of aggregations. Enrollment data for 5-year-olds include only those students in preprimary programs. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Preprimary Enrollment*, various years, and U.S. Department of Commerce, Bureau of the Census, *Current Population Survey*, unpublished data. (This table was prepared May 1991.)

¹ Includes students served under Chapter 1 and Education of the Handicapped Act (EHA).² Includes preschool children 3-5 years served under the EHA and 0-5 years served under Chapter 1.³ Prior to 1987-88, these students were included in the counts by handicapping condition. Beginning in 1987-88, States are no longer required to report preschool handicapped students (0-5 years) by handicapping condition.⁴ Less than .05.⁵ Based on the enrollment in public schools, kindergarten through 12th grade, including a relatively small number of prekindergarten students.⁶ Less than .005.

—Data not available.

NOTE.—Counts are based on reports from the 50 States and District of Columbia only (i.e., figures from U.S. territories are not included). Increases since 1987-88 are due in part to new legislation enacted Fall 1986, which mandates public school special education services for all handicapped children ages 3 through 5 by the 1990-91 school year. Some data have been revised from previously published figures. Because of rounding, details may not add to totals.

¹ Includes a relatively small number of secondary ungraded and postgraduate students.² Data for most years are partly estimated.³ Data for 1890 through 1950 and for 1960 are from the decennial censuses of population. The other figures are Bureau of the Census estimates as of July 1 preceding the opening of the school year.⁴ Data are for 1927-28.⁵ Data are for 1940-41.⁶ Estimated.

NOTE.—Includes enrollment in public schools that are a part of State and local school systems and also in most nonprofit-making private schools, both religiously affiliated and

nonsectarian. Excludes enrollment in subcollegiate departments of institutions of higher education, residential schools for exceptional children, and Federal schools. Because of rounding, details may not add to totals. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems; Statistics of Public Elementary and Secondary School Systems; Statistics of Nonpublic Elementary and Secondary Schools*, Common Core of Data survey, and *Projections of Education Statistics to 2001*. ¹ Estimated² Revised from previously published data.³ Data for public schools are estimated. Data for private schools are projected.⁴ Projected.

NOTE.—Data for teachers are expressed in full-time equivalents. Distribution of unclassified teachers by level is estimated. Distribution of elementary and secondary school

teachers by level is determined by reporting units. Kindergarten includes a relatively small number of nursery school teachers and students. Some data have been revised from previously published figures. Because of rounding, details may not add to totals.

¹ Total differs from data appearing in other tables because of varying survey processing procedures and time period coverages.

² Excludes teachers with less than a bachelor's degree.

—Too few sample cases (fewer than 30) for a reliable estimate.

NOTE.—Details may not add to totals due to rounding or missing values in cells with too few sample cases, or item nonresponse. Cell entries may be underestimates due to item nonresponse.

Table 66.—Teacher candidates' reasons for majoring in education and their perceptions of readiness to teach: Spring 1986 to 1988

Students' reasons for becoming teachers	Percent citing reason		Facet of teaching	Percent perceiving readiness		
	1986	1987		1986	1987	1988
1	2	3	4	5	6	7
Helping children grow and learn	90	95	Use proper teaching methods	83	63	—
Seems to be challenging field	63	65	Plan instruction	82	64	88
Like work conditions (e.g., job market, calendar, security)	54	52	Evaluate student learning	80	68	87
Inspired by favorite teachers	53	45	Responding to student differences	80	76	86
Sense of vocation and honor of teaching	52	52	Use materials properly	75	58	86
Could lead to other career	44	40	Develop materials	75	61	—
Could be admitted and would succeed	41	44	Work effectively with other teachers	74	66	82
Liked reputation of education campus	22	23	Diagnose learner needs	72	64	82
Friends are majoring in education	20	23	Manage classrooms	68	59	74
Inspired by parents	22	23	Develop curriculum	68	55	—
			Deal with misbehavior	56	52	—
			Teach with computers	29	28	32

¹Based on Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor. Price index does not account for different rates of change in the cost of living among States.

²Estimated by the American Federation of Teachers. See NOTE.

³Preliminary or State estimate.

⁴Includes extra duty and extracurricular pay.

⁵Estimated to exclude fringes.

⁶Median salary.

⁷Based on total gross salary.

NOTE.—Data in this table reflect results of surveys conducted by the American Federation of Teachers. Because of differing survey and estimation methods, these data are not entirely comparable with figures appearing in other tables.

SOURCE: American Federation of Teachers, *Survey and Analysis of Salary Trends*, 1989 and 1990. (This table was prepared September 1990.)

¹ Data exclude teachers reported as working in school district offices rather than in schools.

² Expenditures by local school districts only. Excludes expenditures by State education agencies for local school districts.

³ Current expenditure per pupil based on fall enrollment collected by the Bureau of the Census.

ISD—Independent school district.

¹ Average for schools reporting enrollment data

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data survey. (This table was prepared December 1990.)

NOTE.—Schools with no grade lower than 7. Excludes schools not reported by level, such as special education schools for the handicapped.

Table 95.—High school graduates compared with population 17 years of age: 1869–70 to 1990–91

[Numbers in thousands]

¹ Derived from *Current Population Reports*, Series P-25. 17-year-old population adjusted to reflect October 17-year-old population.

² Includes graduates of public and private schools.

³ Data for 1929–30 and preceding years are from *Statistics of Public High Schools* and exclude graduates of high schools which failed to report to the Office of Education.

⁴ For most years, private school data have been estimated based on periodic private school surveys. For years through 1957–58, private includes data for subcollegiate departments of institutions of higher education and residential schools for exceptional children.

⁵ Data have been revised from previously published figures.

⁶ Public high school graduates based on State estimates.

— Data not available.

NOTE—Includes graduates of regular day school programs. Excludes graduates of other programs, when separately reported, and recipients of high school equivalency certificates. Because of rounding, details may not add to totals.

* National total includes estimates for nonreporting States.

† Actual 1989–90 count.

‡ Data estimated by the National Center for Education Statistics (NCES).

§ Data estimated by reported State.

|| Beginning in 1985–86, graduates from adult programs are excluded.

¶ Less than .05 percent.

* Data from State Projections to 1993 published by NCES.

† Data are for 1970–71.

—Data not reported.

NOTE.—Data include graduates of regular day school programs, but exclude graduates of other programs and persons receiving high school equivalency certificates. They also exclude graduates of subcollegiate departments of institutions of higher education. Federal schools for American Indians and on Federal installations, and residential schools for exceptional children. Some data have been revised from previously published figures. All 1989–90 and 1990–91 data are State estimates unless otherwise indicated.

¹ "Status" dropouts.

² Includes persons of Hispanic origin.

³ Persons of Hispanic origin may be of any race.

— Data not available.

NOTE:—"Status" dropouts are persons who are not enrolled in school and who are not high school graduates. People who have received GED credentials are counted as

graduates. Data are based upon sample surveys of the civilian noninstitutional population.

¹Upper age limits for service eligibility vary by State.²These figures reflect an estimate of those who were actually known to have dropped out and do not include youth who simply stopped coming to school or whose status was unknown.³Includes students who died or no longer received special education services, but whose exit reason is unknown.⁴Includes data for students not reported by specific age.

NOTE: It can be assumed that a substantial proportion of the "Other" category includes students who are no longer in school and have neither graduated nor reached the maximum age. Therefore, the overall dropout figure probably exceeds 27 percent.

¹ All participants of this age were in school.² Test scores of Hispanics were not tabulated separately.³ The 4 items for the scale were: (1) newspaper subscription; (2) magazine subscription; (3) more than 25 books in home; and (4) encyclopedia at home.

— Data not available.

NOTE.—The NAEP scores have been evaluated at certain performance levels. A score of 300 (adept) implies an ability to find, understand, summarize, and explain relatively complicated literary and informational material. A score of 250 (intermediate) im-

plies an ability to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. A score of 200 (basic) implies an ability to understand, combine ideas, and make inferences based on short un-complicated passages about specific or sequentially related information. A score of 150 implies an ability to follow written directions and select phrases to describe pictures.

¹ Virtually no students were able to read at the advanced level. All participants of this age were in school.² Since virtually all 17-year olds read at the rudimentary level, details of this information by race and sex are not available.³ Able to follow brief written directions and select phrases to describe pictures.⁴ Able to understand combined ideas and make references based on short uncomplicated passages about specific or sequentially related information.⁵ Able to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials.⁶ Able to find, understand, summarize, and explain relatively complicated literary and informational material.⁷ Able to understand the links between ideas even when those links are not explicitly stated and to make appropriate generalizations even when the texts lack clear introductions or explanations.⁸ Data for 1970–71 include persons of Hispanic origin.

— Data not available.

1979	71.3	66.0	76.7	72.5	64.7	55.2
1984	75.1	70.6	79.5	76.4	68.4	76.2

¹ Standards for minimal performance level differ by grade level.² All participants of this age group were in school.

NOTE.—Informative writing is used to share knowledge and convey messages, instructions, and ideas. Persuasive writing attempts to bring about some action or change. Imaginative writing provides a special way of sharing our experiences and understanding the world. Five levels of proficiency were defined for each task: non-rateable, unsatisfactory, minimal, adequate, and elaborated. Non-rateable responses included those that were blank, off-task, and unreadable. Unsatisfactory responses were those that failed to reflect a basic understanding of the purpose of the writing. Minimal responses recog-

nized the elements needed to complete the task, but were not managed well enough to ensure that the intended purpose of the writing was achieved. Adequate responses included the features critical to accomplishing the purpose of the writing and were likely to have the intended effect. Elaborated responses went beyond the merely adequate, reflecting a higher level of coherence and elaboration.

¹ All participants of this age were in school.² The 4 items in the scale were: newspaper subscription; magazine subscription; more than 25 books in the home; and encyclopedia in the home.

—Data not available.

NOTE.—Performers at the 150 level know some basic addition and subtraction facts, and most can add two-digit numbers without regrouping. They recognize simple situations in which addition and subtraction apply. Performers at the 200 level have considerable understanding of two-digit numbers and know some basic multiplication and division facts. Performers at the 250 level have an initial understanding of the four basic operations. They can also compare information from graphs and charts, and are developing an ability to analyze simple logical relations. Performers at the 300 level can compute

decimals, simple fractions, and percents. They can identify geometric figures, measure simple fractions, and percents. They can identify geometric figures, measure lengths and angles, and calculate areas of rectangles. They are developing the skills to operate with signed numbers, exponents, and square roots. Performers at the 350 level can apply a range of reasoning skills to solve multi-step problems. They can solve routine problems involving fractions and percents, recognize properties of basic geometric figures, and work with exponents and square roots.

¹ All participants of this age were in school.

NOTE.—Performers at the 150 level know some general scientific facts of the type that could be learned from everyday experiences. Performers at the 200 level are developing some understanding of simple scientific principles, particularly in the life sciences. Performers at the 250 level can interpret data from simple tables and make inferences about the outcomes of experimental procedures. They exhibit knowledge and understanding of the life sciences, and also demonstrate some knowledge of basic information from the physical sciences. Performers at the 300 level can evaluate the appropriateness of the design of an experiment and have the skill to apply their scientific knowledge in

interpreting information from text and graphs. These students also exhibit a growing understanding of principles from the physical sciences. Performers at the 350 level can infer relationships and draw conclusions using detailed scientific knowledge from the physical sciences, particularly chemistry. They also can apply basic principles of genetics and interpret the societal implications of research in this field.

¹ Socioeconomic status was measured by a composite score on parental education and occupations, and family income. The "Low" SES group is the lowest quartile; the "Middle" SES group is the middle two quartiles; and the "High" SES group is the upper quartile.² Standardized scores with a mean of 50 and standard deviation of 10.³ Twenty five percent of all students fall into each one of the quartile groupings.

NOTE.—Because of rounding, details may not add to totals.

¹ Students indicated their first and second choices of fields of study. Only their first choices are reported here.

² Based on classifications reported by College Entrance Examination Board.

³ Includes "trade and vocational," "other," and "undecided" through 1984–85. Data for 1986–87 to 1989–90 exclude "other."

NOTE.—Possible scores on each part of the SAT range from 200 to 800. No data are available for 1985–86 due to changes in the Student Descriptive Questionnaire completed when students registered for the test.

¹ Based on the number of high school graduates in 1990 as projected by the Western Interstate Commission for Higher Education, and number of 1990 seniors who took the SAT.

—Data not available.

NOTE—Possible scores on each part of the SAT range from 200 to 800. Rankings of States based on SAT scores alone are invalid because of the varying proportions of students in each State taking the tests.

¹ Includes non-occupational vocational education, vocational general introduction, agriculture, business, marketing, health, occupational home economics, trade and industry, and technical courses.

² Includes personal and social courses, religion and theology, and all other courses not included in the other subject fields.

NOTE.—The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course.

SOURCE: U.S. Department of Education, National Center for Education Statistics, "1987 High School Transcript Study." (This table was prepared December 1988.)

¹ Some schools have both elementary and secondary grades. These schools are not shown separately because their number is small. These schools are included in the totals and in analyses by other school characteristics.

² Includes only thefts of items valued at \$10 or more reported by students to school authorities.

³ Based on all schools, including those reporting no occurrences.

⁴ School authorities compared current disruptive classroom behavior with that of 5 years ago on a 5-point scale ranging from "much less now" to "much more now." Percentages have been adjusted for "don't know" responses. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, "Discipline in Public Secondary Schools." (This table was prepared October 1986.)

Table 140.—Teacher perceptions of changes in disruptive student behavior, by school characteristics: 1986-87

School characteristics 1	Percent of teachers indicating that compared to 5 years ago disruptive behavior is—				
	Much less now 2	Somewhat less now 3	About the same 4	Somewhat more now 5	Much more now 6
All teachers	10	17	28	25	19
School level¹					
Elementary	8	12	27	29	24
Middle school and junior high	13	22	24	22	20
Senior high school	12	23	32	22	12
School enrollment					
Less than 400	11	16	28	25	21
400 to 999	10	17	28	26	19
1,000 or more	10	19	30	24	17
Metropolitan status					
Urban ²	15	16	20	23	26
Suburban ³	8	16	32	26	18
Rural ⁴	11	19	28	26	16

¹ Elementary schools include all schools in which the lowest grade is less than 6 and the highest grade is less than 9; middle schools and junior high schools include all schools in which the lowest grade is greater than 5 and the highest grade is less than 10; senior high schools include all schools in which the lowest grade is greater than 6 and the highest grade is greater than 9. The small number of combined schools, which offer elementary and secondary-level education, are not shown by level of school, but are included in other totals.

² Within Standard Metropolitan Statistical Areas, inside central city.

³ Within Standard Metropolitan Statistical Areas, outside central city.

⁴ Outside of Standard Metropolitan Statistical Areas.

NOTE—Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Fast Response Survey System, "Public School Teacher Perspectives on School Discipline" (This table was prepared December 1987.)

Table 141.—Percentage of teachers rating selected factors as limiting their ability to maintain order, by school level and metropolitan status: 1986-87

Factors rated as limiting teachers much or very much ¹ 1	All teachers 2	School level ²			Metropolitan status		
		Elementary school 3	Middle and junior high school 4	Senior high school 5	Urban ³ 6	Suburban ⁴ 7	Rural ⁵ 8
Lack of or inadequate alternative placements programs for disruptive students	39	43	39	35	52	36	36
Lack of student interest in learning	38	31	43	47	45	37	36
School or district restrictions on the use of strict penalties	22	21	25	23	34	21	17
Lack of administrative support	20	19	20	23	26	18	19
Likelihood of complaint from parents	19	23	17	14	23	18	18
Principal/administrator fear of being sued for disciplining students	18	19	15	18	21	17	18
Teacher fear of being sued for disciplining students	18	22	14	14	21	15	21
Lack of or inadequate teacher training in discipline procedures and school law	15	15	17	13	20	13	13
Court decisions on student misconduct	15	13	19	17	24	14	11
Teacher fear of being viewed as unable to control students	15	15	16	15	22	12	13
Fear of student reprisal	6	5	5	6	11	3	5
Lack of or inadequate security personnel	6	3	7	10	14	5	4

¹ Teachers responded on a 6-point scale with 0="not at all," 1="very little," 4="much," and 5="very much." Percents are based on teachers who indicated the factor limited them "much" or "very much."

² Elementary schools include all schools in which the lowest grade is less than 6 and the highest grade is less than 9; middle schools and junior high schools include all schools in which the lowest grade is greater than 5 and the highest grade is less than 10; senior high schools include all schools in which the lowest grade is greater than 6 and the highest grade is greater than 9. The small number of combined schools, which offer both elementary and secondary-level education, are not shown by level of school but are included in other totals.

³ Within Standard Metropolitan Statistical Areas, inside central city.

⁴ Within Standard Metropolitan Statistical Areas, outside central city.

⁵ Outside of Standard Metropolitan Statistical Areas.

NOTE—Because of rounding, details may not add to totals.

¹ Other illicit drugs include any use of hallucinogens, cocaine, and heroin, or any use of other opiates, stimulants, sedatives, or tranquilizers not under a doctor's orders.

— Data not available.

NOTE.—A revised questionnaire was used in 1982 and later years to reduce the inappropriate reporting of nonprescription stimulants. This slightly reduced the positive responses for some types of drug abuse.

¹ Ages 7 to 16 or high school graduation.² State or local discretion determines at what point in the year children become eligible for services.³ State has established two points in the program year by which children must be 3 years of age to be eligible for services.⁴ Must have parental signature for leaving school between ages of 16 and 18.⁵ Takes effect in the year 2000. Currently 7 to 16.⁶ May leave after completion of eighth grade.⁷ The ages are 6 to 17 for New York City and Buffalo.⁸ Permits parental waiver of kindergarten at age 5.⁹ Must complete academic year in which 16th birthday occurs.

NOTE.—The Education of the Handicapped Act (EHA) Amendments of 1986 make it mandatory for all States receiving EHA funds to serve all 5- to 18-year-old handicapped children at present and all 3- to 5-year-old handicapped children by 1991.

Table 146.—State requirements for high school graduation, in Carnegie units: 1980 and 1990—Continued

State	1980	1989								First graduating class to which these requirements apply	Notes
	All courses	All courses	Subject areas								
			English/ language arts	Social studies	Mathematics	Science	Physical education/ health	Electives	Other courses		
1	2	3	4	5	6	7	8	9	10	11	12
Idaho	18	21	4	2	2	2	1.5	6	5 each: reading, speech, and consumer education; 2 humanities	1989	Practical arts may substitute for 1 unit of humanities. State requires a C average, demonstrated competency in core curriculum on a junior class competency test, or adherence to local district's achievement plan for graduation. State level minimum competency test is an option of the local districts. If passed, students receive special proficiency endorsement on their diploma.
Illinois	16	16	3	2	2	1	4.5	2.25	.25 consumer education; 1 art, foreign technology, 1 year of social language, music, or vocational education	1988	1 year of math may be computer technology. One year of social studies must be U.S. history or half U.S. history and half American government. Beginning 1985-86, the school boards were allowed to excuse 11-12th grade pupils from physical education to: 1) participate in interscholastic athletics or 2) enroll in academic class required for college admission or to graduate from high school. Beginning 1986-1987, 9-12th grade pupils may elect to take a SBE developed consumer education proficiency test; if passed, they are excused from requirement.
Indiana	16	19.5	4	2	2	2	1.5	8	3 or 4 in foreign languages (3 in 1 or 2 years each in 2)	1989	State does not use standard Carnegie units.
Standard Academic honors	—	24	4	3	4	4	1	4 or 5		1990	
Iowa	—	—	—	—	—	—	1	—		1989	Legislative requirements in effect for many years. Local districts determine remaining requirements. State allows junior and senior students to receive dual credits for college coursework.
Kansas	17	21	4	3	2	2	1	9		1989	
Kentucky	18	20	4	2	3	2	1	7	1 additional math, science, social studies, or vocational education	1987	
Commonwealth	—	22	5	2	—	—	1	7	1 foreign language in advance placement; 6 units in math and science	1986	7 electives are determined by the local school board.
Louisiana	20	23	4	3	3	3	2	7.5	5 computer literacy	1989	
Standard Louisiana scholar program	—	23	4	3	3	3	2	7.5	5 computer literacy	1987	Students with ACT score of 29 or above, 3.5 GPA with no semester grade lower than a B, no unexcused absences and no suspensions receive a Scholar Program seal on diploma. Minimum competency test is required for graduation.
Regents' scholar program	—	24	4	3.5	3	3	2	4.5	3 foreign languages, 1 fine arts	1983	
Maine	(²)	16	4	2	2	2	1.5	3.5	1 fine arts	1989	American history is required. All students must pass computer proficiency standards. 1 of science units must include lab study.
Maryland	20	20	4	3	3	2	1	5	1 fine arts; 1 industrial arts/technology education, home economics, vocational education or computer studies	1989	After grade 11, 4 credits must be earned. Students earn statewide certificate of merit with fulfillment of additional requirements or a special education program. Minimum competency test, writing test, and passage of quiz on citizenship are required for graduation.
Massachusetts	—	—	—	1	—	—	4	—		—	Legislative requirements in effect for many years. American history is required. Local boards determine additional requirements.

Table 146.—State requirements for high school graduation, in Carnegie units: 1980 and 1990—Continued

State	1980	All courses	1989							First graduating class to which these requirements apply	Notes
	All courses		Subject areas						Other courses		
			English language arts	Social studies	Mathematics	Science	Physical education/health	Electives			
1	2	3	4	5	6	7	8	9	10	11	12
Michigan Standard	—	—	4	3	3	2	1	—	2 foreign languages, fine or performing arts, or vocational education; 5 computer education	—	Local legislative requirements in effect for many years. Local boards determine additional requirements. The State board, in January 1984, published graduation requirement guidelines which local districts are urged to incorporate. Included in the recommendations are a minimum of 15.5 units, which includes an option of 2 units picked from: foreign language, fine or performing arts, vocational education, and 5 computer education; and a modified academic classwork for college-bound students.
College preparatory	—	—	4	3	3	2	1	—	At least 2 years foreign language	—	
Minnesota	15	20	4	3	1	1	1.5	9.5		1982	Junior and senior students may receive dual credits for college coursework.
Mississippi	16	18	4	2	2	2	—	8		1989	At least 1 of science units must include a lab. Minimum competency test is required for graduation.
Missouri Standard	20	22	3	2	2	2	1	10	1 practical arts; 1 fine arts	1988	
College preparatory	20	24	4	3	3	3	1	8	1 practical arts; 1 fine arts	1988	The college preparation diploma became available to qualifying graduates in 1985. For college preparation, specific core subjects must be taken.
Montana	16	20	4	1.5	2	1	1	10.5		1989	Core requirements in effect for several years. State board raised the total — 1985 graduates needed 19 units; 1986 graduates needed 20. Social studies requirement has 2 alternatives. Effective 7/92, requirements will be changed to 2 units of science, 1 unit of fine arts, and 1 unit of vocational/ practical arts.
Nebraska	—	—	—	—	—	—	—	—		1991	For graduation, 200 credit hours required, with at least 80 percent in core curriculum courses. The State board is conducting hearings to define core courses.
Nevada	19	22.5	4	2	2	2	2.5	8.5	1 arts/humanities; 5 computer literacy	1992	Computer literacy may be waived by demonstration of competency. Minimum competency test is required for graduation.
New Hampshire	16	19.75	4	2.5	2	2	1.25	4	5 arts; 5 computer science; 3 units from 2 of the following arts, foreign language, practical arts, or vocational education	1989	Minimum competency test for high school graduation is an option of the local districts.
New Jersey	—	21.5	4	3	3	2	4	4	1 fine, practical, or performing arts; 5 career exploration	1990	92 credit hours are required for graduation. State does not use standard Carnegie units. Increased math requirement becomes effective for 9th grade class entering in 1990–1991 academic year. Minimum competency test is required for graduation.
New Mexico	20	23	4	3	3	2	1	9	1 communication skills	1990	State board requires student computer literacy prior to graduation. Languages other than English can satisfy communication skills requirement. Students preparing for college have an advanced curriculum. State level minimum competency test is an option of the local districts; if passed, students receive a special proficiency endorsement on their diploma.
New York Local diploma	16	18.5	4	4	2	2	5	0 to 2	1 art and/or music; 5 health; 2 noncredit units of physical education beyond the total.	1989	3–5 units from a sequence of specific courses must be chosen by the Regents' diploma students and is an additional requirement for local. Minimum competency test is required for graduation. Comprehensive tests are required.

Table 146.—State requirements for high school graduation, in Carnegie units: 1980 and 1990—Continued

State	1980	1989								First graduating class to which these requirements apply	Notes
	All courses	All courses	English: language arts	Social studies	Mathematics	Science	Physical education/health	Electives	Other courses		
1	2	3	4	5	6	7	8	9	10	11	12
Regents' diploma	18	18.5	4	4	2	2	5	0 to 2		1989	
North Carolina Standard	16	20	4	2	2	2	1	9		1987	1 science class must include a lab. Minimum competency test is required for graduation.
Scholars program	—	22	4	3	3	3	1	4	2 foreign languages; 2 additional: English, science, math, social science, or foreign language	1994	
North Dakota	17	17	4	3	2	2	1	5		1984	1 unit of higher level foreign language may be substituted for the 4th unit of English; 1 unit math may be business math. Although 17 units are required, the local education agencies are urged to require a minimum of 20 units.
Ohio	17	18	3	2	2	1	1	9		1988	By 1990, minimum competency test will be required for graduation.
Oklahoma											
High school graduation	18	20	4	2	2	2	—	10		1987	
College preparatory	10.5	15	4	2	3	2	—	—	4 from: math, history, computer science, economics, English, geography, government, foreign language, sociology, science, speech, psychology	1988	If foreign language is elected, 2 years in same language. Total hour requirement is less but more rigorous and restrictive for college preparatory path.
Oregon	21	22	3	3.5	2	2	2	8	5 career development; 1 applied arts, fine arts, or foreign language	1988	Beginning 1992, minimum competency test will be required for graduation. Beginning 1988, 3.5 GPA students receive an honors seal on their diploma.
Pennsylvania	13	21	4	3	3	3	1	5	2 arts/humanities	1989	Computer science can be an option instead of arts and humanities. State has prescribed learning objectives and curriculum guidelines for 12 goals of quality education.
Rhode Island											
Standard	16	16	4	2	2	2	—	6		1989	
College preparatory	16	18	4	2	3	2	—	4	2 foreign languages; 5 arts; 5 computer literacy	1989	
South Carolina											
Standard	18	20	4	3	3	2	1	7		1987	If approved, 1 unit of computer science can count for a math requirement. 1 unit of science and 6 or more in a specific occupational service area can fulfill the service requirements. Junior and senior students may receive dual credits for college coursework. Beginning 1990, minimum competency test will be required for graduation.
Academic achievement honors	—	22	4	3	3	2	1	7	2 foreign languages	1986	
South Dakota	16	20	4	3	2	3	—	7	5 computer studies; 5 fine arts	1989	Beginning 1990, requirements include 3 science courses and 7 electives.
Tennessee											
Standard	18	20	4	1	2	2	1.5	9	5 economics	1989	Economics requirement may include: 1 semester in economics, out-of-school experiences through Junior Achievement, or marketing education. Minimum competency test is required for graduation.
Honors, general education	—	20.5	4	3	3	3	1.5	2	2 in same foreign language; 2 fine/visual or performing arts		
Honors, vocation education	—	20.5	4	3	3	3	1.5	2	4 in same vocational education program	1989	

Table 146.—State requirements for high school graduation, in Carnegie units: 1980 and 1990—Continued

State	1980	1989								First graduating class to which these requirements apply	Notes

¹ Legislation in 1983 called for development of a minimum course of study and criteria for high school graduation standards and for grade-to-grade promotion. Local school districts were to implement standards.

² Local option.

³ A new program of State testing for grade 4 began in 1985 and expanded to grades 6 and 8 in 1986. The ninth grade State proficiency test, begun in 1980, was administered for the final time in 1986.

⁴ Beginning in fall 1985, third grade students had to demonstrate acceptable performance on criterion-referenced tests in mathematics and reading before promotion to the fourth grade. Beginning in 1988-89 school year, students must pass school readiness test to be eligible for first grade.

⁵ Students have three options: paper and pencil test, performance test, or course. First time taken (grade 9) must be paper and pencil test.

⁶ The Kansas Minimum Competency Assessment (MCA) was re-established by 1984 legislative action (SB 473). The MCA will be in effect for 5 school years, 1984-85 through 1988-89.

⁷ Legislation in 1984 required the State superintendent to recommend process of using test results for promotion and graduation to the 1986 legislature.

⁸ Grade 8 was added beginning with 1986-87 school year.

⁹ Although first class assessed graduated in 1987, the first class required to pass for graduation will be the class of 1989.

¹⁰ Students are tested in elementary, middle, and high school. Some local districts test at grades other than 4, 8, and 12.

¹¹ Grades 3, 6, and 8 are given an annual standardized achievement test. Local school districts use the results as a diagnostic tool.

¹² Locally-based tests in the areas of English composition, mathematics, and reading are required at least once in grades 1-4. Tests in grades 5-8 and 9-11 will be implemented no later than 1989-90.

¹³ Test was given in Oklahoma during the 1978-79 school year. There has been no followup to the program. However, a plan for Statewide testing was submitted for legislative action in January 1985.

¹⁴ The South Carolina Education Improvement Act of 1984 specified that the 11th-grade test being used to gather baseline data be replaced in 1985-86 school year with an exit examination in the 10th grade. All students graduating in 1990 and after must pass the examination.

¹⁵ Local districts use the State-designated tests at grades 3, 6, and 8 for remediation and to advise on grade retention. The Tennessee high school test, first taken at grade 9, is required for graduation.

¹⁶ Texas HB 72 (1984) mandated the new testing program. New requirements became effective in 1985-86 school year.

¹⁷ Vermont Basic Competency Program requires students to master the basics before they complete eighth grade.

NOTE—Some States have dates for assessing the first high school graduating class but do not expect to use the results to determine whether students will graduate.

¹ Includes a relatively small amount from nongovernmental sources (gifts and tuition and transportation fees from patrons). These sources accounted for 0.4 percent of total revenues in 1967–68.

² Revised from previously published figures.

NOTE.—Beginning in 1980–81, revenues for State education agencies are excluded. Data for 1988–89 reflect new survey collection procedures and may not be entirely comparable to figures for earlier years. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems: Revenues and Expenditures for Public Elementary and Secondary Education*, and Common Core of Data survey. (This table was prepared January 1991.)

¹ Data revised from previously published figures.

² Data estimated by State education agencies.

³ U.S. total includes National Center for Education Statistics imputations for nonreporting States.

⁴ Estimated by the National Center for Education Statistics.

⁵ Includes an estimated \$144,942,000 for summer schools, adult education, and community colleges.

⁶ Actual count.

NOTE.—Beginning in 1980–81, expenditures for State administration are excluded. Some data have been revised from previously published figures. Because of rounding, details may not add to totals.

¹ Data for 1919–20 to 1953–54 are based on school-year enrollment.

² Based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school year basis.

³ Estimated.

⁴ Revised from previously published data.

NOTE—Beginning in 1980–81, two changes in definitions were made. State administration expenditures are excluded from both "total" and "current" expenditures, and "other programs" such as summer schools and community services are included in both

"total" and "current" expenditures. Beginning in 1988–89, extensive changes were made in the data collection procedures. Some data have been revised from previously published figures.

CHAPTER 3

Postsecondary Education

A salient characteristic of postsecondary education in this country is its diversity. American colleges and universities offer a wide range and great variety of programs. For example, a junior college usually offers vocational training or the first 2 years of training at the college level, but a university normally offers a full undergraduate course leading to a bachelor's degree as well as first-professional and graduate programs leading to advanced degrees. Vocational and technical institutions offer training programs which are designed to prepare students for specific careers. Other types of postsecondary education providers, such as community groups, churches, and businesses, offer learning opportunities to adults. Postsecondary institutions serve a wide scope of individual needs but pose many problems of coverage and definition for researchers.

In recent decades, postsecondary education has become more accessible to all segments of the population. The growth of public junior colleges and low-cost institutions means that the student costs of attendance can be held to a minimum. Federal student financial aid and other aid programs also have attracted many students who otherwise would have found it difficult to finance a college education.

The National Center for Education Statistics (NCES) has expanded postsecondary data collection through the Integrated Postsecondary Education Data System (IPEDS). IPEDS obtains data from each college and university on its enrollment; State residence of freshmen; staff; faculty and faculty salaries; degrees conferred; and finances, including revenues, expenditures, and property. This annual study provides a comprehensive overview of postsecondary education by instituting a survey system with a consistent set of definitions and survey forms for 2-year, 4-year and other types of postsecondary institutions. The Center gathers detailed characteristics about college and university faculty through the National Survey of Postsecondary Faculty. Additional data on the packaging of student loans and grants are collected through the National Postsecondary Student Aid Survey.

This chapter provides an overview of the latest statistics from the IPEDS surveys. To maintain comparability over time, most of the data in the *Digest* are for higher education institutions, which include only

2- and 4-year colleges. This chapter highlights historical data that enable the reader to observe long-range trends in American higher education. In addition, it presents summary data from the Bureau of the Census on the characteristics and the majors of college students; and from the Equal Employment Opportunity Commission on the race/ethnicity, academic rank, and sex of college faculty members.

Additional data on other postsecondary institutions from the survey, "Participation in Adult Education," compare adult learning activities by demographic characteristics of participants. Data on price indexes and on the number of degrees held by the general population are in chapter 1. Chapter 4 contains tabulations on Federal funding for postsecondary education. Information on employment outcomes for college graduates is in chapter 5. Chapter 7 contains data on college libraries and use of computers by young adults. Further information on survey methodologies is in the "Guide to Sources" in the appendix and in the publications cited in the source notes.

Highlights

- Higher education enrollment increased 41 percent between 1970 and 1980. Since 1980, enrollments have risen more slowly. Between 1980 and 1989, enrollment increased about 11 percent, from 12.1 million to a record 13.5 million. Much of this growth was in part-time enrollment. Between 1980 and 1989, the number of men enrolled rose only 5 percent, while the number of women increased by 17 percent. (Table 161)
- The number of older students has been growing more rapidly than the number of younger students. Between 1980 and 1990, the enrollment of students under age 25 increased by 7 percent. During the same period, enrollment of persons 25 and over rose by 34 percent. From 1990 to 1997, the NCES projects a rise of 16 percent in enrollments of persons over 25, and an increase of only 5 percent in the number under 25. (Table 163)
- Some differing enrollment trends are seen at the undergraduate, graduate, and first-professional levels. Undergraduate enrollment increased rapidly during the 1970s, but fell between 1983 and 1985. Between 1985 and 1989, undergraduate enroll-

ment rose about 10 percent. Graduate enrollment had been steady at about 1.3 million in the late 1970s and early 1980s, but rose about 10 percent between 1985 and 1989. Enrollment in first-professional programs has shown small fluctuations, dropping by less than 2 percent between 1984 and 1989. (Tables 175, 176, and 177)

- Since 1984, the number of women in graduate schools has exceeded the number of men. Between 1983 and 1989, the number of male full-time graduate students increased by 8 percent compared with 25 percent for full-time women. Among part-time graduate students, men increased by only 3 percent compared with 21 percent for women. (Table 176)
- The proportion of college students who were minorities rose between 1978 and 1988. In 1978, 16.3 percent were minorities compared with 18.9 percent in 1988. Much of the change can be attributed to sharply rising numbers of Hispanic and Asian students. However, the proportion of students who were black fell from 9.6 percent in 1978 to 8.9 percent in 1988. The drop in the proportion of black students reflected the declining enrollments of black males and the relatively slow increase in enrollments of black women. (Table 195)
- Despite the sizable numbers of small colleges, most students attend the larger colleges. In fall 1989, 38 percent of higher education institutions had fewer than 1,000 students; yet altogether, these institutions enrolled only 4 percent of college students. On the other hand, though only 11 percent of the colleges enrolled over 10,000 students each, they accounted for 51 percent of total college enrollment. (Table 203)
- The student/staff ratio at colleges and universities dropped from 5.4 in 1976 to 4.8 in 1987. The proportion of staff who were administrative and other nonteaching professional staff rose from 15.0 percent in 1976 to 20.7 percent in 1987, while the proportion of staff identified as nonprofessional declined from 42.4 percent to 38.5 percent. (Table 208)
- Approximately 2.3 million persons were employed in colleges and universities in the fall of 1987, including 1.4 million professional and .9 million nonprofessional staff. About 41 percent of the staff were teachers or teaching assistants, 21 percent were other nonteaching professionals, 19 percent were clerical or secretarial, and the remaining 20 percent were technical, paraprofessional, skilled crafts, service, and maintenance staff. (Table 209)
- Colleges differ widely in their practices of employing part-time and full-time staff. Only 56 percent of the employees at public 2-year colleges were employed full-time compared with 76 percent at public and private 4-year colleges. More of the faculty at public 4-year colleges were employed full-time (80 percent) than at private 4-year colleges (67 percent) or public 2-year colleges (46 percent). (Table 210)
- About 10 percent of full-time faculty in colleges and universities were minorities in 1987-88. Four percent of the faculty were Asian/Pacific Islanders, 3 percent were black, 2 percent were Hispanic, 1 percent was American Indian. (Table 214)
- College faculty generally suffered losses in the purchasing power of their salaries from 1972-73 to 1980-81, when average salaries fell 17 percent after adjustment for inflation. However, between 1980-81 and 1989-90, the average salaries rose by 17 percent, recouping most of the losses. Average salaries for men in 1989-90 (\$42,629) were considerably higher than the average for women (\$33,936) and have increased at a faster rate since 1980-81. (Table 218)
- The proportion of faculty with tenure has remained relatively stable in recent years. About 64 percent of full-time faculty had tenure in 1989-90, but a large difference existed between the proportion of men and women with tenure. Seventy percent of men compared with 48 percent of women had tenure in 1989-90. About 66 percent of the faculty at public institutions had tenure compared with 57 percent of faculty at private institutions. (Table 223)
- During the 1989-90 academic year, 10,606 institutions offered postsecondary education. This included 2,127 4-year colleges; 1,408 2-year colleges; and 7,071 vocational and technical institutions. (Tables 226 and 335)
- The total number of bachelor's degrees increased slowly in the 10-year period between 1978-79 and 1988-89, but there were notable shifts for men and women. Between 1978-79 and 1988-89, the number of bachelor's degrees awarded to men increased by 1 percent, while the number of degrees awarded to women rose by 20 percent. (Table 228)
- Between 1978-79 and 1988-89, the number of associate, bachelor's, master's, and doctor's degrees rose. Associate degrees increased by 8 percent, bachelor's increased by 10 percent, master's degrees increased by 3 percent, and doctor's degrees increased by 9 percent during this period. Although the number of first-professional degrees rose by 3 percent over the entire 1978-79 to

1988–89 period, they declined in the last years of the time period. (Table 228)

- Of the 1,017,667 bachelor's degrees conferred in 1988–89, the largest numbers of degrees were conferred in the fields of business and management (246,659), social sciences (107,714), education (96,998), engineering and engineering technology (85,273), and health professions (59,111). At the master's degree level, the largest fields were education (82,238) and business and management (73,154). The largest fields at the doctor's degree level were education (6,783), engineering and engineering technology (4,533), physical sciences (3,852), and life sciences (3,533). (Tables 235, 236, and 237)
- The pattern of bachelor's degrees by field of study has shifted significantly in recent years. The pace of growth in such areas as business and management has subsided and declines are significant in male majority fields such as engineering and computer and information sciences. The number of degrees conferred in business and management rose by 34 percent between 1978–79 and 1983–84, but by only 7 percent during the following 5-year period. Engineering and engineering technologies rose 51 percent between 1978–79 and 1983–84 but declined 10 percent between 1983–84 and 1988–89. Computer and information sciences had been showing spectacular growth, but dropped 27 percent between 1985–86 and 1988–89. In contrast, some fields such as social sciences and letters that had been declining began to increase. For example, the number of degrees conferred in social sciences dropped by 14 percent between 1978–79 and 1983–84, but rose 16 percent over the next 5 years. Letters declined by 2 percent between 1978–79 and 1983–84, but increased by 28 percent between 1983–84 and 1988–89. Psychology fell by 6 percent during the first 5-year period and rose by 22 percent between 1983–84 and 1988–89. In 1987–88, the number of degrees conferred in education rose for the first time since 1972–73. To some extent, these shifts during the 1983–84 and 1988–89 period highlight the increased female majority on college campuses by reflecting significant increases in predominantly female fields and decreases in predominantly male fields. (Tables 235, 254, 256, 257, 258, 269, and 271)
- Only about half of the students who enrolled full-time in a 4-year college in 1980 graduated with a bachelor's degree by 1986, according to a recent High School and Beyond survey. About 55 percent of the students who enrolled in private 4-year colleges earned a bachelor's or higher degree by 1986 compared with 46 percent in public 4-year colleges. (Table 287)
- For the 1989–90 academic year, annual undergraduate charges for tuition, room, and board are estimated at \$4,520 at public colleges and \$12,057 at private colleges. Between 1979–80 and 1989–90, charges at public colleges have risen by 109 percent and charges at private colleges by 145 percent. These increases substantially surpassed the rise in the Consumer Price Index, which was about 64 percent during the same 10-year period. (Table 292)
- Trend data show some increases in the expenditures per student of institutions of higher education. After adjustment for inflation at colleges and universities, current-fund expenditures per student rose about 17 percent between 1977–78 and 1987–88. Expenditures increased more quickly at private institutions (23 percent) than at public institutions (13 percent). (Table 310)
- Administrative expenditures (institutional support and academic support, less libraries) have been rising more rapidly than most other types of college expenditures. At public universities, between 1980–81 and 1987–88, inflation adjusted administration expenditures per full-time-equivalent student rose 24 percent compared with 11 percent for instruction expenditures per student. At private universities during the same period, the per student administrative costs rose 40 percent, and the instruction costs rose by 27 percent. (Tables 316 and 319)
- Endowments of colleges and universities have risen rapidly in recent years. Between 1980–81 and 1985–86, the market value of endowments rose by 114 percent, from \$23.5 billion to \$50.3 billion. (Table 326)

¹ Prior to 1979–80, excludes branch campuses.² Total number of different individuals (not reduced to full-time equivalent). Beginning in 1959–60, data are for the first term of the academic year. Beginning in 1969–70, data include only instructional faculty with the rank of instructor or above.³ Estimated.⁴ Estimated number of senior instructional staff. Excludes graduate assistants.⁵ Because of revised survey procedures, data may not be directly comparable with figures for earlier years.⁶ Data for 1869–70 to 1949–50 are for resident degree credit students who enrolled at any time during the academic year.⁷ From 1869–70 to 1959–60, first professional degrees included under bachelor's degrees.⁸ Figures for years prior to 1969–70 are not precisely comparable with later data.⁹ Preliminary data.¹⁰ Includes unexpended plant funds.¹¹ Book value. Includes other nonexpendable funds.¹² Endowment funds only.

—Data not available.

NOTE—Some data have been revised from previously published figures.

¹ Data for 2-year branch campuses of 4-year institutions are included with the 4-year institutions.² Large increases are due to the addition of schools accredited by the National Association of Trade and Technical Schools in 1980 and 1981.³ Because of imputation techniques, data are not consistent with figures for other years.⁴ Revised from previously published figures.⁵ Preliminary data.

—Data not available

¹Excludes first-time freshmen in occupational programs not creditable towards a bachelor's degree.²Data for 2-year branches of 4-year college systems are aggregated with the 4-year institutions.³Because of imputation techniques, data are not consistent with figures for other years.⁴Data have been revised from previously published figures.⁵Preliminary data.

—Data not available.

NOTE—Alaska and Hawaii are included in all years. Because of rounding, details may not add to totals.

¹ Enrollment in college as of October of each year for individuals age 16 to 24 who graduated from high school during the preceding 12 months.² Includes persons of Hispanic origin.³ Due to the small sample size, data are subject to relatively large sampling errors.

— Data not available.

NOTE.—Data are based upon sample surveys of the civilian population. High school graduate data in this table differ from figures appearing in other tables because of varying survey procedures and coverage.

SOURCE: American College Testing Program, unpublished tabulations, 1987, derived from statistics collected by the U.S. Bureau of the Census, and U.S. Department of Labor, unpublished tabulations. (This table was prepared February 1991.)

¹ Enrollment in college as of October of each year for individuals age 16 to 24 who graduated from high school during the preceding 12 months.

SOURCE: American College Testing Program, unpublished tabulations, 1987, derived from statistics collected by the U.S. Bureau of the Census, and U.S. Department of Labor, unpublished data. (This table was prepared February 1991.)

NOTE.—Data are based upon sample surveys of the civilian population. High school graduate data in this table differ from figures appearing in other tables because of varying survey procedures and coverage.

Table 173.—Graduation, college preparation, and college application rates of 12th graders, by selected school characteristics: 1987–88

Selected school characteristics	Public schools				Private schools			
	Number of schools with 12th graders	1987 graduation rate of fall 1986 12th graders	Percent of 12th graders in college preparatory courses, 1987–88	Average college application rate of 12th graders	Number of schools with 12th graders	1987 graduation rate of fall 1986 12th graders	Percent of 12th graders in college preparatory courses, 1987–88	Average college application rate of 12th graders

¹ Some data have been revised from previously published figures.² Preliminary data.³ Because of imputation techniques, data are not consistent with figures for other years.⁴ Part of the 1987 increase is due to the inclusion of additional public 2-year institutions in the survey.⁵ Less than .05 percent.

—Data not reported or not applicable

1989 ⁵	9,733,727	6,803,495	2,930,232	7,336,939	4,619,374	2,717,565	2,396,788	2,184,121	212,667

¹Data for 2-year branch campuses of 4-year systems are included with the 4-year institutions.

²Large increases are due to the addition of schools accredited by the National Association of Trade and Technical Schools in 1980 and 1981.

³Because of imputation techniques, data are not consistent with figures for other years.

⁴Data have been revised from previously published figures.

⁵Preliminary data.

NOTE—Because of a revision in data compilation procedures, figures for 1986 to 1989 are not directly comparable with data for earlier years.

State unknown ⁶	—	130,193	—	—	—	130,193	—	-130,193

¹ Includes students who are enrolled at the reporting institution for the first time at the undergraduate level.² Students enrolled in State are all of the new students reported by the institutions in that State, i.e., all immigrants and "remaining" students.³ Student residents of State are all students from a State in which they were residing when first admitted to an institution in any State at the current student level.⁴ Students remaining in State are students who attend institutions in their home State.⁵ Net migration is overestimated because students who are not identified by State are not counted as out migrants from their appropriate States.⁶ Students are reported in "State unknown" when an institution is unable to determine the student's home State.

—Not applicable.

NOTE.—Data for U.S. Service Schools are included in State totals. Excludes students from foreign countries and the outlying areas.

State unknown ⁶	—	1,637	—	—	—	1,637	—	-1,637

¹ Freshmen students who are enrolled at the reporting institution for the first time.² Students enrolled in State are all of the new students reported by the institutions in that State, i.e., all immigrants and "remaining" students.³ Student residents of State are all students from a State in which they were residing when first admitted to an institution in any State at the current student level.⁴ Students remaining in State are students who attend institutions in their home State.⁵ Net migration is overestimated because students who are not identified by State are not counted as out migrants from their appropriate States.⁶ Students are reported in "State unknown" when an institution is unable to determine the student's home State.

—Not applicable.

NOTE.—Data for U.S. Service Schools are included in State totals. Excludes students from foreign countries and the outlying areas.

¹ Disabled students are those who reported that they had one or more of the following conditions: a specific learning disability, a visual handicap, hard of hearing, deafness, a speech disability, an orthopedic handicap, or a health impairment.

² Includes students who majored in life sciences, physical sciences, mathematics, or computer sciences.

³ Includes chiropractic medicine, dentistry, optometry, osteopathic medicine, pharmacy, podiatry, and veterinary medicine.

NOTE.—Because of rounding, details may not add to totals.

¹ Totals differ from those shown in other tables. This table presents data collected in sample surveys of households rather than surveys of institutions. Excludes persons age 35 and over.

² Data for 1981 and later years are controlled to 1980 census base.

³ Data for 1965 and 1970 include persons of Hispanic origin.

—Data not available.

NOTE.—Data are based upon sample surveys of the civilian noninstitutional population. Because of rounding, details may not add to totals.

¹ Includes estimated data for master's degree-granting institutions, which were surveyed on a sample basis from 1984 through 1987.

NOTE.—Figures have been revised from previously published data. Because of rounding, details may not add to totals.

¹ These preliminary data represent the institutions and enrollments reported in the "Fall Enrollment" survey.

² Because some institutions do not report enrollment data, counts of institutions in this table are somewhat lower than figures appearing in other tables.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment, 1989" survey. (This table was prepared January 1991.)

Table 204.—Selected statistics for college and university campuses enrolling more than 14,600 students in 1989

¹ College and university campuses ranked in fall 1989. Data are preliminary.² Publicly controlled institutions are identified by a "1". Privately controlled, by a "2".³ The types of institutions are identified as follows: 1, 4-year institutions; 2, 2-year institutions.

NOTE—Institutions which did not report or which did report enrollment data for branch campuses were excluded from this tabulation.

¹ Includes faculty members with the title of professor, associate professor, assistant professor, instructor, lecturer, assisting professor, adjunct professor, or interim professor (or the equivalent). Excluded are graduate students with titles such as graduate or teaching fellow who assist senior faculty.

² Estimated on the basis of enrollment.

³ Because of revised survey methods, data are not directly comparable to figures for other years.

⁴ Estimated.

—Data not available.

NOTE.—Data exclude faculty employed by system offices. Some data have been revised from previously published figures. For methodological details on estimates, see *Projections of Education Statistics to 2000*. Because of rounding, details may not add to totals.

¹ Data adjusted, using the Consumer Price Index prepared by the Bureau of Labor Statistics, averaged on an academic year time frame.

NOTE.—Data for 1972-73, 1975-76, 1987-88, and 1989-90 are for faculty on 9- to 10-month contracts; data for 1979-80 to 1985-86 are for faculty on 9-month contracts. Data for 1987-88 and 1989-90 include imputations for nonrespondent institutions.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Faculty Salaries, Tenure, and Benefits*; and Integrated Postsecondary Education Data System (IPEDS), "Salaries, Tenure, and Fringe Benefits of Full-Time Instructional Faculty" surveys. (This table was prepared February 1991.)

Table 219.—Average salary of full-time instructional faculty on 9-month contracts in institutions of higher education, by academic rank and sex and by type and control of institution: 1980-81, 1985-86, 1987-88, and 1989-90

¹ Large increases are due to the addition of schools accredited by the National Association of Trade and Technical Schools in 1980 and 1981.

² Because of revised survey procedures, data are not entirely comparable with figures prior to 1986–87. The number of branch campuses reporting separately has increased.

¹ Excludes Federated States of Micronesia.

NOTE.—Because of revised survey procedures, data are not entirely comparable with figures for earlier years. The number of branch campuses reporting separately has increased.

¹ Revised from previously published data.

² Preliminary data.

NOTE.—Beginning in 1982–83, the taxonomy used to collect data on earned degrees by major field of study was revised. The figures for earlier years have been reclassified when necessary to make them conform to the new taxonomy. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS "Completions" survey. "Agriculture and natural resources" includes Agribusiness and agriculture production, Agricultural sciences, and Renewable natural resources; "Business and management" includes Business and management, Business and office, Marketing and distribution, and Consumer and personal services; "Engineering and related

technologies" includes Engineering and related technologies, Mechanics and repairers, and Construction trades; "Physical sciences" includes Physical sciences and Science technologies; "Public affairs" includes Public affairs, and Transportation and material moving; "Visual and performing arts" includes Visual and performing arts and Precision production.

¹ Revised from previously published data.

² Preliminary data.

NOTE.—Beginning in 1982–83, the taxonomy used to collect data on earned degrees by major field of study was revised. The figures for earlier years have been reclassified when necessary to make them conform to the new taxonomy. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS "Completions" survey: "Agriculture and natural resources" includes Agribusiness and agriculture production, Agricultural sciences, and Renewable natural resources; "Business and management" includes Business and management, Business and office, Marketing and distribution, and Consumer and personal services; "Engineering and related

technologies" includes Engineering and related technologies, Mechanics and repairers, and Construction trades; "Physical sciences" includes Physical sciences and Science technologies; "Public affairs" includes Public affairs, and Transportation and material moving; "Visual and performing arts" includes Visual and performing arts and Precision production.

¹ Preliminary data.

NOTE.—To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS Completions survey. Agriculture and natural resources includes Agribusiness and agriculture production. Agricultural sciences, and Renewable natural resources. Business and management includes Business and management, Business and office, Marketing and distribution, and Consumer and personal services. Engineering and related technologies includes Engineering and related tech-

nologies. Mechanics and repairers, and Construction trades. Physical sciences includes Physical sciences and Science technologies. Public affairs includes Public affairs and Transportation and material moving, and Visual and performing arts includes Visual and performing arts and Precision production.

¹ Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. Excludes 2,497 men and 2,767 women whose racial/ethnic group and field of study were not available.

NOTE.—To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS "Completions" survey. "Agriculture and natural resources" includes Agribusiness and agriculture production, Agricultural sciences, and Renewable natural resources. "Business and management" includes Business and management, Business and office, Marketing and distribution, and Consumer and personal

services. "Engineering and related technologies" includes Engineering and related technologies, Mechanics and repairs, and Construction trades. "Physical sciences" includes Physical sciences and Science technologies. "Public affairs" includes Public affairs and Transportation and material moving, and "Visual and performing arts" includes Visual and performing arts and Precision production.

* Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. Excludes 496 men and 394 women whose racial/ethnic group and field of study were not available.

NOTE.—To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS "Completions" survey. "Agriculture and natural resources" includes Agribusiness and agriculture production, Agricultural sciences, and Renewable natural resources; "Business and management" includes Business and management, Business and office, Marketing and distribution, and Consumer and personal

services. "Engineering and related technologies" includes Engineering and related technologies, Mechanics and repairers, and Construction trades. "Physical sciences" includes Physical sciences and Science technologies. "Public affairs" includes Public affairs and Transportation and material moving, and "Visual and performing arts" includes Visual and performing arts and Precision production.

¹ Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. Excludes 54 men and 13 women whose racial/ethnic group and field of study were not available.

NOTE.—To facilitate trend comparison, certain aggregations have been made of the degree fields as reported in the IPEDS "Completions" survey. "Agriculture, and natural resources" includes Agribusiness and agriculture production, Agricultural sciences, and Renewable natural resources. "Business and management" includes Business and management, Business and office, Marketing and distribution, and Consumer and personal

services. "Engineering and related technologies" includes Engineering and related technologies, Mechanics and repairers, and Construction trades. "Physical sciences" includes Physical sciences and Science technologies. "Public affairs" includes Public affairs and Transportation and material moving, and "Visual and performing arts" includes Visual and performing arts and Precision production.

¹ Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Excludes first professional degrees, such as M.D., D.D.S., and D.V.M.

² Includes 2,952 individuals who did not report their citizenship at time of doctorate.

³ Includes mathematics, computer science, physics and astronomy, chemistry, and earth, atmospheric, and marine science.

NOTE.—The above classification of degrees by field differs somewhat from that in most publications of the National Center for Education Statistics (NCES). The major differences are that history is included under humanities rather than social sciences and

that psychology is included under social sciences. The number of degrees also differs slightly from that reported in the NCES "Degrees and Other Formal Awards Conferred" survey. The above tabulation excludes some non-research doctorate degrees, such as doctor's degrees in theology. Because of rounding, percents may not add to 100.0.

²Hispanic categories totaled 1.9 percent in 1978-79.

NOTE.—The National Research Council's classification of degrees by field differs somewhat from that in most publications of the National Center for Education Statistics (NCES). The number of degrees also differs slightly from that reported in the NCES 'Degrees and Other Formal Awards Conferred' survey. Because of rounding, percents may not add to 100.0.

social sciences and that psychology is included under social sciences. The number of degrees also differs slightly from that reported in the NCES 'Degrees and Other Formal Awards Conferred' survey. Because of rounding, percents may not add to 100.0.

¹ Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Excludes first professional degrees (e.g., M.D., D.D.S., and D.V.M.).

² Institutions are ranked by the total number of doctor's degrees conferred during the designated 10-year period.

³ Some data have been revised from previously published figures.

⁴ Preliminary data.

⁵ Includes degrees conferred by the Main Division and Teachers College.

⁶ Includes degrees conferred by the Endowed and Statutory Colleges.

—Not applicable.

¹ Seniors who dropped out of high school after spring 1980 survey and had not completed high school by 1986.

² Persons who earned a certificate for completing a program of study.

³ Less than .05 percent.

⁴ Socioeconomic status was measured by a composite score on parental education, family income, father's occupation, and household characteristics in 1980.

⁵ Students' self-reported high school program.

⁶ During their senior year of high school, students were asked about the highest level of education they planned to attain. Students who planned to get less than a high school

education or a high school education only were classified as having no postsecondary education plans.

NOTE—Because of rounding, percents may not add to 100.0.

¹ Data for 1986-87 through 1989-90 reflect 20 meals per week rather than meals 7 days per week.

² Room and board data are estimated.

³ Because of revisions in data collection procedures, figures are not entirely comparable with those for previous years. In particular, data on board rates are somewhat higher than earlier years because they reflect a basis of 20 meals per week, rather than meals 7 days per week. Since many institutions serve fewer than 3 meals each day, the 1986-87 through 1989-90 data reflect a more accurate accounting of total board costs. Because of their low response rate, data for private 2 year colleges must be interpreted with caution.

⁴ Preliminary data based on 1988 enrollment data.

NOTE.—Data are for the entire academic year and are average charges paid by students. Tuition and fees were weighted by the number of full-time equivalent undergraduates but are not adjusted to reflect student residency. Room and board were based on full-time students. The data have not been adjusted for changes in the purchasing power of the dollar. Some data have been revised from previously published figures. Because of rounding, details may not add to totals.

¹ Preliminary data based on fall 1988 enrollment weights.

—Data not reported or not applicable.

NOTE.—Data are for the entire academic year and are average charges. Tuition and fees were weighted by the number of full-time equivalent undergraduates but are not adjusted to reflect student residency. Room and board are based on full-time students.

¹ Numbers of undergraduates may not equal figures reported in other tables, since these data are based on a sample survey.

² Includes students who reported they were awarded aid, but did not specify the source or type of aid.

³ Includes students who were single, separated, divorced, or widowed.

⁴ Excludes persons whose attendance status was not reported.

⁵ Enrollment data include persons whose attendance status was not reported.

—Data not available

NOTE —Because of rounding and/or the fact that some students receive aid from multiple sources, details may not add to totals. Data have been revised from previously published figures.

¹ Preliminary data.

NOTE.—Pell Grants which are spent on campus for tuition, room, board or other college expenses are included in current fund revenue. Because of rounding, details may not add to totals.

Wisconsin	23,011	24,655	27,816	30,622	34,653	35,842	38,072	42,102	83.0
Wyoming	204	204	204	204	240	212	241	⁴ 241	18.1

¹ In 1987–88, 1988–89, 1989–90, and 1990–91, need-based aid comprised 81.0, 78.2, 76.8, and 77.4 percent of all aid, respectively, compared with non-need-based aid or other types of aid.

² Estimated.

³ Changes may reflect introduction of new programs or discontinuation of existing programs.

⁴ Data are estimated based on prior year's report.

¹ Preliminary data.

² Tuition and fees received from veterans under Public Law 550 are reported under student fees and not under income from the Federal Government.

³ Federally supported student aid that is received through students is included under tuition and auxiliary enterprises.

⁴ Income from the Federal Government for research at agricultural experiment stations administered by land grant institutions is included under Federal Government "other purposes," not under "research." Beginning in 1969–70, data include independent operations (Federally Funded Research and Development Centers).

⁵ Includes Federal aid received through State channels and regional compacts, through 1959–60.

⁶ Income from State and local governments tabulated under "State governments."

⁷ Beginning in 1969–70, the private grants represent nongovernmental revenue for sponsored research, student aid, and other sponsored programs.

⁸ Specifically designated or earmarked funds.

⁹ From 1939–40 to 1959–60, data for hospitals are included under sales and services of educational activities.

¹⁰ Does not include interfund transfers.

¹¹ Includes funds functioning as endowment, increase calculated on book value.

—Data not available.

NOTE.—Data for years prior to 1969–70 are not entirely comparable with data for later years. Also, some details for 1969–70 through 1973–74 are not directly comparable with data for later years. Details for 1959–60 and 1969–70 have been revised from previously published figures. Because of rounding, details may not add to totals.

SOURCE.—U.S. Department of Education, National Center for Education Statistics, "Financial Statistics of Institutions of Higher Education" surveys. (This table was prepared April 1991.)

Table 306.—Current-fund revenue for public institutions of higher education, by State:
1974-75 to 1987-88

¹ Excludes institutions which have not reported data for 1985–86 or 1986–87 or have submitted system-wide reports. Institutions which appeared in the 1985–86 listing, but have been excluded for 1986–87 for these reasons are: State University of New York at Stony Brook, Main Campus; U.S. Army Command and General Staff College (Kans.); Duke University (N.C.); New Mexico State University, Main Campus; Pennsylvania State University, Main Campus; Ohio State University, Main Campus; Yale University (Conn.). Federal current fund revenue includes Federal appropriations, unrestricted and restricted Federal contracts and grants, and revenue for independent operations. Independent operations generally include only the revenues associated with major federally funded re-

search and development centers. Excludes Pell Grants. Federally supported student aid that is received through students is excluded.

² NCES estimate based on 1985–86 data.

¹ Includes institutional and academic support less libraries.

NOTE.—Data in this table may differ slightly from data appearing in other tables. Data for 1976-77 through 1985-86 include only institutions which provided both enrollment and finance data. The Higher Education Price Index was used to convert the per student figures to constant dollars. Because of rounding, details may not add to totals.

¹ Excludes universities. See preceding table.² Includes institutional and academic support less libraries.

NOTE.—Data in this table may differ slightly from data appearing in other tables. Data for 1976-77 through 1985-86 include institutions which provided both enrollment and fi-

nance data. The Higher Education Price Index was used to convert the per student figures to constant dollars. Because of rounding, details may not add to totals.

¹Excludes universities. See preceding table.

²Includes institutional and academic support less libraries.

NOTE.—Data in this table may differ slightly from data appearing in other tables. Data for 1976-77 through 1985-86 include only institutions which provided both enrollment

and finance data. The Higher Education Price Index was used to convert the per student figures to constant dollars. Because of rounding, details may not add to totals.

¹ The total number of adult education courses taken between May 1983 and May 1984 was 43,192,000. However, only 40,752,000 course descriptions were obtained through the survey, which asked for information on up to 4 courses (the most recent courses if more than 4 courses were taken during the year). Five percent of participants took more than 4 courses during the year.

² Includes part-time undergraduate and graduate students who indicated they were also adult education participants.

NOTE.—Because of rounding, details may not add to totals.

CHAPTER 4

Federal Programs for Education and Related Activities

This chapter provides a summary of Federal funds for education to help describe the magnitude of the Federal fiscal effort and give some indication of the scope and variety of the education programs. Data in this chapter reflect outlays and obligations of Federal agencies. These tabulations differ from Federal receipts reported in other chapters because of numerous variations in the data collection systems. Federal appropriations are not necessarily spent by recipient institutions in the same year they are appropriated. In some cases, institutions cannot identify the source of Federal revenues because they flow through State agencies. Some types of revenues, such as tuition and fees, are reported as revenues from students even though they may be supported by Federal student aid programs. Some institutions that receive Federal education funds are not included in regular surveys conducted by the National Center for Education Statistics. Thus, the revenue data tabulated in this chapter are not comparable with figures reported in other chapters. Readers should be careful about comparing data on obligations shown on some tables with data on outlays appearing on others.

A capsule view of the history of Federal education activities is provided in the following list of selected legislation:

- 1787** *Northwest Ordinance* authorized land grants for the establishment of educational institutions.
- 1802** *An Act Fixing the Military Peace Establishment of the United States* established the U.S. Military Academy. (The U.S. Naval Academy was established in 1845 by the Secretary of the Navy.)
- 1862** *First Morrill Act* authorized public land grants to the States for the establishment and maintenance of agricultural and mechanical colleges.
- 1867** *Department of Education Act* authorized the establishment of the Department of Education.*
- 1876** *Appropriation Act, Department of the Treasury* established the U.S. Coast Guard Academy.
- 1890** *Second Morrill Act* provided for money grants for support of instruction in the agricultural and mechanical colleges.
- 1911** *State Marine School Act* authorized Federal funds to be used for the benefit of any nautical school in any of 11 specified State sea-port cities.
- 1917** *Smith-Hughes Act* provided for grants to States for support of vocational education.
- 1918** *Vocational Rehabilitation Act* provided for grants for rehabilitation through training of World War I veterans.
- 1919** *An Act to Provide for Further Educational Facilities* authorized the sale by the Federal Government of surplus machine tools to educational institutions at 15 percent of acquisition cost.
- 1920** *Smith-Bankhead Act* authorized grants to States for vocational rehabilitation programs.
- 1935** *Bankhead-Jones Act* (Public Law 74-182) authorized grants to States for agricultural experiment stations.
- Agricultural Adjustment Act* (Public Law 74-320) authorized 30 percent of the annual customs receipts to be used to encourage the exportation and domestic consumption of agricultural commodities. Commodities purchased under this authorization began to be used in school lunch programs in 1936. The National School Lunch Act of 1946 continued and expanded this assistance.
- 1936** *An Act to Further the Development and Maintenance of an Adequate and Well-balanced American Merchant Marine* (Public Law 84-415) established the U.S. Merchant Marine Academy.
- 1937** *National Cancer Institute Act* established the Public Health Service fellowship program.
- 1941** *Amendment to Lanham Act of 1940* authorized Federal aid for construction, maintenance,

* The Department of Education as established in 1867 was later known as the Office of Education. In 1980, under P.L. 96-88, it became a cabinet-level department. Therefore, for purposes of consistency, it is referred to as the "Department of Education" even in those tables covering years when it was officially the Office of Education.

and operation of schools in federally impacted areas. Such assistance was continued under Public Law 815 and Public Law 874, 81st Congress, in 1950.

- 1943** *Vocational Rehabilitation Act* (Public Law 78-16) provided assistance to disabled veterans.

School Lunch Indemnity Plan (Public Law 78-129) provided funds for local lunch food purchases.

- 1944** *Servicemen's Readjustment Act* (Public Law 78-346) provided assistance for the education of veterans.

Surplus Property Act (Public Law 78-457) authorized transfer of surplus property to educational institutions.

- 1946** *National School Lunch Act* (Public Law 79-396) authorized assistance through grants-in-aid and other means to States to assist in providing adequate foods and facilities for the establishment, maintenance, operation, and expansion of nonprofit school lunch programs.

George-Barden Act (Public Law 80-402) expanded Federal support of vocational education.

- 1948** *United States Information and Educational Exchange Act* (Public Law 80-402) provided for the interchange of persons, knowledge, and skills between the United States and other countries.

- 1949** *Federal Property and Administrative Services Act* (Public Law 81-152) provided for donation of surplus property to educational institutions and for other public purposes.

- 1950** *Financial Assistance for Local Educational Agencies Affected by Federal Activities* (Public Law 81-815 and P.L. 81-874) provided assistance for construction (Public Law 815) and operation (Public Law 874) of schools in federally affected areas.

Housing Act (Public Law 81-475) authorized loans for construction of college housing facilities.

- 1954** *An Act for the Establishment of the United States Air Force Academy and Other Purposes* (Public Law 83-325) established the U.S. Air Force Academy.

Cooperative Research Act (Public Law 83-531) authorized cooperative arrangements with universities, colleges, and State education agencies for educational research.

National Advisory Committee on Education Act (Public Law 83-532) established a National Advisory Committee on Education to recommend needed studies of national concern in the field of education and to propose appropriate action indicated by such studies.

School Milk Program Act (Public Law 83-597) provided funds for purchase of milk for school lunch programs.

- 1956** *Library Services Act* (Public Law 84-911) provided grants to States for extension and improvement of rural public library services.

- 1957** *Practical Nurse Training Act* (Public Law 84-911) provided grants to States for practical nurse training.

- 1958** *National Defense Education Act* (Public Law 85-865) provided assistance to State and local school systems for strengthening instruction in science, mathematics, modern foreign languages, and other critical subjects; improvement of State statistical services; guidance, counseling, and testing services and training institutes; higher education student loans and fellowships; foreign language study and training provided by colleges and universities; experimentation and dissemination of information on more effective utilization of television, motion pictures, and related media for educational purposes; and vocational education for technical occupations necessary to the national defense.

Education of Mentally Retarded Children Act (Public Law 85-926) authorized Federal assistance for training teachers of the handicapped.

Captioned Films for the Deaf Act (Public Law 85-905) authorized a loan service of captioned films for the deaf.

- 1961** *Area Redevelopment Act* (Public Law 87-27) included provisions for training or retraining of persons in redevelopment areas.

- 1962** *Manpower Development and Training Act* (Public Law 87-415) provided training in new and improved skills for the unemployed and underemployed.

Communications Act of 1934, Amendment (Public Law 87-447) provided grants for the construction of educational television broadcasting facilities.

Migration and Refugee Assistance Act of 1962 (Public Law 87-510) authorized loans, advances, and grants for education and training of refugees.

- 1963 *Health Professions Educational Assistance Act*** (Public Law 88-129) provided funds to expand teaching facilities and for loans to students in the health professions.

Vocational Education Act of 1963 (Public Law 88-210) increased Federal support of vocational education schools; vocational work-study programs; and research, training, and demonstrations in vocational education.

Higher Education Facilities Act of 1963 (Public Law 88-204) authorized grants and loans for classrooms, libraries, and laboratories in public community colleges and technical institutes, as well as undergraduate and graduate facilities in other institutions of higher education.

- 1964 *Civil Rights Act of 1964*** (Public Law 88-352) authorized the Commissioner of Education to arrange for support for institutions of higher education and school districts to provide in-service programs for assisting instructional staff in dealing with problems caused by desegregation.

Economic Opportunity Act of 1964 (Public Law 88-452) authorized grants for college work-study programs for students from low-income families; established a Job Corps program and authorized support for work-training programs to provide education and vocational training and work experience opportunities in welfare programs; authorized support of education and training activities and of community action programs, including Head Start, Follow Through, and Upward Bound; and authorized the establishment of Volunteers in Service to America (VISTA).

- 1965 *Elementary and Secondary Education Act*** (Public Law 89-10) authorized grants for elementary and secondary school programs for children of low-income families; school library resources, textbooks, and other instructional materials for school children; supplementary educational centers and services; strengthening State education agencies; and educational research and research training.

Health Professions Educational Assistance Amendments (Public Law 89-290) authorized scholarships to aid needy students in the health professions.

Higher Education Act of 1965 (Public Law 89-329) provided grants for university community service programs, college library assistance, library training and research, strengthening developing institutions, teacher training pro-

grams, and undergraduate instructional equipment. Authorized insured student loans, established a National Teacher Corps, and provided for graduate teacher-training fellowships.

Medical Library Assistance Act (Public Law 89-291) provided assistance for construction and improvement of health sciences libraries.

National Foundation on the Arts and the Humanities Act (Public Law 89-209) authorized grants and loans for projects in the creative and performing arts, and for research, training, and scholarly publications in the humanities.

National Technical Institute for the Deaf Act (Public Law 89-36) provided for the establishment, construction, equipping, and operation of a residential school for postsecondary education and technical training of the deaf.

National Vocational Student Loan Insurance Act (Public Law 89-287) encouraged State and nonprofit private institutions and organizations to establish adequate loan insurance programs to assist students to attend postsecondary business, trade, technical, and other vocational schools.

Disaster Relief Act (Public Law 89-313) provided for assistance to local education agencies to help meet exceptional costs resulting from a major disaster.

- 1966 *International Education Act*** (Public Law 89-698) provided grants to institutions of higher education for the establishment, strengthening, and operation of centers for research and training in international studies and the international aspects of other fields of study.

National Sea Grant College and Program Act (Public Law 89-688) authorized the establishment and operation of sea grant colleges and programs by initiating and supporting programs of education and research in the various fields relating to the development of marine resources.

Adult Education Act (Public Law 89-750) authorized grants to States for the encouragement and expansion of educational programs for adults, including training of teachers of adults and demonstrations in adult education (previously part of Economic Opportunity Act of 1964).

Model Secondary School for the Deaf Act (Public Law 89-694) authorized the establish-

ment and operation, by Gallaudet College, of a model secondary school for the deaf.

Elementary and Secondary Education Amendments of 1966 (Public Law 89-750) in addition to modifying existing programs, authorized grants to assist States in the initiation, expansion, and improvement of programs and projects for the education of handicapped children.

- 1967** *Education Professions Development Act* (Public Law 90-35) amended the Higher Education Act of 1965 for the purpose of improving the quality of teaching and to help meet critical shortages of adequately trained educational personnel.

Public Broadcasting Act of 1967 (Public Law 90-129) established a corporation for Public Broadcasting to assume major responsibility in channeling Federal funds to noncommercial radio and television stations, program production groups, and ETV networks; conduct research, demonstration, or training in matters related to noncommercial broadcasting; and award grants for construction of educational radio and television facilities.

- 1968** *Elementary and Secondary Education Amendments of 1967* (Public Law 90-247) modified existing programs, authorized support of regional centers for education of handicapped children, model centers and services for deaf-blind children, recruitment of personnel and dissemination of information on education of the handicapped; technical assistance in education to rural areas; support of dropout prevention projects; and support of bilingual education programs.

Handicapped Children's Early Education Assistance Act (Public Law 90-538) authorized preschool and early education programs for handicapped children.

Vocational Education Amendments of 1968 (Public Law 90-576) modified existing programs and provided for a National Advisory Council on Vocational Education, and collection and dissemination of information for programs administered by the Commissioner of Education.

Higher Education Amendments of 1968 (Public Law 90-575) authorized new programs to assist disadvantaged college students through special counseling and summer tutorial programs, and programs to assist colleges to combine resources of cooperative programs

and to expand programs which provide clinical experiences to law students.

- 1970** *Elementary and Secondary Education Assistance Programs, Extension* (Public Law 91-230) authorized comprehensive planning and evaluation grants to State and local education agencies; provided for the establishment of a National Commission on School Finance.

National Commission on Libraries and Information Services Act (Public Law 91-345) established a National Commission on Libraries and Information Science to effectively utilize the Nation's educational resources.

Office of Education Appropriation Act (Public Law 91-380) provided emergency school assistance to desegregating local education agencies.

Environmental Education Act (Public Law 91-516) established an Office of Environmental Education to develop curriculum and initiate and maintain environmental education programs at the elementary-secondary levels; disseminate information; provide training programs for teachers and other educational, public, community, labor, and industrial leaders and employees; provide community education programs; and distribute material dealing with environment and ecology.

Drug Abuse Education Act of 1970 (Public Law 91-527) provided for development, demonstration, and evaluation of curriculums on the problems of drug abuse.

- 1971** *Comprehensive Health Manpower Training Act of 1971* (Public Law 92-257) amended Title VII of the Public Health Service Act, increasing and expanding provisions for health manpower training and training facilities.

Nurse Training Act of 1971 (Public Law 92-158) amended Title VIII, Nurse Training, of the Public Health Service Act, increasing and expanding provisions for nurse training facilities.

- 1972** *Drug Abuse Office and Treatment Act of 1972* (Public Law 92-255) established a Special Action Office for Drug Abuse Prevention to provide overall planning and policy for all Federal drug-abuse prevention functions; a National Advisory Council for Drug Abuse Prevention; community assistance grants for community mental health center for treatment and rehabilitation of persons with drug-abuse problems, and, in December 1974, a National Institute on Drug Abuse.

Education Amendments of 1972 (Public Law 92-318) established the Education Division in the U.S. Department of Health, Education, and Welfare and the National Institute of Education; general aid for institutions of higher education; Federal matching grants for State student incentive grants; a National Commission on Financing Postsecondary Education; State Advisory Councils on Community Colleges; a Bureau of Occupational and Adult Education and State grants for the design, establishment, and conduct of postsecondary occupational education; and a bureau-level Office of Indian Education. Amended current Office of Education programs to increase their effectiveness and better meet special needs. Prohibited sex bias in admission to vocational, professional, and graduate schools, and public institutions of undergraduate higher education.

- 1973** *Older Americans Comprehensive Services Amendment of 1973* (Public Law 93-29) made available to older citizens comprehensive programs of health, education, and social services.

Comprehensive Employment and Training Act of 1973 (Public Law 93-203) provided for opportunities for employment and training to unemployed and underemployed persons. Extended and expanded provisions in the Manpower Development and Training Act of 1962, Title I of the Economic Opportunity Act of 1962, Title I of the Economic Opportunity Act of 1964, and the Emergency Employment Act of 1971 as in effect prior to June 30, 1973.

- 1974** *Educational Amendments of 1974* (Public Law 93-380) provided for the consolidation of certain programs; and established a National Center for Education Statistics.

Juvenile Justice and Delinquency Prevention Act of 1974 (Public Law 93-415) provided for technical assistance, staff training, centralized research, and resources to develop and implement programs to keep students in elementary and secondary schools; and established, in the Department of Justice, a National Institute for Juvenile Justice and Delinquency Prevention.

- 1975** *Indian Self-Determination and Education Assistance Act* (Public Law 93-638) provided for increased participation of American Indians in the establishment and conduct of their education programs and services.

Harry S Truman Memorial Scholarship Act (Public Law 93-642) established the Harry S Truman Scholarship Foundation and created a perpetual education scholarship fund for young Americans to prepare and pursue careers in public service.

Indochina Migration and Refugee Assistance Act of 1975 (Public Law 94-23) authorized funds to be used for education and training of aliens who have fled from Cambodia or Vietnam.

Education of the Handicapped Act (Public Law 94-142) provided that all handicapped children have available to them a free appropriate education designed to meet their unique needs.

- 1976** *Educational Broadcasting Facilities and Telecommunications Demonstration Act of 1976* (Public Law 94-309) established a telecommunications demonstration program to promote the development of nonbroadcast telecommunications facilities and services for the transmission, distribution, and delivery of health, education, and public or social service information.

Education Amendments of 1976 (Public Law 94-482) extended and revised Federal programs for education assistance for higher education, vocational education, and a variety of other programs.

- 1977** *Youth Employment and Demonstration Projects Act of 1977* (Public Law 95-93) established a youth employment training program that includes, among other activities, promoting education-to-work transition, literacy training and bilingual training, and attainment of certificates of high school equivalency.

- 1978** *Career Education Incentive Act* (Public Law 95-207) authorized the establishment of a career education program for elementary and secondary schools.

Tribally Controlled Community College Assistance Act (Public Law 95-471) provided Federal funds for the operation and improvement of tribally controlled community colleges for American Indian students.

Education Amendments of 1978 (Public Law 95-561) established a comprehensive basic skills program aimed at improving pupil achievement (replaced the existing National Reading Improvement program); and established a community schools program to provide for the use of public buildings.

Middle Income Student Assistance Act (Public Law 95-566) modified the provisions for student financial assistance programs to allow middle income as well as low income students attending college or other postsecondary institutions to qualify for Federal education assistance.

1979 *Department of Education Organization Act* (Public Law 96-88) established a Department of Education containing functions from the Education Division of the Department of Health, Education, and Welfare along with other selected education programs from H.E.W., the Department of Justice, Department of Labor, and the National Science Foundation.

1980 *Asbestos School Hazard Protection and Control Act of 1980* (Public Law 96-270) established a program for inspection of schools for detection of hazardous asbestos materials and provided loans to assist educational agencies to contain or remove and replace such materials.

Amendments to the Higher Education Act (Public Law 96-374) provided for a new Commission on National Development in Postsecondary Education and a new Urban Grant University Program.

1981 *Education Consolidation and Improvement Act of 1981* (Public Law 97-35) consolidated 42 programs into 7 programs to be funded under the elementary and secondary block grant authority.

1983 *Student Loan Consolidation and Technical Amendments Act of 1983* (Public Law 98-79) established 8 percent interest rate for Guaranteed Student Loans and extended Family Contribution Schedule.

Challenge Grant Amendments of 1983 (Public Law 98-95) amended Title III, Higher Education Act, and added authorization of Challenge Grant program. The Challenge Grant program provides funds to eligible institutions on a matching basis as incentive to seek alternative sources of funding.

Education of Handicapped Act Amendments (Public Law 98-199) added Architectural Barrier amendment and clarified participation of handicapped children in private schools.

Education Consolidation and Improvement Act of 1981, Amendments (Public Law 98-211) added technical amendments for Chapter 1,

and provided for parental involvement and minor changes in other programs.

1984 *Rehabilitation Amendments of 1984* (Public Law 98-221) revised and extended the Rehabilitation Act of 1973. Provides for the Helen Keller National Center for Deaf-Blind.

Education for Economic Security Act (Public Law 98-377) added new science and mathematics programs for elementary, secondary, and postsecondary education. The new programs include magnet schools, excellence in education, and equal access.

Higher Education Act of 1965, Amendments (Public Law 98-312) amended Title III of the Higher Education Act of 1965 by creating a new method of funding the Challenge Grant program. The act also increased the level of authorization for the Office of the Inspector General and extended the Allen J. Ellender Fellowship program through fiscal year 1989.

Carl D. Perkins Vocational Education Act (Public Law 98-524) reauthorized Federal assistance for vocational education through fiscal year 1989. The act replaces the Vocational Education Act of 1963. It provides aid to the States to make vocational education programs accessible to all persons, including handicapped and disadvantaged, single parents and homemakers, and the incarcerated.

Human Services Reauthorization Act (Public Law 98-558) reauthorized the Head Start and Follow Through programs through fiscal year 1986. It also created a Carl D. Perkins scholarship program, a National Talented Teachers Fellowship program, a Federal Merit Scholarships program, and a Leadership in Educational Administration program.

1985 *Montgomery GI Bill—Active Duty* (Public Law-525), brought about a new GI Bill for individuals who initially entered active military duty on or after July 1, 1985.

Montgomery GI Bill—Selected Reserve (Public Law 98-525), is an education program for members of the Selected Reserve (which includes the National Guard) who enlist, reenlist, or extend an enlistment after June 30, 1985, for a 6-year period.

1986 *Education of the Deaf Act* (Public Law 99-371) places Gallaudet College and the National Technical Institute for the Deaf on a 5-year reauthorization cycle. Establishes an 18-month Commission to Study Deaf Education.

Handicapped Children's Protection Act (Public Law 99-372) allows parents of handicapped children to collect attorney's fees in cases brought under the Education of the Handicapped Act and provides that the Education of the Handicapped Act does not preempt other laws, such as Section 504 of the Rehabilitation Act.

Reauthorization of the Education of the Handicapped Act, Amendments (Public Law 99-457) reauthorizes for 3 years the discretionary programs under the Education of the Handicapped Act. Included are programs to provide demonstration projects for severely disabled individuals, research and technology activities, early childhood education, and a new State grant program to provide early intervention services for handicapped children from birth through age 2.

Reauthorization of the Higher Education Act of 1965 (Public Law 99-498) reauthorizes for 5 years the Higher Education Act of 1965, as amended. Provides increases in maximum Pell Grant and student loan amounts, institutes a new agency to provide college construction funding, cuts incentives to lenders involved in the student aid programs and extends the authorization for the Office of Educational Research and Improvement.

Reauthorization of the Rehabilitation Act (Public Law 99-506) authorizes for 5 years programs to provide vocational rehabilitation for disabled persons. Includes increasing the State/Federal match requirements and establishes a new State grant program for supported employment.

The Drug-Free Schools and Communities Act of 1986 (Public Law 99-570), part of the Anti-Drug Abuse Act of 1986, authorizes funding for fiscal years 1987-89. Establishes programs for drug abuse education and prevention, coordinated with related community efforts and resources, through the use of Federal financial assistance.

1987 *Higher Education Act Amendments of 1987* (Public Law 100-50) makes technical corrections, clarifications, or conforming amendments related to the enactment of the Higher Education Amendments of 1986.

1988 *The Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988* (Public Law 100-297) reauthorizes through 1993 major elementary and secondary education programs

including: Chapter 1, Chapter 2, Bilingual Education, Math-Science Education, Magnet Schools, Impact Aid, Indian Education, Adult Education, and other smaller education programs.

The Handicapped Programs Technical Amendments Act of 1988 (Public Law 100-360) makes certain technical and conforming amendments to the Education of the Handicapped Act and the Rehabilitation Act of 1973.

Technology-Related Assistance for Individuals with Disabilities Act of 1988 (Public Law 100-407) provides financial assistance to States to develop and implement consumer-responsive Statewide programs of technology-related assistance for persons of all ages with disabilities.

The Omnibus Trade and Competitiveness Act of 1988 (Public Law 100-418) authorizes new and expanded education programs. Title VI of the Act, Education and Training for American Competitiveness, authorizes new programs in literacy, math-science, foreign language, vocational training, international education, technology training, and technology transfer.

The Omnibus Drug Abuse Prevention Act of 1988 (Public Law 100-690) authorizes a new teacher training program under the Drug-Free Schools and Communities Act, an early childhood education program to be administered jointly by the Departments of Health and Human Services and Education, and a pilot program for the children of alcoholics.

Stewart B. McKinney Homeless Assistance Act (Public Law 100-628) extends for 2 additional years programs providing assistance to the homeless, including literacy training for homeless adults and education for homeless youths.

Tax Reform Technical Amendments (Public Law 100-647) authorizes an Education Savings Bond for the purpose of postsecondary educational expenses. The bill grants tax exclusion for interest earned on regular series EE savings bonds.

1989 *The Education and Training for a Competitive America Act of 1988* (Public Law 101-26) makes some technical corrections to the act.

The Head Start Supplemental Authorization Act of 1989 (Public Law 101-120) amends the Head Start Act to increase the amount au-

thorized to be appropriated for fiscal year 1990.

The Children with Disabilities Temporary Care Reauthorization Act of 1989 (Public Law 101-127) revises and extends the programs established in the Temporary Child Care for Handicapped Children and Crises Nurseries Act of 1986.

The Drug-Free Schools and Communities Act Amendments of 1989 (Public Law 101-226) amends the Drug-Free Schools and Communities Act of 1986 to revise certain requirements relating to the provision of drug abuse education and prevention programs in elementary and secondary schools.

1990 *The Childhood Education and Development Act of 1989* (Public Law 101-239) authorized the appropriations to expand Head Start Programs and programs carried out under the Elementary and Secondary Education Act of 1965 to include child care services.

The Carl D. Perkins Vocational and Applied Technology Education Act Amendments of 1990 (Public Law 101-392) reauthorized and amends the Carl D. Perkins Vocational Education Act to extend the authorities contained in such Act through fiscal year 1995.

The Excellence in Mathematics, Science and Engineering Education Act of 1990 (Public Law 101-589) promotes excellence in American mathematics, science and engineering education by creating a national mathematics and science clearinghouse, establishing regional mathematics and science education consortia, establishing three new mathematics, science and engineering scholarships programs, and creating several other mathematics, science and engineering education programs.

The Individuals with Disabilities Education Act of 1990 (IDEA) (Public Law 101-476) reauthorized the Education of the Handicapped Act, which mandates a free public education for students with disabilities.

The Student Right-To-Know and Campus Security Act (Public Law 101-542) requires institutions of higher education receiving federal financial assistance to provide certain information with respect to the graduation rates of student-athletes at such institutions. The act also requires the institution to certify that it has a campus security policy and will annually submit a uniform crime report to the Federal Bureau of Investigation (FBI).

The Children's Television Act of 1990 (Public Law 101-437) requires the Federal Communications Commission to reinstate restrictions on advertising during children's television, and enforces the obligation of broadcasters to meet the educational and informational needs of the child audience.

The Elementary and Secondary Education Act of 1965 Amendments (Public Law 101-250) reauthorized certain school dropout demonstration programs.

The McKinney Homeless Assistance Amendments Act of 1990 (Public Law 101-645) reauthorized the Stewart B. McKinney Homeless Assistance Act programs of grants to State and local education agencies for the provision of support services to homeless children and youth.

The National Assessment of Chapter 1 Act (Public Law 101-305) requires the Secretary of Education to conduct a comprehensive national assessment of programs carried out with assistance under Chapter 1 of Title I of the Elementary and Secondary Education Act of 1965.

The Augustus F. Hawkins Human Services Reauthorization Act of 1990 (Public Law 101-501) authorized appropriations for fiscal years 1991-1994 to carry out the Head Start Act, the Follow Through Act, the Community Services Block Grant Act, and the Low-Income Home Energy Assistance Act of 1981.

The National and Community Service Act of 1989 (Public Law 101-610) increased school- and college-based community service opportunities and authorized the President's Points of Light Foundation.

The School Dropout Prevention and Basic Skills Improvement Act of 1990 (Public Law 101-600) improves secondary school programs for basic skills improvements and dropout reduction.

The Medical Residents Student Loan Amendments Act of 1989 (Enacted in Public Law 101-239, the Omnibus Budget Reconciliation Act of 1989) amended the Higher Education Act of 1965 to eliminate student loan deferments for medical students serving in internships or residency programs.

The Asbestos School Hazard Abatement Reauthorization Act of 1990 (Public Law 101-637) reauthorized the Asbestos School Hazard Abatement Act of 1984, which provided finan-

cial support to elementary and secondary schools to inspect for asbestos, and to develop and implement an asbestos management plan. In addition, the act provides for programs of information, technical and scientific assistance, and training.

The National Commission on Responsibilities for Financing Higher Education (Public Law 101-324) clarified the procedures of the National Commission on Responsibilities for Financing Higher Education.

The Eisenhower Exchange Fellowship Program (Public Law 101-454) provided a permanent endowment for the Eisenhower Exchange Fellowship Program.

The Tribally Controlled Community College Reauthorization (Public Law 101-477) reauthorized the Tribally Controlled Community College Assistance Act and the Navajo Community College Act.

The Environmental Education Act (Public Law 101-619) promotes environmental education by the establishment of an Office of Environmental Education in the Environmental Protection Agency and the creation of several environmental education programs.

The Anti-Drug Education Act of 1990 and the Drug Abuse Resistance Education (DARE) Act of 1990 (Both bills were enacted as part of Public Law 101-647, the Comprehensive Crime Control Act of 1990.) amends the Drug Free Schools and Communities Act and raises funding levels for school personnel training, funds the replication of successful drug education programs, helps local education agencies to cooperate with law enforcement agencies and allows funds to be used for after-school programs. The Drug Abuse Resistance Education Act establishes a program of grants to HHS for Drug Abuse Resistance Education (DARE) programs.

The Public Service Assistance Education Act (Enacted as part of Public Law 101-510, of the Department of Defense Authorization Act) gives Federal agencies authority to provide new educational benefits to employees by paying for an employee to obtain an academic degree for which there is an agency shortage of qualified personnel, and by repaying up to \$6,000 per year of the student loan of a qualified employee in exchange for a 3-year commitment.

The 1990 Budget Reconciliation Act (Public Law 101-508) included a set of student aid

provisions that were estimated to yield a savings of \$2 billion over 5 years. These provisions included delayed Guaranteed Student Loan disbursements, tightened ability-to-benefit eligibility, and expanded pro rata refund policy and the elimination of student aid eligibility at high default schools.

Highlights

- Federal funding for education showed sizable growth between fiscal years 1965 and 1991, after adjustment for inflation. Particularly large increases occurred between 1965 and 1975. After a period of relative stability between 1975 and 1980, Federal funding for education, excluding estimated Federal tax expenditures for education, declined approximately 8 percent between 1980 and 1985. From 1985 to 1991, Federal funding for education increased by 12 percent. (Table 336)
- During the 1965 to 1975 period, after adjustment for inflation, Federal funds for elementary and secondary education rose by 189 percent, postsecondary education by 230 percent, and other education by 127 percent, but research funding fell by about 1 percent. Between 1975 and 1980, Federal funding for elementary and secondary education rose by 1 percent and research by 14 percent, but postsecondary education fell by 2 percent and other education by 35 percent. After dipping 20 percent between 1980 and 1985, Federal funding for elementary and secondary education programs rose by 17 percent between 1985 and 1991. Postsecondary education rose by 1 percent between 1985 and 1991, other education by 41 percent, and research by 17 percent, after adjustment for inflation. (Table 336)
- Total Federal support for education was \$84.1 billion in fiscal year 1990, down 2 percent from fiscal year 1980, after adjustment for inflation. From fiscal year 1980 to fiscal year 1990, Federal program funds fell by 5 percent; non-Federal student aid funds generated by Federal programs rose 49 percent; and estimated Federal tax expenditures for education declined by 12 percent. (Table 336)
- According to fiscal year 1991 estimates, \$24.9 billion or about 46 percent of the \$54.6 billion dollars spent by the Federal Government on education came from the Department of Education. Large amounts of money also came from the Department of Health and Human Services (\$8.0 billion), the Department of Agriculture (\$7.0 billion), the Department of Defense (\$3.5 billion), and the Department of Energy (\$2.7 billion). (Table 337)
- In fiscal year 1991, Federal program funds for elementary/secondary education amounted to \$24.4

billion; for higher education, \$13.7 billion; for research at universities and related institutions, \$12.8 billion; and for other programs, \$3.7 billion. (Table 338)

- Between fiscal years 1980 and 1991, Department of Education obligations rose by about 27 percent, after adjustment for inflation. Funds for student financial assistance increased to \$12.2 billion in 1991, a rise of 46 percent since 1980. Funds for elementary and secondary education stood at an estimated \$8.1 billion in 1991, an increase of 17 percent since 1980. Funds for the handicapped increased by about 100 percent, to \$5.1 billion, while funds for vocational education declined 30 percent, after adjustment for inflation. (Table 36 and 339)
- Of the \$24.9 billion spent by the Department of Education in 1991, about \$9.2 billion went to school districts, \$3.8 billion to institutions of higher education, \$3.8 billion to college students, and \$2.8 billion to State education agencies. A large

portion of the remaining \$5.2 billion went to banks to subsidize student loans. (Table 340)

- About one in four elementary and secondary school students in the United States received publicly funded free or reduced price lunches in 1987–88. At public elementary schools, the participation rate was 34 percent compared with 18 percent for public secondary schools. Private school students were less likely to participate in school lunch programs; only 7 percent of elementary school students and 4 percent of the secondary school students participated in school lunch programs. (Table 350)
- About 10 percent of all elementary and secondary school children received Chapter 1 services in 1987–88. Federally sponsored Chapter 1 programs are designed to assist educationally disadvantaged children. Children in rural areas (12 percent) and urban areas (12 percent) were more likely to receive services than those in suburban areas (6 percent). (Table 351)

¹ On budget support includes Federal funds for education programs tied to appropriations.² New student loans guaranteed by the Federal Government and disbursed to borrowers. Also known as off budget support.³ Student loans created from institutional matching funds (1/3 of the Federal contribution). Excludes repayments of outstanding loans.⁴ Student loans created from institutional matching funds (1/3 of the Federal contribution). This is a demonstration project which involves only 10 institutions and has unsubsidized interest rates.⁵ Required State matching contributions.⁶ Institutions award grants to undergraduate students, and the Federal share of such grants may not exceed 85 percent of the total grant.⁷ Employer contributions to student earnings.⁸ Tax expenditures are the difference between current Federal tax receipts and what these receipts would be without existing education deductions to income allowed by Federal tax provisions.⁹ Estimated.¹⁰ Data adjusted by the Composite Deflator prepared by the Office of Management and Budget.

— Data not available or not applicable.

NOTE.—To the extent possible, Federal education funds data represent outlays rather than obligations. Because of rounding, details may not add to totals. Data have been revised from previously published figures.

¹Estimated.²The U.S. Department of Education was created in May 1980. It formerly was the Office of Education in the U.S. Department of Health, Education, and Welfare.³These commodities are purchased under Section 32 of the Act of August 24, 1935, for use in the child nutrition programs.⁴This program assisted in the construction of public facilities, such as vocational schools, through grants or loans. No funds have been appropriated for this account since FY 77, and it was completely phased out in FY 84 after the monitoring of closeouts of projects was completed. Data are not available for previous years.⁵This program was funded by the Department of Education in FYs 65 through 81 in the "Impact Aid" program. This program provides for education of dependents of Federal employees residing on Federal property in cases where free public education is unavailable in the nearby community.⁶The U.S. Department of Energy was created in 1977. It formerly was the Energy Research and Development Administration and before that the Atomic Energy Commission.⁷This program was established in 1979. Funds were appropriated for this program in FY 80.⁸The U.S. Department of Health and Human Services was part of the U.S. Department of Health, Education, and Welfare until May 1980.⁹The Head Start program was in the Office of Economic Opportunity, and funds were appropriated to the U.S. Department of Health, Education, and Welfare Office of Child Development, beginning in 1972.¹⁰After age 18, benefits terminate at the end of the school term or in 3 months, whichever is less.¹¹This program provides funding for supplemental programs for eligible Indian students in public schools.¹²This program finances the cost of academic, social, and occupational education courses for inmates in Federal prisons.¹³The Job Corps program was formerly in the Office of Economic Opportunity, and funds were appropriated to the U.S. Department of Labor beginning in 1971 and 1972.

¹⁴Some of the work and training programs included in this program were in the Office of Economic Opportunity and were transferred to the U.S. Department of Labor in 1971 and 1972.

¹⁵The U.S. Department of Transportation was created in 1967.

¹⁶This program was transferred from the U.S. Department of the Treasury to the U.S. Department of Transportation in 1967.

¹⁷This program was established in FY 72 and closed in FY 86.

¹⁸The States' share of revenue-sharing funds was not spent on education in FYs 81 through 86.

¹⁹The U.S. Department of Veterans Affairs, formerly the Veterans Administration, was created in March 1989.

²⁰This program provides educational assistance allowances in order to restore lost educational opportunities to those individuals whose careers were interrupted or impeded by reason of active military service between January 31, 1955, and January 1, 1977. Includes "Readjustment Benefits," Chapter 34, for education other than college and also includes the Veterans Job Training Program for service persons and veterans. Chapter 34 program closed December 31, 1989. The Veterans Job Training Program were put in the program Payments to State Education Agencies. Veterans who were still eligible to receive benefits under Chapter 34 were put in Chapter 30 (The All Volunteer Force Educational Assistance program).

²¹The program is in "Readjustment Benefits" program, Chapter 31, and covers the costs of subsistence, tuition, books, supplies, and equipment for disabled veterans requiring vocational rehabilitation.

²²This program is in the "Readjustment Benefits" program, Chapter 35, and provides benefits to children and spouses of veterans.

²³This agency was established March 9, 1965. First year of appropriations was 1966. The outlays were larger in the years 1970 and 1975 for elementary and secondary education because of the construction of facilities for vocational schools.

²⁴This agency was established in 1965. In 1970, \$900,000 was appropriated through the Office of Education. U.S. Department of Health, Education, and Welfare, for the National Endowment for the Arts. Arts in Education program.

²⁵This agency was established in 1965. First year of appropriations was 1966.

²⁶The Economic Opportunity Act of 1964 authorized 10 major action programs, including Job Corps, Neighborhood Youth Corps, Adult Literacy, Work Experience, College Work Study, and Community Action programs, including Head Start, Follow Through, and Upward Bound, and authorized the establishment of Volunteers in Service to America (VISTA). These programs were transferred to the U.S. Department of Health, Education, and Welfare, U.S. Department of Labor, and the Action Agency in the 1970s. An act on January 4, 1975 established the Community Services Administration as the successor agency to the Office of Economic Opportunity.

²⁷Head Start program funds were transferred to the U.S. Department of Health, Education, and Welfare, Office of Child Development, in 1972.

²⁸Most of these programs were transferred to the U.S. Department of Health, Education, and Welfare, Office of Education, in 1972.

²⁹The Job Corps programs were transferred to the U.S. Department of Labor in 1971 and 1972.

³⁰These programs were transferred to the U.S. Department of Labor in 1971 and 1972.

³¹These programs were transferred to the Action Agency in 1972.

³²Similar programs were included in the "higher education" program in 1965 through 1975.

³³Negative amounts occur when program receipts exceed outlays.

³⁴This program was formerly in the U.S. Department of Housing and Urban Development and was transferred to the U.S. Department of Health, Education, and Welfare, Office of Education, in FY 79.

³⁵First year of appropriations for this program was 1967.

³⁶Program funds were first appropriated for Tuskegee Institute in 1972.

³⁷The Sea Grant College Program Act of 1966 established a matching fund grant program that provides for the establishment of a network of programs in fields related to development and preservation of the nation's coastal and marine resources. One of the objectives is to provide trained personnel to utilize and manage these resources. This program was in the National Science Foundation and transferred to the U.S. Department of Commerce, October 1970. Appropriations began in 1968.

³⁸This program was transferred to the U.S. Department of Transportation in FY 81 by Public Law 97-31, from the U.S. Department of Commerce.

³⁹The Department of Defense funds for FYs 88 to 91 are lower than previous years because they exclude military pay and reserve accounts which were included in previous years. FY 65 data are not available except for service academies.

⁴⁰Included in total above.

⁴¹Instructional costs only are included. These include academics, audiovisual, academic computing center, faculty training, military training, physical education, and libraries.

⁴²Includes special education programs (military and civilian), legal education program, flight training, advanced degree program, college degree program (officers), and Armed Forces Health Professions Scholarship program.

⁴³No funds have been appropriated for this program since FY 82.

⁴⁴This program receives funds periodically.

⁴⁵Appropriations began in FY 84.

⁴⁶Appropriations began in FY 89.

⁴⁷Appropriations began in FY 78.

⁴⁸The amount reported in FY 83 was large because of a loan default.

⁴⁹Postsecondary student benefits were ended by the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) and were completely phased out by August 1985.

⁵⁰Includes adult education, tribally controlled community colleges, other postsecondary schools, and in FY 91 also includes indirect administrative cost grants.

⁵¹This program was transferred to the International Communication Agency (ICA) in the Reorganization Plan No. 2 of 1977 which consolidated the functions of the United States Information Agency (USIA) and the Department of State's Bureau of Educational and Cultural Affairs. In FY 82 the ICA became the USIA.

⁵²This program provides funds for advanced study and research projects of the Soviet Union and Eastern European countries by American institutions of higher education and private research firms. Appropriations began in FY 88.

⁵³This program was transferred to the U.S. Department of Transportation in FY 81 by Public Law 97-31, from the U.S. Department of Commerce. FY 89 outlays are high because of the replacement of one of the training ships.

⁵⁴Includes flight training. This program was in the U.S. Department of the Treasury in 1965 and was transferred to the U.S. Department of Transportation in 1967.

⁵⁵Includes Vietnam-era veterans under Chapter 34 (GI Bill) of the "Readjustment Benefits" education and training program. This program provides educational assistance allowances, primarily on a monthly basis, in order to restore lost educational opportunities to those individuals whose careers were interrupted or impeded by reason of active mil-

itary service between January 31, 1955, and January 1, 1977. This program closed December 31, 1989. Some veterans who were still eligible were put in Chapter 30 (The All Volunteer Force Educational Assistance program).

⁵⁶Includes service persons under Chapter 34 (GI Bill) of the "Readjustment Benefits" education and training program. Service persons with over 180 days of active duty, any part of which was before January 1, 1977, are eligible to participate in this program.

⁵⁷Includes post Vietnam-era veterans, under Chapter 32 of the post-Vietnam-era Veterans Education Account. Provides education and training assistance payments to veterans and service persons with no active duty time before January 1, 1977. Funding is provided through participants' contributions while on active duty and through transfers from the U.S. Department of Defense (DOD). Participants' contributions, up to a maximum of \$2,700, are deposited to the fund prior to discharge. When the participant enters training, the monthly disbursement from his or her account is matched two for one from funds provided by DOD. Additional amounts in the form of incentive bonuses may also be provided by DOD funds. The U.S. Department of Veterans Affairs funds are not appropriated for this program so these data represent obligations.

⁵⁸Public Law 98-525, enacted October 19, 1984 (New GI Bill), established two new peacetime educational programs. An assistance program for veterans who enter active duty during the period beginning July 1, 1985, and ending on June 30, 1988, and an assistance program for certain members of the Selected Reserve.

⁵⁹Chapter 30, also called the Montgomery Bill, and the new GI Bill are for eligible veterans who have agreed to have their military pay reduced \$100 per month for their first 12 months of active duty in order to participate in this program. The "Readjustment Benefits" account under the U.S. Department of Veterans Affairs pays only the basic allowance, up to a maximum of \$300 per month, for full-time training. "Supplemental Benefits" are paid by the U.S. Department of Defense (DOD).

⁶⁰Chapter 106 is for members of the Selected Reserve. The reserve components include the Army, Navy, Air Force, Marine Corps Reserve, Army National Guard and Air National Guard under the U.S. Department of Defense (DOD), and the Coast Guard Reserve, which is under the U.S. Department of Transportation (DOT), when it is not operating as a service in the Navy. Eligible persons can receive up to \$140 per month for full-time training. The DOD and DOT pay for this program, and the U.S. Department of Veterans Affairs administers it.

⁶¹Includes dependents of veterans under Chapter 35, the "Readjustment Benefits" education and training program. Provides education and training benefits to dependents of veterans who died of a service-connected disability or whose service-connected disability is rated permanent and total.

⁶²These payments have been made to State education agencies for years but they were not available as a separate budget item until FY 88.

⁶³The USIA was called the "International Communication Agency" in FYs 80 and 81.

⁶⁴This program was in the "Educational and Cultural Affairs" program in FYs 80 through 83, and became an independent program in FY 84.

⁶⁵This program was combined with the "educational and cultural affairs" program in FY 77.

⁶⁶Public Law 99-661 established this program to operate the scholarship program in tribute to the former Senator from Arizona. The Foundation will award scholarships and fellowships to outstanding graduate and undergraduate students who intend to pursue careers or advanced degrees in science or mathematics. The Foundation may also award honoraria to outstanding individuals who have made significant contributions to improve the instruction of science and mathematics in secondary schools.

⁶⁷Appropriations for this program began in FY 76.

⁶⁸Public Law 99-498 established this Institute as an independent non-profit corporation administered by a Board of Trustees. The Institute provides Native Americans with an opportunity to obtain a postsecondary education in various fields of Indian art and culture.

⁶⁹Public Laws 99-500 and 99-591 established the James Madison Memorial Fellowship Foundation to operate a fellowship program to encourage graduate study of the American Constitution. First year of appropriations was FY 88.

⁷⁰This program was transferred to the U.S. Department of Transportation in FY 68 from the U.S. Department of Housing and Urban Development.

⁷¹This program was established by the Juvenile Justice and Delinquency Prevention Act of 1974 to provide education and training and to provide leadership in improving correctional programs and practices in prisons. FY 75 had large outlays because of the construction of buildings and facilities.

⁷²Appropriations for this program began in FY 70. This program is part of the Federal Aid Highway Act of 1970, Public Law 91-605.

⁷³The Federal Aviation Administration was an independent agency and was transferred to the U.S. Department of Transportation in FY 67.

⁷⁴Appropriations began in FY 72. No funds have been appropriated since FY 82.

⁷⁵First year of appropriations was FY 70.

⁷⁶This agency was established on July 1, 1971. This agency brings together a number of volunteer programs. Some of these funds were formerly in the Office of Economic Opportunity.

⁷⁷These programs included the Service Learning Programs, University Year for Action, Youth Challenge Program, and the National Student Volunteer Program in FY 1975. In FYs 80 to 84, programs included were the University Year for Action, Young Volunteers for Action, and National Service Learning Programs. In fiscal years 1985 and 1986, the program included was the Service Learning Programs, and in FYs 87 to 90, programs included were the Literacy Corps and the Student Community Services Program.

⁷⁸The Federal Emergency Management Agency was created on March 25, 1979, representing a combination of about five existing agencies. The two largest were the Defense Civil Preparedness Agency in the U.S. Department of Defense and the Federal Preparedness Agency in the General Services Administration.

⁷⁹First year of appropriations was FY 68.

⁸⁰First appropriations for the "other training programs" were in the late 1960s. These programs include the Fall-Out Shelter Analysis, Blast Protection Design, and Multi-Protection Design Summer Institute.

⁸¹This program was transferred from the General Services Administration to the National Archives and Records Administration in April 1985.

⁸²This program makes grants for the promotion of scholarly, cultural, and artistic exchanges between Japan and the United States. Appropriations began in FY 76.

⁸³The National Archives and Records Administration became an independent agency in April 1985.

⁸⁴This program was established by the act of July 20, 1970, Public Law 91-345.

⁸⁵This program was established by Congress to conduct and support research and scholarships in the fields of peace, arms control, and conflict resolution. This program began operation in February 1986.

⁸⁶Includes Federal obligations for research and development centers administered by colleges and universities. FYs 89, 90, and 91 are estimated.

⁸⁷ Total outlays for FYs 65 and 70 include the "Research and Training" program. FY 75 includes the "National Institute of Education" program. FYs 80 to 91 include outlays for the Office of Educational Research and Improvement.

⁸⁸ Less than \$50,000.

— Data not available or not applicable.

NOTE.—Some data have been revised from previously published figures. To the extent possible, amounts reported represent outlays rather than obligations.

SOURCE: U.S. Department of Education, National Center for Education Statistics, compiled from data appearing in U.S. Office of Management and Budget, *Budget of the U.S. Government*, fiscal years 1967 to 1992; National Science Foundation, *Federal Funds for Research and Development*, fiscal years 1965 to 1991, and unpublished data obtained from various Federal agencies. (This table was prepared April 1991.)

**Table 339.—Federal on-budget funds obligated for programs administered by the Department of Education:
Fiscal years 1980 to 1991**
[In thousands of dollars]

Program	1980	1982	1984	1985	1986	1988	1989	1990	1991 ¹
1	2	3	4	5	6	7	8	9	10
Total	\$14,102,165	\$15,069,590	17,072,698	\$18,818,201	\$18,940,681	\$20,697,311	\$24,473,634	\$25,214,653	\$29,301,023

¹ Chapter 1, Education Consolidation and Improvement Act of 1981.

² Includes Chapter 2, Education Consolidation and Improvement Act of 1981, Science and Mathematics Education, Drug-Free Schools and Communities, and Education of Homeless Children and Youth.

³ Includes Maintenance and Operations.

⁴ Includes Vocational Education—Basic State Grants, Community Based Organizations, Consumer and Homemaking Education, State Councils, and Adult Education State Administered Program.

⁵ Includes State Grants, Preschool Incentive Grants to States, and Grants for Infants and Families.

⁶ Also includes Emergency Immigrant Education Program and Transition Program for Refugee Children.

⁷ Includes Institutional Aid to Strengthen Higher Education Institutions serving significant numbers of low-income students, Other Special Programs for the Disadvantaged Cooperative Education, Fund for the Improvement of Postsecondary Education, Fellowships and Scholarships, and annual interest subsidy grants for facilities construction.

⁸ Includes Basic Educational Opportunity Grants (Pell Grants), State Student Incentive Grants, and National Guaranteed Student Loan interest subsidies.

⁹ Includes Rehabilitation Services Basic State Grants, Client Assistance for Handicapped Individuals, Independent Living, and Supported Employment Services.

NOTE.—Data reflect revisions to figures in the *Budget of the United States Government, Fiscal Year 1992*. To the extent possible, data represent obligations rather than outlays. Because of the exclusion of certain programs, totals in this table are lower than those reported in other tables. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, based on unpublished tabulations from the Office of Management and Budget, and U.S. Department of Commerce, Bureau of the Census, *Federal Expenditures by State for Fiscal Year 1990*. (This table was prepared February 1991.)

**Table 342.—Department of Education obligations for major programs, by State or other area:
Fiscal year 1989¹**

¹ Revised from previously published data.

² Chapter 1, Education Consolidation and Improvement Act of 1981.

³ Includes Chapter 2, Education Consolidation and Improvement Act of 1981: Science and Mathematics Education; Drug-Free Schools and Communities; and Education of Homeless Children and Youth.

⁴ Includes Maintenance and Operations.

⁵ Includes Vocational Education—Basic State Grants; Community-Based Organizations, Consumer and Homemaker Education; State Councils; and Adult Education State Administered Program.

⁶ Includes State Grants, Preschool Incentive Grants to States, and Grants for Infants and Families.

⁷ Also includes Emergency Immigrant Education Program and Transition Program for Refugee Children.

⁸ Includes Institutional Aid to Strengthen Higher Education Institutions serving significant numbers of low-income students, Other Special Programs for the Disadvantaged.

Cooperative Education; Fund for the Improvement of Postsecondary Education; Fellowships and Scholarships; and annual interest subsidy grants for facilities construction.

⁹ Includes Basic Educational Opportunity Grants (PELL Grants); State Student Incentive Grants; and National Guaranteed Student Loan interest subsidies.

¹⁰ Includes Rehabilitation Services; Basic State Grants; Client Assistance for Handicapped Individuals; Independent Living; and Supported Employment Services.

NOTE.—Data reflect revisions to figures in the Budget of the United States Government, Fiscal Year 1991. To the extent possible, data represent obligations rather than outlays. Because of the exclusion of certain programs, totals in this table are lower than those reported in other tables. Because of rounding, details may not add to totals.

SOURCE. U.S. Department of Education, National Center for Education Statistics, based on unpublished tabulations from the Office of Management and Budget, and U.S. Department of Commerce, Bureau of the Census, *Federal Expenditures by State for Fiscal Year 1989*. (This table was prepared February 1991.)

¹ Data are based on fiscal year 1990 budget authorizations. Excludes \$11,853,000 for evaluation and studies, \$4,445,000 for rural technical assistance (Rural Tacs), and \$24,201,000 for Even Start.

² Data are based on fiscal year 1989 budget appropriations. Excludes \$7,904,000 for evaluation and studies, \$3,952,000 for rural technical assistance (Rural Tacs), and \$14,820,000 for Even Start.

³ Includes capital expenses and State program improvement grants.

NOTE.—Because of rounding, details may not add to totals.

¹ Dollars reflect actual obligations during the fiscal year regardless of when the funds were actually spent by a recipient institution. Data include obligations to federally funded research and development centers administered by colleges and universities.

² Includes Department of Commerce, Department of Housing and Urban Development, Department of the Interior, Agency for International Development, Department of Labor, Department of Transportation, and Nuclear Regulatory Commission.

NOTE.—Totals exclude loans to individuals, such as the Federal Guaranteed Student Loan program sponsored by the Department of Education, and Federal training and de-

velopment activities, as well as funds allocated to State agencies, even though the final recipient of such funds is known to be an academic institution. Tuition support programs such as Pell Grants are included in these figures.

¹ The Special Milk program total includes \$1,660,485 in prior years unobligated balances restored.

² Special Meal Assistance program is combined with "School Lunch" program.

³ Commodities are based on preliminary food orders for fiscal year 1990. Undistributed amount for Commodities and Cash in Lieu includes \$7,506,282 for Study of Alternatives to Commodity Distribution.

⁴ Undistributed amount reflects the difference between preliminary State earnings reports and Federal obligations as of September 30, 1990.

NOTE.—Data are based on obligations as reported September 30, 1990. Because of rounding, details may not add to totals.

¹ The distribution of enrollment by age was: 10% were 5 years old and older, 62% were 4 years old, 25% were 3 years old, and 3% were under 3 years of age. Handicapped children accounted for more than 13% of all children in Head Start programs. The racial-ethnic composition was: American Indian, 4%; Hispanic, 22%; black, 38%; white, 33%; and Asian, 3%.

² The distribution of enrollment by age was: 8% were 5 years old and over, 64% were 4 year olds, 25% were 3 year olds, and 3% were under 3 years of age. Handicapped children accounted for almost 13.5% of all children in Head Start programs. The racial-ethnic composition was: American Indian, 4%; Hispanic, 22%; black, 38%; white, 33%; and Asian, 3%.

³ The distribution of enrollment by age was: 7% were 5 years old and over, 63% were 4 year olds, 27% were 3 year olds, and 3% were under 3 years of age. Handicapped children accounted for 13.9 percent in Head Start programs. The racial-ethnic composition was: Native American, 4%; Hispanic, 22%; black, 38%; white, 33%; and Asian, 3%. —Not applicable.

CHAPTER 5

Outcomes of Education

This chapter consists primarily of tables comparing educational attainment and work force characteristics. The data show labor force participation and income levels of high school dropouts, high school graduates, and bachelor's degree recipients. Population characteristics are provided for many of the measures to help evaluate disparities among various demographic groups. The first set of tables contains data from the Bureau of the Census on educational attainment of the labor force and income of the labor force and data from the Bureau of Labor Statistics on employment and unemployment. These tables provide information on the educational attainment of the labor force, by occupation, sex, and race/ethnicity; money income, by level of education attained; and unemployment rates, by years of school completed, sex, and race/ethnicity.

The second group of tables was compiled from Bureau of Labor Statistics data on high school dropouts and graduates. These data show the labor force participation and college enrollment of high school students within the year after they leave school. The tabulations also provide comparative labor force participation and unemployment rates for graduates and dropouts. Additional information on college enrollment rates by race/ethnicity and sex have been included to help form a more complete picture of high school outcomes.

The third set of tables has been prepared from the National Center for Education Statistics survey, Recent College Graduates, and from a Bureau of the Census survey on earnings and education. These tables provide data on employment outcomes for high school and college graduates. A table provides a salary comparison by field of college degree for the entire population. Trends in salaries received by college graduates also are featured in this section.

Statistics on educational attainment of the entire population are in chapter 1. More detailed data on the number of degree recipients are contained in chapters 2 and 3. Chapter 2 contains trend data on the proportion of high school graduates going to college. Additional data on the income of persons by

educational attainment may be obtained from the Bureau of the Census in the *Current Population Reports*, Series P-60. The Bureau of Labor Statistics has a selection of publications dealing with the educational characteristics of the labor force. Further information on survey methodologies is in the "Guide to Sources" in the appendix and in the publications cited in the source notes.

Highlights

- The life goal most consistently rated "very important" by young men and women was "having a happy family life." Two of the other most highly rated goals in the 1986 survey were "being successful in work" and "finding steady work." (Table 352)
- Persons with lower levels of educational attainment were more likely to be unemployed than those who had higher levels of educational attainment. The March 1990 unemployment rate for those with 1 to 3 years of high school was 12.2 percent compared with 5.8 percent for those with 4 years of high school and 2.4 percent for those with 4 or more years of college.* Blacks, other minorities, and young people tended to have higher unemployment rates, even after allowing for level of educational attainment. (Table 355)
- Between 1979 and 1989, annual income generally rose more rapidly for men with higher levels of educational attainment than for those with lower levels. For example, the income of men who were year-round full-time workers with 4 years of college rose by 72 percent compared with 39 percent for men with 1 to 3 years of high school. Income for men who had completed 4 years of high school increased 47 percent. (Table 357)

* The unemployment rate for all persons with 8 years or less of school were lower than the rate for those who had completed 1 to 3 years of high school. The people with 8 years or less of schooling were generally older workers who tended to have low unemployment rates because of their greater experience in the work force.

- In general, women's incomes rose faster than men's incomes (86 percent compared with 63 percent) between 1979 and 1989. However, for full-time year-round workers, women's salaries remain significantly below those for men at all education levels. (Table 357)
- The problems of dropouts are highlighted by comparing the labor force and unemployment status of dropouts and high school graduates. Only 65 percent of 1988-89 dropouts were in the labor force (employed or looking for work) and, of those in the labor force, 28 percent were unemployed. Of the 1988-89 high school graduates who were not in college, 84 percent were in the labor force and 15 percent of those in the labor force were unemployed. (Tables 359 and 360)
- About 53 percent of the college graduates of the class of 1985-86 had jobs in professional, managerial, and technical areas in 1987. Thirty-one percent were employed in nonprofessional, nonmanagerial, and nontechnical areas, and 4 percent were unemployed. Many of the 11 percent who were not in the labor force were enrolled in graduate school. (Table 362)
- A large number of young adults participate in volunteer organizations. The most common organizations are sports groups (36 percent), church groups (32 percent), and social or hobby clubs (22 percent). (Table 367)
- A 1985 assessment of young adults found that the vast majority (about 96 percent) had basic literacy skills. On the other hand, only about one-fifth had high proficiency in several types of literacy skills. (Table 368)

¹ The unemployment rate is the percent of individuals in the labor force who are not working and who made specific efforts to find employment sometime during the prior 4 weeks. The labor force includes both employed and unemployed persons.

² Includes persons of Hispanic origin.

³ Persons of Hispanic origin may be of any race.

—Data not available.

¹ Too few respondents to produce reliable estimates.

² The SES index is a composite of five equally-weighted measures: father's education, mother's education, family income, father's occupation, and presence of certain items in the respondent's household.

¹ The labor force includes all employed persons plus those seeking employment. The labor force participation rate is the percentage of persons either employed or seeking employment.

² Includes persons who graduated from high school between January and October 1988.

³ Includes persons of Hispanic origin.

⁴ Persons of Hispanic origin may be of any race.

⁵ Data not shown where base is less than 75,000.

⁶ Includes persons who graduated from high school between January and October 1989.

—Data not available or not applicable

NOTE.—Data are based upon sample surveys of the civilian noninstitutional population. Percents are only shown when base is 75,000 or greater. Even though the standard errors are large, smaller estimates are shown to permit users to combine categories in various ways. Because of rounding, details may not add to totals.

¹ Sample survey in 1986 based on people who were high school seniors in spring 1980. Respondents to the survey were asked about their voluntary participation in selected organizations over the previous 24-month period.

² Includes participation in community centers, neighborhood improvement, or social action associations or groups.

³ E.g., hospital volunteer.

⁴ Includes participation in organizations such as Rotary, Junior Chamber of Commerce, Veterans, etc.

⁵ In 1980, the seniors were asked to indicate the level of participation in each of 15 different extracurricular activity areas (e.g., varsity sports, debate, band, subject matter clubs, church activities, etc.). Responses to these earlier inquiries were used to classify overall level of participation in extracurricular activities.

NOTE.—Some adults participated in more than one organization.

¹ Includes persons 21 to 25 years old. Excludes persons not living in households and those who were unable to speak English.

² Prose comprehension test measures the knowledge and skills needed to gain understanding and use information from texts such as editorials, news stories, and poems. A score of 200 indicates an ability to write a simple description of the type of job one would like to have. A score of 300 indicates an ability to locate information in a news article or an almanac. A score of 350 indicates an ability to synthesize the main argument from a lengthy newspaper editorial.

³ Document literacy test measures the knowledge and skills required to locate and use information from documents such as indexes, tables, paycheck stubs, and order forms. A score of 200 indicates ability to match money-saving coupons to a shopping list of several items. A score of 300 indicates an ability to follow directions to travel from one

location to another using a map. A score of 350 indicates an ability to use a bus schedule to select the appropriate bus for given departures and arrivals.

⁴ Quantitative literacy test measures the knowledge and skills needed to apply the arithmetic operations of addition, subtraction, multiplication, and division, either alone or sequentially. A score of 200 indicates an ability to total two entries on a bank deposit slip. A score of 300 indicates an ability to enter deposits and checks and balance a checkbook. A score of 350 indicates an ability to determine the amount of a tip in a restaurant using a given percentage.

CHAPTER 6

International Education

This chapter offers a broad perspective on education among the nations of the world. It also provides an international context for examining the condition of education in the United States. Historically, the National Center for Education Statistics (NCES) has not been active in collecting international data. However, it has funded a number of research studies comparing mathematics and science performance among various nations. Included in these studies are the second International Assessment of Education Progress (IAEP) and the Third International Mathematics and Science Study (TIMSS). NCES has cooperated with international agencies in the compilation of statistics and the development of education indicators.

The data in this chapter were drawn from material prepared by the United Nations Educational, Scientific, and Cultural Organization (UNESCO), the Institute of International Education, the Organization for Economic Cooperation and Development (OECD), and the International Association for the Evaluation of Educational Achievement (IEA). The basic summary data on enrollments, teachers, enrollment ratios, and finances were synthesized from information appearing in the annual Statistical Yearbook published by UNESCO. Even though UNESCO tabulations are very carefully prepared, international data users should be cautioned about the many problems of definition and reporting involved in the collection of data about the educational systems in the world.

This chapter also contains data from recent international assessments of mathematics and science achievement. These assessments, most coordinated by the International Association for the Evaluation of Educational Achievement, provide comparative data for about 20 countries. Data from other mathematics and geography assessments also are included in this chapter. A different perspective is provided by data on the enrollment of foreign students in U.S. institutions of higher education. These data from the Institute of International Education provide information on the number of foreign students and their countries of origin.

Further information on survey methodologies is in the "Guide to Sources" in the appendix and in the publications cited in the source notes.

Highlights

- Enrollments at elementary and secondary levels have increased more rapidly in Africa than in other parts of the world. The smallest enrollment increases at these levels occurred in Northern America and Oceania with Europe actually decreasing. (Table 370)
- In 1987–88, about 939 million students were in schools around the world. Of these students, 590 million were in elementary-level programs, 291 million were in secondary programs, and 58 million were in postsecondary programs. (Table 370)
- Between 1979–80 and 1987–88, enrollments grew rapidly, particularly in the less-developed areas of the world. Elementary enrollment changes ranged from increases of 18 percent in Africa and 12 percent in Central and South America to modest increases of only 1 percent in Europe, 5 percent in Northern America and 6 percent in Asia. Oceania declined by 5 percent. Enrollment increases at the secondary level were more dramatic, especially in Africa (48 percent), Central and South America (33 percent) and Asia (24 percent). Secondary-level enrollment declined in Europe by 1 percent and Northern America by 4 percent. At the postsecondary level, Africa (52 percent) and Central and South America (43 percent) had the largest increases followed by Asia (35 percent). These increases are a result of large growth in the school attendance rates and sizeable rises in population. (Table 370)
- Preprimary enrollment rates are highest among 4-year-olds in Belgium, Spain, France and the Netherlands. Among 5-year-olds, enrollment rates also are high in Ireland, Austria, the U.S., and West Germany. (Table 369)
- Pupil/teacher ratios in elementary and secondary schools vary widely from country to country. Countries with relatively low ratios were Italy (10.1), Poland (14.0) and Australia (14.5) in 1988. Countries with relatively high ratios included Korea (31.1 in 1989), the Philippines (33.1) and Mexico (24.9) in 1988. (Table 371)

- A comparison of public expenditures on education as a percent of gross national product (GNP) reveals significant differences among nations. For example, in the U.S. the 1988 proportion of GNP for education was 5.8 percent. Other countries ranged from 2.1 percent for Mexico and 3.3 percent for Thailand to 7.3 percent for Norway and 7.9 percent for the U.S.S.R. (Table 383)
- U.S. students ranked below average in a 1981–82 international test of mathematical skills of eighth grade students. Few of the 19 other nations and Canadian provinces scored below the United States. U.S. students scored above the international average on statistics and about the international average on algebra and arithmetic, but they scored well below the international average on geometry and measurement. (Table 374)
- In an analysis of international mathematics testing for the most advanced 12th grade mathematics students, U.S. students ranked among the lowest scoring among the 13 participating nations. The best scores were made by Japanese students, who had the highest average scores on algebra, geometry, and calculus. Japanese schools were also among the most likely to cover material tested on the exam. American schools covered the smallest portion of such material, with the exception of schools in British Columbia. (Table 375)
- In the 1988 International Assessment of Educational Progress, the U.S. 13-year-olds scored among the lowest in mathematics and in the bottom third on science achievement among a group of countries and Canadian provinces. (Tables 372 and 376)
- In a series of science tests administered to a selected group of countries between 1983 and 1986, the U.S. 14-year-olds scored somewhat lower than their peers in 10 other countries, better than 1 other country, and about the same as 5 others. (Table 377)
- Ratios of bachelor's degrees conferred per thousand 22- and 23-year-olds ranged from 53 in Turkey and 72 in Austria to 241 in the U.S. and 263 in Canada. Over 50 percent of all bachelor's degrees were awarded to women in Canada, Finland, Greece, Norway, Spain, Sweden, and the U.S. (Table 380)
- In 1989–90 there were 387,000 foreign students studying at U.S. colleges and universities. This was 20,000 more than the year before, or a 5.6 percent increase, the largest since 1981–82 when the foreign student population rose 6 percent. Approximately 54 percent of the students were from Asian countries. (Table 384)

¹ Enrollment and teacher data exclude the Democratic People's Republic of Korea and South Africa. Expenditure data exclude Democratic Kampuchea, Democratic People's Republic of Korea, Lao People's Democratic Republic, Lebanon, Mongolia, Mozambique, South Africa, and Vietnam.

² Excludes South Africa.

³ Excludes the U.S.S.R. and the Democratic People's Republic of Korea, but includes both the Asian and the European portions of Turkey.

⁴ Includes the U.S.S.R.

⁵ Northern America includes Bermuda, Canada, Greenland, St. Pierre, Miquelon, and the United States of America. Hawaii is included in North America, not Oceania. Central and South America includes the rest of America.

⁶ Includes American Samoa, Australia, Guam, and New Zealand.

⁷ Estimate of midyear population.

⁸ Excludes preprimary, special, and adult education.

⁹ General, teacher training, and other second level education of a vocational and technical nature.

¹⁰ Universities and other institutions of higher education.

NOTE.—Data have been revised from previously published figures. Because of rounding, details may not add to totals.

¹ The scale for the scores ranges from 0 to 1,000, with a mean of 500 and a standard deviation of 100.² Students at this level have the ability to select appropriate basic operations (addition, subtraction, multiplication, and division) to solve simple one-step problems. They can locate numbers on a number line and understand the most basic concepts of logic, percent, estimation, and geometry.³ Students at this level demonstrate an understanding of the concept of order and place value; the meaning of remainder in division; the properties of odd and even numbers.

bers and zero; elementary concepts of ratio and proportion; use of negative and decimal numbers; simple conversions involving fractions, decimals, and percents; and computation of averages. Students can use skills to solve problems requiring two or more steps.

¹ Selection based on total population for midyear 1988.² First level enrollment generally consists of elementary grades.³ Second level enrollment includes general education, teacher training (at the second level), and technical and vocational education. This level generally corresponds to secondary education in the United States.⁴ Third level enrollment includes college and university enrollment, and technical and vocational education beyond the high school level. There is considerable variation in reporting from country to country.⁵ Data are the total enrollment all ages in the school level divided by the population of the specific age groups which correspond to the school level. Adjustments have been made for varying lengths of first- and second-level programs. All third level ratios are based on the 20- to 24 year old population. Because some countries have many students from outside the normal age range, first level ratios may exceed 100.⁶ In many countries and territories, a child may be exempt from school attendance if there is no suitable school within a reasonable distance of his/her home.⁷ Enrollment totals and enrollment ratios exclude North Korea. Enrollment ratios exclude China.⁸ All enrollment ratio data for gross enrollment.⁹ World gross enrollment ratio estimated for 1990.¹⁰ Classification of first and/or second levels have been revised. Data by level may not be comparable over time.¹¹ Provisional or estimated data.¹² Data for 1986.¹³ Data refer only to institutions under the Ministry of Education.¹⁴ Data for 1987.¹⁵ Data for 1984.¹⁶ Eastern Cameroon.¹⁷ Data for 1985.¹⁸ Includes public schools only.¹⁹ Data for 1981.²⁰ Data for 1983.²¹ Includes government maintained and aided schools only.²² Data for 1979.²³ Data for 1989.²⁴ Includes full-time students only.²⁵ Including data from the Indian-held part of Jammu and Kashmir.²⁶ Data pertain to the majority states.²⁷ Including correspondence courses.²⁸ Not including polytechnics.²⁹ Data refer to public universities only.³⁰ Excluding data for Jammu and Kashmir. Also excluded are Junagadh, Manavadar, Gilt and Balistan.³¹ Data include education preceding the first level.³² Data are for 1987 and exclude education preceding the first level.³³ 1987 data for universities only.³⁴ Including UNRWA schools with 36,741 pupils.³⁵ Including UNRWA schools with 16,306 pupils.³⁶ Excludes Open University with an enrollment of 243,825.³⁷ Data for 1975.³⁸ The total number of students (all institutions) is overestimated due to inclusion of enrollment of non-university institutions.³⁹ Includes relevant data for Berlin.⁴⁰ Includes evening and correspondence courses.⁴¹ 1987 data including evening correspondence courses.⁴² Data are for 14- to 19 years.⁴³ Enrollment data and ratios based on data reported by the National Center for Education Statistics and the U.S. Department of Commerce, Bureau of the Census.⁴⁴ Data for 1971.⁴⁵ Data include students at the Open University.⁴⁶ Includes Byelorussian S.S.R. and Ukrainian S.S.R.⁴⁷ Data not available.

¹ For all countries, this table includes students attending precollege mathematics classes at the highest level of secondary school. In some countries, the students had been in school longer than 12 years.² Average of scores on algebra, geometry, and analysis tests with 98 items. This score is based on a standardized distribution of data from all 15 participating countries, then adjusted to a mean of 50 and a standard deviation of 10.

— Data not available.

United States	478.5	78.3	41.8	64.0	52.9	47.7	61.4	56.0

¹ The scale for the scores ranges from 0 to 1,000, with a mean of 500 and a standard deviation of 100.

² Students at this level exhibit a growing knowledge in life sciences and can apply some basic principles from the physical sciences, including force. They also display a beginning understanding of some of the basic methods of reasoning used in science, including classification and interpretation of statements.

³ Students at this level have a grasp of experimental procedures used in science, such as designing experiments, controlling variables, and using equipment. They can identify

the best conclusions drawn from data on a graph and the best explanation for observed phenomena. Students understand some concepts in a variety of science content areas, including the life sciences, physical sciences, and earth and space sciences.

Singapore	13	18.1	17	66.8	3	66.1	5	54.9	7	8
Sweden	12, 13	19.0	⁷ 15	48.5	15	40.0	15	44.8	15	—
United States ⁸	12	17.7	90	37.9	6	37.7	1	45.5	1	⁹ 66

¹ Tests were conducted between 1983 and 1986.

² Data for students not enrolled in science classes.

³ 63 percent of age group were in full-time schooling, but the 18 percent in vocational programs were not sampled.

⁴ Form 6 represents grade 12.

⁵ Form 7 represents grade 13.

⁶ 40 percent of age group were in full-time schooling, but the 22 percent in vocational programs were not sampled.

⁷ An additional 15 percent were enrolled in non-science academic programs and were not sampled.

⁸ United States test scores are included in this table even though they are not directly comparable with scores from other countries. U.S. students were tested for 25 items in

biology and chemistry and 26 items in physics. Other countries were tested with 30 items in each subject.

⁹ Includes students in first-year physics courses.

—Data not available.

NOTE.—The primary sampling units in Hong Kong were classes rather than schools.

CHAPTER 7

Learning Resources and Technology

This chapter contains statistics on libraries and on the use of information technologies. These data show the extent of America's access to information technologies outside of formal classroom activities. The data also provide a capsule description of the magnitude and availability of library resources. Access to information has been widely cited as the key to success in a growing number of endeavors. Thus, how information is made available and to whom become matters of concern.

The tables in this chapter are based on periodic surveys conducted by the National Center for Education Statistics (NCES).

The first section of the chapter has tables dealing with public libraries, public and private school libraries, and college and university libraries. They contain data on collections, population served, staff, and expenditures. Two tables provide institutional-level information for the largest public libraries and the largest college libraries in the country.

The second half of the chapter provides information on the availability and use of technology. For example, the proportion of schools with microcomputers was tabulated for a period of years to permit trend comparisons. Also included are new data on the use of computers by adults and school children, with comparisons between various demographic groups.

Related data may be found in various sections of this report. For example, statistics on the number of degrees conferred in computer and information sciences and library sciences are in chapter 3. Further information on survey methodologies are in the "Guide to Sources" and in the publications cited in the source notes.

Highlights

- In fall 1985, almost 94 percent of all public schools and 75 percent of all private schools had libraries or media centers. (Tables 385 and 388)
- During the 1984-85 school year, public school libraries held an average of 7,668 book titles, 34 periodical subscriptions, 353 audio materials, and 540 films and filmstrips. (Table 387)
- Total expenditures for college libraries rose by 154 percent between 1974-75 and 1987-88. However, the proportion of college budgets spent on libraries

fell from 3.9 percent to 2.9 percent during the same period. (Table 389)

- The number of public schools using microcomputers has risen rapidly in recent years. Between fall 1981 and fall 1986, the proportion of public schools with computers rose from 18 percent to 96 percent. (Table 393)
- About 36 percent of all American workers used computers on their jobs in October 1989. The percentages ranged from 7 percent for workers who did not complete high school to 58 percent for those with 4 or more years of college. Women who have not completed college were more likely to use computers than men who have not completed college. For men and women who have completed 4 years of college, the percentages using computers were about the same. Computer users with higher levels of education were more likely to use their computers for more diverse applications than those with lower levels of education. (Table 394)
- The total computer usage rate of students at school increased from 27.3 percent in October 1984 to 42.7 percent in October 1989. The rate at the pre-kindergarten and kindergarten level increased more than twofold. The rate at the first-through eighth-grade level increased by about two-thirds. (Table 395)
- More than half (52 percent) of all elementary school children used computers at school in October 1989. The computer usage rate was 39 percent for students in high school and college. Sizeable percentages of students used computers at home, though fewer actually used them for schoolwork. About 18 percent of elementary school children used computers at home and about 6 percent used them for schoolwork. Students at the high school and undergraduate level were about twice as likely as the elementary school children to use home computers for schoolwork. In general, students in higher income families were more likely to use computers at home and use them for schoolwork than were students from lower income families. (Table 395)

¹ The time period covered was generally calendar or fiscal 1989, although for some states, the latest data available covered calendar year 1988.² Attendance is the total number of persons entering the library including persons attending activities, meetings, and those persons requiring no staff services.³ A reference transaction is an information contact which involves the knowledge, use, recommendation, interpretation or instructions in the use of one or more information sources by a member of the library staff.

Guide To Tabular Presentation

This section is intended to assist the reader in following the basic structure of the *Digest* tables and to provide a legend for some of the common symbols and indexes used throughout the book. Unless otherwise noted, all data are for the 50 States and the District of Columbia.

Table Components

Title Describes the table content concisely.

Unit indicator Informs the reader of the measurement unit in the table—"In thousands," "In millions of dollars," etc. Noted below the title unless several units are used, in which case the unit indicators are generally given in the spanner or individual column heads.

Spanner Describes a group of two or more columns.

Column head Describes specific column.

Stub Describes a row or a group of rows. Each stub is followed by a number of dots (leaders) or by a semi-colon if no data appears in the data fields.

Field The area of the table which contains the data elements.

Rules in the field

Single horizontal rules indicate

- that the data below the line add to the figure immediately above the line, or
- in the case of derived figures (e.g., percents, medians) that the datum above the line represents a cumulative figure.

Double horizontal rules demarcate groups of related rows.

Single vertical rules delineate columns.

Double vertical rules divide the table into sections with unique stubs.

Example of Table Structure

Table 0.—Total enrollment in institutions of higher education, by type and control of institution: Fall 1979 to fall 1985
(In thousands)

Type and control of institution	Year				
	1979	1981	1983	1985	Percent change, 1979 to 1985
1	2	3	4	5	6
All institutions	11,570	12,372	12,465	12,247	5.85
Universities	2,840	2,901	2,889	2,871	1.10
Other 4-year institutions	4,514	4,754	4,852	4,845	7.35
2-year institutions	4,217	4,716	4,723	4,531	7.46
Public institutions	9,037	9,647	9,683	9,479	4.90
Universities	2,100	2,152	2,155	2,141	1.98
Other 4-year institutions	2,880	3,014	3,069	3,068	6.52
2-year institutions	4,057	4,481	4,459	4,270	5.25
Private institutions	2,533	2,725	2,782	2,768	9.27
Universities	740	749	734	730	-1.42
Other 4-year institutions	1,633	1,740	1,784	1,777	8.80
2-year institutions	160	236	264	261	'63.49

Footnote → *Large percentage increase is due primarily to the addition of colleges accredited by the National Association of Trade and Technical Schools in 1980 and 1981.

Note → NOTE.—Includes undergraduate, graduate, first-professional, and unclassified students.

Source → SOURCE: U.S. Department of Education, Center for Education Statistics, "Fall Enrollment in Colleges and Universities" surveys. (This table was prepared July 1986.)

Footnote Describes a unique circumstance relating to a specific item within the table. Usually listed below the bottom rule of the table.

Note Furnishes general information that relates to the entire table.

Source The document or reference from which the data are drawn. This note may also include the organizational unit responsible for preparing the data.

Descriptive Terms

Average A number that is used to represent the "typical value" of a group of numbers. It is regarded as a measure of "location" or "central tendency" of a group of numbers.

Arithmetic mean is the most commonly used average. It is derived by summing the individual item values of a particular group and dividing that sum by the number of items. This value is often referred to simply as the "mean" or "average."

Median is the measure of central tendency that occupies the middle position in a rank order of values. It generally has the same number of items above it as below it. If there is an even number of items in the group, the median is the average of the middle two items.

Per capita, or per person, figure represents an average computed for every person in a specified group, or population. It is derived by dividing the total for an item (such as income or expenditures) by the number of persons in the specified population.

Index number A value that provides a means of measuring, summarizing, and communicating the nature of changes that occur from time to time or from place to place. An index is used to express changes in prices over periods of time but may also be used to express differences between related subjects at a single point in time.

The *Digest* most often uses the Consumer Price Index to compare purchasing power over time.

To compute a price index, a base year or period is selected. The base year price is then designated as the base or reference price to which the prices for other years or periods are related.

A method of expressing the price relationship is:

Index number =

$$\frac{\text{Price of a set of one or more items for related year}}{\text{Price of the same set of items for base year}} \times 100$$

When 100 is subtracted from the index number, the result equals the percent change in price from the base year.

Current and constant dollars are used in a number of tables to express finance data. Unless otherwise noted, all figures are in current dollars, not adjusted for inflation. Constant dollars provide a measure of the impact of inflation on the current dollars.

Current dollar figures reflect actual prices or costs prevailing during the specified year(s).

Constant dollar figures attempt to remove the effects of price changes (inflation) from statistical series reported in dollar terms.

The constant dollar value for an item is derived by dividing the base year price index (for example, the Consumer Price Index for 1986) by the price index for the year of data to be adjusted and multiplying by the item to be adjusted. The result is an adjusted dollar value as it would presumably exist if prices were the same as the base year—in other words, as if the dollar had constant purchasing power. Any changes in the constant dollar amounts would reflect only changes in the real values.

NOTE: Tables may not include data for all years implied in table titles.

Guide to Sources

Sources and Comparability of Data

The information presented in this report was obtained from many sources, including Federal and State agencies, private research organizations, and professional associations. The data were collected using many research methods, including surveys of a universe (such as all colleges) or of a sample, compilations of administrative records, and statistical projections. *Digest* users should take particular care when comparing data from different sources. Differences in procedures, timing, phrasing of questions, interviewer training, and so forth mean that the results from the different sources may not be strictly comparable. Following the general discussion of data accuracy below, descriptions of the information sources and data collection methods are presented, grouped by sponsoring organization. More extensive documentation of a particular survey's procedures does not imply more problems with the data, only that more information is available.

Accuracy of Data

The accuracy of any statistic is determined by the joint effects of "sampling" and "nonsampling" errors. Estimates based on a sample will differ somewhat from the figures that would have been obtained if a complete census had been taken using the same survey instruments, instructions, and procedures. In addition to such sampling errors, all surveys, both universe and sample, are subject to design, reporting, and processing errors and errors due to nonresponse. To the extent possible, these nonsampling errors are kept to a minimum by methods built into the survey procedures. In general, however, the effects of nonsampling errors are more difficult to gauge than those produced by sampling variability.

Sampling Errors

The samples used in surveys are selected from a large number of possible samples of the same size that could have been selected using the same sample design. Estimates derived from the different samples would differ from each other. The difference between a sample estimate and the average of all possible samples is called the sampling deviation. The standard or sampling error of a survey estimate is a

measure of the variation among the estimates from all possible samples and, thus, is a measure of the precision with which an estimate from a particular sample approximates the average result of all possible samples.

The sample estimate and an estimate of its standard error permit us to construct interval estimates with prescribed confidence that the interval includes the average result of all possible samples. If all possible samples were selected under essentially the same conditions and an estimate and its estimated standard error were calculated from each sample, then: 1) approximately 2/3 of the intervals from one standard error below the estimate to one standard error above the estimate would include the average value of all possible samples; and 2) approximately 19/20 of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average value of all possible samples. We call an interval from two standard errors below the estimate to two standard errors above the estimate a 95 percent confidence interval.

To illustrate this concept, consider the table of standard errors and 95 percent confidence intervals for estimates from the "1985 Survey of Public and Private School Libraries and Media Centers" sample (table A1, below). For the estimate that 93.5 percent of all schools have library programs, the table shows that the standard error is 0.54 percent. Therefore, we can create a 95 percent confidence interval which is approximately 92.4 to 94.6 (93.5 percent $\pm$ 2 times 0.54 percent).

Analysis of standard errors can help assess how valid a comparison between two estimates might be. The standard error of a difference between two independent sample estimates is equal to the square root of the sum of the squared standard errors of the estimates. The standard error (se) of the difference between independent sample estimates "a" and "b" is:

$$se_{a-b} = \sqrt{se_a^2 + se_b^2}$$

It should be noted that most of the standard error estimates presented in subsequent sections and in the original documents are approximations. That is, to derive estimates of standard errors that would be

applicable to a wide variety of items and could be prepared at a moderate cost, a number of approximations were required. As a result, the standard error estimates provide a general order of magnitude rather than the exact standard error for any specific item. The preceding discussion on sampling variability was directed toward a situation concerning one or two estimates. Determining the accuracy of statistical projections is more difficult. In general, the further away the projection date is from the date of the actual data being used for the projection, the greater the probable error in the projections. If, for instance, annual data from 1970 to 1988 are being used to project enrollment in institutions of higher education, the further beyond 1989 one projects, the more variability in the projection. One will be less sure of the 1995 enrollment projection than of the 1990 projection. A detailed discussion of the projections methodology is contained in *Projections of Education Statistics to 2000* (National Center for Education Statistics, 1989).

Nonsampling Errors

Universe and sample surveys are subject to nonsampling errors. Nonsampling errors may arise when respondents or interviewers interpret questions differently, when respondents must estimate values, or when coders, keyers, and other processors handle answers differently, when persons who should be included in the universe are not, or when persons fail to respond (completely or partially). Nonsampling errors usually, but not always, result in an understatement of total survey error and thus an overstatement of the precision of survey estimates. Since estimating the magnitude of nonsampling errors often would require special experiments or access to independent data, these magnitudes are seldom available.

To compensate for nonresponse, adjustments of the sample estimates are often made. An adjustment made for either type of nonresponse, total or partial, is often referred to as an imputation—substitution of the "average" questionnaire response for the nonresponse. Imputations are usually made separately within various groups of sample members which have similar survey characteristics. Imputation for item nonresponse is usually made by substituting for a missing item the response to that item of a respondent having characteristics that are similar to those of the nonrespondent.

Although the magnitude of nonsampling error in the data collected in this *Digest* is frequently unknown, idiosyncrasies that have been identified are noted on the appropriate tables.

Federal Agency Sources

National Center for Education Statistics (NCES)

Common Core of Data

NCES uses the Common Core of Data (CCD) survey to acquire and maintain statistical data on the 50 States, the District of Columbia, and the outlying areas from the universe of State-level education agencies. Information about staff and students is collected annually at the school, LEA (local education agency or school district), and State levels. Information about revenues and expenditures is also collected at the State level.

Data are collected for a particular school year (July 1 through June 30) via survey instruments sent to the States by October 15 of the subsequent school year. States have 2 years in which to modify the data originally submitted.

Since the CCD is a universe survey, the CCD information presented in this edition of the *Digest* is not subject to sampling errors. However, nonsampling errors could come from two sources—nonreturn and inaccurate reporting. Almost all of the States submit the six CCD survey instruments each year, but submissions are sometimes incomplete or too late for publication.

Understandably, when 57 education agencies compile and submit data for over 85,000 public schools and approximately 15,000 local school districts, misreporting can occur. Typically, this results from varying interpretation of NCES definitions and differing recordkeeping systems. NCES attempts to minimize these errors by working closely with the Council of Chief State School Officers (CCSSO) and its Committee on Evaluation and Information Systems (CEIS).

The State education agencies report data to NCES from data collected and edited in their regular reporting cycles. NCES encourages the agencies to incorporate into their own survey systems the NCES items they do not already collect so that those items will also be available for the subsequent CCD survey. Over time, this has meant fewer missing data cells in each State's response, reducing the need to impute data.

NCES subjects data from the education agencies to a comprehensive edit. Where data are determined to be inconsistent, missing, or out of range, NCES contacts the education agencies for verification. NCES-prepared State summary forms are returned to the State education agencies for verification. States are also given an opportunity to revise their State-level aggregates from the previous survey

cycle. Questions concerning the Common Core of Data can be directed to:

Federal Funds for Education

NCES prepares an annual compilation of Federal funds for education. Data for U.S. Department of Education program totals came from the *Budget of the U.S. Government*. Budget offices of other Federal agencies provided information for all other Federal program support except for research funds, which are obligations reported by the National Science Foundation in *Federal Funds for Research and Development*, fiscal years 1965 to 1990. Some data are estimated, based on reports from the Federal agencies contacted and the *Budget of the U.S. Government, Fiscal Year 1992*.

Except for money spent on research, outlays were used to report program funds to the extent possible. Some tables are obligations as noted in the title of the table. Some Federal program funds not commonly recognized as education assistance are also included in the totals reported. For example, portions of Federal funds paid to some States and counties as shared revenues resulting from the sale of timber and minerals from public lands have been estimated as funds used for education purposes. Parts of the funds received by States (in 1980) and localities (throughout the period) under the General Revenue Sharing Program are also included, as are portions of Federal funds received by the District of Columbia. The share of these funds allocated to education was assumed equal to the share of general funds expended for elementary and secondary education by States and localities in the same year as reported by the U.S. Bureau of the Census in its annual publication, *Governmental Finances*.

All State intergovernmental expenditures for education were assumed earmarked for elementary/secondary education. Contributions of parent governments of dependent school systems to their public schools amounted to approximately 9 percent of local government revenues and local government revenue sharing in each year. Therefore, 9 percent of local government revenue-sharing funds were assumed allocated each fiscal year to elementary and secondary education. Parent government contributions to public school systems were obtained from the U.S. Bureau of the Census, *Finances of Public School Systems*. The amount of State revenue-sharing funds allocated for postsecondary education in 1980 was assumed to

be 13 percent, the proportion of direct State expenditures for institutions of higher education reported in *Governmental Finances* for that year.

The share of Federal funds for the District of Columbia assigned to education was assumed equal to the share of the city's general fund expenditures for each level of education.

For the job training programs conducted by the Department of Labor, only estimated sums spent on classroom training have been reported as educational program support.

During the 1970s, the Office of Management and Budget (OMB) prepared annual reports on Federal education program support. These were published in *Budget of the U.S. Government [Special Analyses]*. The information presented in this report is not, however, a continuation of the OMB series. A number of differences in the two series should be noted. OMB required all Federal agencies to report outlays for education-related programs using a standardized form, thereby assuring agency compliance in reporting. The scope of education programs reported here differs from OMB. Off-budget items such as the annual volume of guaranteed student loans were not included in OMB's reports. Finally, while some mention is made of an annual estimate of Federal tax expenditures, OMB did not include them in its annual analysis of Federal education support. Estimated Federal tax expenditures for education are the difference between current Federal tax receipts and what these receipts would be without existing education deductions to income allowed by Federal tax provisions.

Recipients' data are estimated based on *Estimating Federal Funds for Education: A New Approach Applied to Fiscal Year 1980*, U.S. Department of Education, "Federal Support for Education, Fiscal Years 1980 to 1984," and *Catalog of Federal Domestic Assistance*. The recipients' data are estimated and tend to undercount institutions of higher education (IHEs), students, and local education agencies (LEAs). This is because some of the Federal programs have more than one recipient receiving funds. In these cases the recipients were put into a "mixed recipients" category, because there was no way to disaggregate the amount each recipient received.

High School and Beyond

High School and Beyond (HSB) is a national longitudinal survey of 1980 high school sophomores and seniors. The base-year survey was a probability sample of 1,015 high schools with a target number of 36 sophomores and 36 seniors in each of the schools. A total of 58,270 students participated in the base-year survey. Substitutions were made for noncooperating schools—but not for students—in those strata where it was possible. Overall, 1,122

schools were selected in the original sample and 811 of these schools participated in the survey. An additional 204 schools were drawn in a replacement sample. Student refusals and student absences resulted in an 82 percent completion rate for the survey.

Several small groups in the population were oversampled to allow for special study of certain types of schools and students. Students completed questionnaires and took a battery of cognitive tests. In addition, a sample of parents of sophomores and seniors (about 3,600 for each cohort) was surveyed.

HSB first followup activities took place in the spring of 1982. The sample design of the first followup survey called for the selection of approximately 30,000 persons who were sophomores in 1980. The completion rate for sophomores eligible for on-campus survey administration was about 96 percent. About 89 percent of the students who left school between the base year and first followup surveys (dropouts, transfer students, and early graduates) completed the first followup sophomore questionnaire.

As part of the first followup survey of High School and Beyond, transcripts were requested in fall 1982 for an 18,152-member subsample of the sophomore cohort. Of the 15,941 transcripts actually obtained, 1,969 were excluded because the students had dropped out of school before graduation, 799 were excluded because they were incomplete, and 1,057 were excluded because the student graduated before 1982 or the transcript indicated neither a dropout status nor graduation. Thus 12,116 transcripts were utilized for the overall curriculum analysis presented in this publication. All courses in each transcript were assigned a six-digit code based on *A Classification of Secondary School Courses* (developed by Evaluation Technologies, Inc. under contract with NCES). Credits earned in each course were expressed in Carnegie units. (The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. To receive credit for a course, the student must have received a passing grade—"pass," "D," or higher.) Students who transferred from public to private schools or from private to public schools between their sophomore and senior years were eliminated from public/private analyses.

In designing the senior cohort first followup survey, one of the goals was to reduce the size of the retained sample, while still keeping sufficient numbers of minorities to allow important policy analyses. A total of 11,227 (94 percent) of the 11,995 persons subsampled completed the questionnaire. Information was obtained about the respondents' school and employment experiences, family status, and attitudes and plans.

The sample for the second followup, which took place in spring 1984, consisted of about 12,000

members of the senior cohort and about 15,000 members of the sophomore cohort. The completion rate for the senior cohort was 91 percent, and the completion rate for the sophomore cohort was 92 percent.

HSB third followup data collection activities were performed in spring of 1986. Both the sophomore and senior cohort samples for this round of data collection were the same as those used for the second followup survey. The completion rates for the sophomore and senior cohort samples were 91 percent and 88 percent, respectively.

Table A2 contains the maximum number of cases that are available for the tabulations of the specific classification variables used throughout this publication.

The standard error (se) of an individual percentage (p) based on HSB data can be approximated by the formula

$$se_p = DEFT \sqrt{p(100-p)/n}$$

where n is the sample size and DEFT, the square root of the design effect, is a factor used to adjust for the particular sample design used in HSB. Table A3 provides the DEFT factors for different HSB samples and subsamples.

In evaluating a difference between two independent percentages, the standard error of the difference may be conservatively approximated by taking the square root of the sum of the squared standard errors of the two percentages. For example, in the 1986 followup of 1980 sophomores, 84.0 percent of the men and 77.2 percent of the women 'felt that being successful in work was "very important," a difference of 6.8 percentage points. Using the formula and the sample sizes from table A2 and the DEFT factors from table A3, the standard errors of the two percentages being compared are calculated to be:

$$1.43 \sqrt{(84.0)(16.0)/5,391} = .714$$

$$1.43 \sqrt{(77.2)(22.8)/5,857} = .784$$

The standard error of the difference is therefore

$$\sqrt{.714^2 + .784^2} = \sqrt{.510 + .615} = 1.06$$

The sampling error (95 chances in 100) of the difference is approximately double the standard error, or approximately 2.1 percentage points, and the 95 percent confidence interval for the difference is 6.8 ± 2.1 , or 4.7 to 8.9 percentage points.

The standard error estimation procedure outlined above does not compensate for survey item

nonresponse, which is a source of nonsampling error. (Table A2 reflects the maximum number of responses that could be tabulated by demographic characteristic.) For example, of the 10,925 respondents in the 1984 followup survey of 1980 high school graduates, 372, or 3.4 percent, did not respond to the particular question on whether they had ever used a pocket calculator. Item nonresponse varied considerably. A very low nonresponse rate of 0.1 percent was obtained for a question asking whether the respondent had attended a postsecondary institution. A much higher item nonresponse rate of 12.2 percent was obtained for a question asking if the respondent had used a micro or minicomputer in high school. Typical item nonresponse rates ranged from 3 to 4 percent.

The Hispanic analyses presented in this report relied on students' self-identification as members of one of four Hispanic subgroups: Mexican, Mexican-American, Chicano; Cuban, Cubano; Puerto-Rican, Puertorriqueno, or Boricua; or other Latin American, Latino, Hispanic, or Spanish descent.

An NCES series of technical reports and data file users manuals provides additional information on the survey methodology.

Washington, DC 20208-5652

1987 High School Transcript Study

Transcripts of 1987 high school graduates were compared with transcripts of 1982 graduates to describe changes in course taking across this 5-year period. The analyses were based on approximately 22,700 transcripts of 1987 graduates selected for the National Assessment of Educational Progress (NAEP), and 12,000 transcripts of 1982 graduates who participated in the High School and Beyond study (see corresponding source note above in this appendix).

The sample of schools for the 1987 High School Transcript Study consisted of a nationally representative sample of 471 eligible secondary schools selected for the 1986 NAEP for grade 11 students; 433 of the schools participated. Only those students who graduated from high school were selected from both studies. Handicapped students (those students receiving special education) were not included.

Integrated Postsecondary Education Data System

The Integrated Postsecondary Education Data System (IPEDS) surveys all postsecondary institutions, including universities and colleges, as well as institutions offering technical and vocational education beyond the high school level. This survey, which began in 1986, replaces and supplements the Higher Education General Information Survey (HEGIS).

The IPEDS consists of several integrated components that obtain information on who provides postsecondary education (institutions), who participates in it and completes it (students), what programs are offered and what programs are completed, and both the human and financial resources involved in the provision of institutionally based postsecondary education. Specifically, these components include: institutional characteristics, including institutional activity; fall enrollment, including age and residence; fall enrollment in occupationally specific programs; completions; finance; staff; salaries of full-time instructional faculty; and academic libraries.

The higher education portion of this survey is a census of accredited 2- and 4-year colleges. However, data from the technical and vocational institutions are collected through a sample survey. Thus, some portions of the data will be subject to sampling and nonsampling errors, while some portions will be subject only to nonsampling errors. The tabulations on institutional characteristics developed for this edition of the *Digest* are based on lists of all institutions and are not subject to sampling errors.

Prior to the establishment of IPEDS in 1986, the Higher Education General Information Survey (HEGIS) acquired and maintained statistical data on the characteristics and operations of institutions of higher education. Implemented in 1966, HEGIS was an annual universe survey of institutions listed in the latest *NCES Education Directory, Colleges and Universities*.

The trend tables presented in this report draw on HEGIS surveys which solicited information concerning institutional characteristics, faculty salaries, finances, enrollment, and degrees. Since these surveys were distributed to all higher education institutions, the data presented were not subject to sampling error. However, they were subject to

nonsampling error, the sources of which varied with the survey instrument. Each survey is, therefore, discussed separately. Information concerning the nonsampling error of the enrollment and degrees surveys draws extensively on the "HEGIS Post-Survey Validation Study" conducted in 1979.

Further information on IPEDS may be obtained from:

William Freund
Postsecondary Education Statistics Division
National Center for Education Statistics
555 New Jersey Avenue NW
Washington, DC 20208-5652

Institutional Characteristics

This survey provided the basis for the universe of institutions presented in the *Education Directory, Colleges and Universities*, and it was used in all other IPEDS data collection activities. The universe comprised institutions that met certain accreditation criteria and offered at least a 1-year program of college-level studies leading toward a degree. All of these institutions were certified as eligible by the U.S. Department of Education's Division of Eligibility and Agency Evaluation. Each fall, institutions listed in the previous year's Directory were asked to update a computer printout of their information.

Fall Enrollment

This survey has been part of the IPEDS or HEGIS series since 1966. The enrollment survey response rate was relatively high; the 1989 response rate was 86.1 percent. Major sources of nonsampling error for this survey were classification problems, the unavailability of needed data, interpretation of definitions, the survey due date, and operational errors. Of these, the classification of students appears to have been the main source of error. Institutions had problems in correctly classifying first-time freshmen, other first-time students, and unclassified students for both full-time and part-time categories. These problems occurred most often at 2-year institutions (private and public) and private 4-year institutions. In the 1977-78 HEGIS validation studies, the classification problem led to an estimated overcount of 11,000 full-time students and an undercount of 19,000 part-time students. Although the ratio of error to the grand total was quite small (less than 1 percent), the percentage of errors was as high as 5 percent for detailed student levels and even higher at certain aggregation levels.

Beginning with fall 1986, the survey system was redesigned with the introduction of the Integrated Postsecondary Education Data System (IPEDS) (see above). The new survey system comprises all postsecondary institutions, but also maintains comparabil-

ity with earlier surveys by allowing HEGIS institutions to be tabulated separately. The new system also provides for preliminary and revised data releases. This allows the Center flexibility to release early data sets while still maintaining a more accurate final data base.

Salaries, Tenure, and Fringe Benefits of Full-Time Instructional Faculty

This survey has been conducted for most years from 1966-67 to 1985-86, and in 1987-88 and 1989-90. Although the survey form was changed a number of times during those years, only comparable data are presented in this report. The data were collected from the individual colleges and universities.

This survey differed from other HEGIS surveys in that imputations were not made for nonrespondents. Thus, there is some possibility that the salary averages presented in this report may differ from the results of a complete enumeration of all colleges and universities. Beginning with the surveys for 1987-88, the IPEDS data tabulation procedures included imputations for survey nonrespondents. The response rate for the 1989-90 survey was 80.5 percent. The response rate for public colleges was substantially higher than the response rate for private colleges. Thus it is probable that the public colleges' salary data are more accurate than the data for private colleges. Other sources of nonsampling error included computational errors and misclassification in reporting and processing. NCES checked individual colleges' data for internal and longitudinal consistency and contacted the colleges to check inconsistent data.

Completions

This survey was part of the HEGIS series throughout its existence. However, the degree classification taxonomy was revised in 1970-71 and 1982-83. Collection of degree data has been maintained through the IPEDS system.

Though information from survey years 1970-71 through 1981-82 is directly comparable, care must be taken if information before or after that period is included in any comparison. Degrees-conferred trend tables arranged by the 1982-83 classification were added to the *Digest* to provide consistent data from 1970-71 to 1988-89. Data in this edition on associate and other formal awards below the baccalaureate, by field of study, are not comparable with figures for earlier years. The nonresponse rate did not appear to be a significant source of nonsampling error for this survey. The return rate over the years was extremely high, with the response rate for the 1988-89 survey at 76.3 percent. Because of the high return rate, nonsampling error caused by imputation was also minimal.

The major sources of nonsampling error for this survey were differences between the NCES program taxonomy and taxonomies used by the colleges, classification of double majors and double degrees, operational problems, and survey timing. In the 1979 HEGIS validation study, these sources of nonsampling were found to contribute to an error rate of 0.3 percent overreporting of bachelor's degrees and 1.3 percent overreporting of master's degrees. The differences, however, varied greatly among fields. Over 50 percent of the fields selected for the validation study had no errors identified. Categories of fields that had large differences were business and management, education, engineering, letters, and psychology. It was also shown that differences in proportion to the published figures were less than 1 percent for most of the selected fields that had some errors. Exceptions to these were: master's and Ph.D. programs in labor and industrial relations (20 percent and 8 percent); bachelor's and master's programs in art education (3 percent and 4 percent); bachelor's and Ph.D. programs in business and commerce, and in distributive education (5 percent and 9 percent); master's programs in philosophy (8 percent); and Ph.D. programs in psychology (11 percent).

Financial Statistics

This survey was part of the HEGIS series and has been continued under the IPEDS system. Changes were made in the financial survey instruments in fiscal years (FY) 1976, 1982, and 1987. The FY 76 survey instrument contained numerous revisions to earlier survey forms and made direct comparisons of line items very difficult. Beginning in FY 82, Pell Grant data were collected in Federal restricted grants and contracts revenues and restricted scholarships and fellowships expenditures. The introduction of the Integrated Postsecondary Education Data System (IPEDS) in the FY 87 survey included several important changes to the survey instrument and data processing procedures. While these changes were significant, considerable effort has been made to present only comparable information on trends in this report and to note inconsistencies. Finance tables for this publication have been adjusted by subtracting the largely duplicative Pell Grant amounts from the later data to maintain comparability with pre-FY 82 data.

Possible sources of nonsampling error in the financial statistics include nonresponse, imputation, and misclassification. The response rate has been about 85 to 90 percent for most of the years reported. The response rate for the FY 1989 survey was 83.5 percent.

Two general methods of imputation were used in HEGIS. If the prior year's data were available for a nonresponding institution, these data were inflated

using the Higher Education Price Index and adjusted according to changes in enrollments. If no previous year's data were available, current data were used from peer institutions selected for location (State or region), control, level, and enrollment size of institution. In most cases estimates for nonreporting institutions in IPEDS were made using data from peer institutions.

Beginning with FY 87, the new survey system (IPEDS, see above) comprises all postsecondary institutions, but also maintains comparability with earlier surveys by allowing 2- and 4-year HEGIS institutions to be tabulated separately. The finance data tabulated for this publication reflect totals for the HEGIS or higher education institutions only. In order to maintain comparability with the historical time series of HEGIS institutions, data were combined from two of the three different survey forms that make up the IPEDS survey system. The vast majority of the data were tabulated from Form 1, which was used to collect information from public and private nonprofit 2- and 4-year colleges. Form 2, a condensed form, was used to gather data for the 2-year proprietary institutions. Because of the differences in the data requested on the two forms, several assumptions were made about the Form 2 reports so that their figures could be included in the institutions of higher education totals.

In the section on revenue, the Form 2 institutions were not asked to separate appropriations from grants and contracts, nor State from local sources of funding. For the Form 2 institutions, all the Federal revenues were assumed to be Federal grants and contracts and all of the State and local revenues were assumed to be restricted State grants and contracts. All other Form 2 sources of revenue, except for tuition and fees and sales and services of educational activities, were included under "other." Similar adjustments were made to the expenditures accounts. The Form 2 institutions reported instruction and scholarship and fellowship expenditures only. All other educational and general expenditures were allocated to academic support.

To reduce reporting error, NCES used national standards for reporting finance statistics. These standards are contained in *Colleges and University Business Administration: Administrative Services (1974 Edition)*, published by the National Association of College and University Business Officers; *Audits of Colleges and Universities* (as amended August 31, 1974), by the American Institute of Certified Public Accountants; and *HEGIS Financial Reporting Guide (1980)*, by NCES. Wherever possible, definitions and formats in the survey form are consistent with those in these three accounting texts.

Questions concerning the surveys used as data sources for this report or other questions concerning HEGIS can be directed to:

National Assessment of Educational Progress

The National Assessment of Educational Progress (NAEP) is a cross-sectional study designed and initially implemented in 1969. NAEP has gathered information about selected levels of educational achievement across the country. NAEP has surveyed the educational attainments of 9-, 13-, and 17-year-olds and young adults (ages 25-35) in 10 learning areas. Different learning areas have been assessed periodically, and all areas have been reassessed in order to measure possible changes in educational achievement.

The assessment data presented in this publication was designed and conducted by the Education Commission of the States (1969-1983) and by the Educational Testing Service (1983 to present). Three-stage probability samples have been used. The primary sampling units have been stratified by region and, within region, by State, size of community, and, for the two smaller sizes of community strata, by socioeconomic level. The first stage of sampling entails defining and selecting primary sampling units (PSU's). For each age/grade level (3, 7, and 11), the second stage entails enumerating, stratifying, and randomly selecting schools, both public and private, within each PSU selected at the first stage. The third stage involves randomly selecting students within a school for participation in NAEP. Assessment exercises have been administered either to individuals or to small groups of students by specially trained personnel.

After NAEP data are scored, they are weighted in accordance with the population structure and adjusted for nonresponse. Analyses include computing the percentage of students giving various responses and using Item Response Theory (IRT) technology to estimate levels of achievement for the nation and various subpopulations. IRT technology enables the assessment of a sample of students in a learning area or subarea on a single scale even if different students have been administered different exercises. The underlying principle is that when a number of items require similar skills, the regularities observed across patterns of response can often be used to characterize both respondents and tasks in terms of a relatively small number of variables. When aggregated through appropriate mathematical formulas,

these variables capture the dominant features of the data.

Sample sizes for the reading proficiency portion of the 1987-88 NAEP study were 3,782 for the 9-year-olds, 4,005 for the 13-year-olds, and 3,652 for the 17-year-olds. Response rates were 92 percent, 88 percent, and 77 percent, respectively. Response rates for earlier years (1970-71, 1974-75, and 1979-80) were generally lower. For example, the lowest response rate for the 9-year-olds was 88 percent in 1974-75, and the lowest response rate over all was 70 percent for the 17-year-olds in 1974-75. Data on standard errors are provided in table A4.

The 1987-88 U.S. history assessment data in this report are based on a nationally representative sample of 3,950 4th graders, 6,462 8th graders, and 5,507 12th graders. The response rates were: 93 percent for 4th graders, 88 percent for 8th graders, and 78 percent for 12th graders. Data on standard errors are provided in table A5.

The 1987-88 U.S. civics assessment trend data in this report are based on a nationally representative sample of 1,938 13-year-olds and 1,786 17-year-olds. The response rates were 90 percent for the 8th graders and 79 percent for the 17-year-olds in 1987-88. Sample sizes for the earlier years were much larger with 19,952 13-year-olds and 17,866 17-year-olds in 1976 and 7,268 13-year-olds and 6,751 17-year-olds in 1982. The 1987-88 analyses for 4th, 8th, and 12th graders were based on a somewhat different 1987-88 sample. The sample sizes were 1,974 4th graders, 4,487 8th graders, and 4,275 12th graders. The response rates were: 93 percent for 4th graders, 88 percent for 8th graders, and 78 percent for 12th graders. Data on standard errors are provided in table A5.

The 1983-84 NAEP writing assessment used a stratified, three-stage sampling design. The first stage was counties (or aggregates of counties). The second stage was schools, and the third stage involved selecting students within the schools at random. The 1983-84 assessment included 24,437 students at age 9; 26,228 students at age 13; and 28,992 students at age 17. Student response rates for the 1987-88 writing assessment were 92 percent for the 9-year-olds, 88 percent for the 13-year-olds, and 77 percent for the 17-year-olds. Sample sizes varied depending on the test items and the scoring method used. Table A5 contains standard errors for selected estimates.

The 1985-86 NAEP mathematics and science assessments were administered to 6,932 students age 9; 6,200 students age 13; and 3,868 students still in school at age 17. The response rates were: 93 percent for the 9-year-olds, 89 percent for the 13-year-olds, and 79 percent for the 17-year-olds. Table A6 contains standard errors for selected estimates.

The 1987-88 geography assessment was administered to 3,030 high school students. The response rate for the assessment was 77 percent. The National Geographic Society provided support for conducting the assessment.

The literacy assessment data used in this report are based on a nationally representative household sample of 21- to 25-year-olds. Blacks and Hispanics were oversampled to allow samples of sufficient size for reliable results. A total of 38,400 households were screened to locate 4,494 potential respondents. (No more than one person was surveyed from any one household.) Of the potential respondents, 3,618 young adults participated, resulting in a response rate of 80 percent.

Information from NAEP is subject to both nonsampling and sampling error. Two possible sources of nonsampling error are nonparticipation and instrumentation. Certain populations have been oversampled to assure samples of sufficient size for analysis. Instrumentation nonsampling error could result from failure of the test instruments to measure what is being taught and, in turn, what is being learned by the students.

National Education Longitudinal Study of 1988

The National Education Longitudinal Study of 1988 (NELS:88) is the third major longitudinal study sponsored by the National Center for Education Statistics. The two studies that preceded NELS:88, the National Longitudinal Study of the High School Class of 1972 (NLS-72) and High School and Beyond (HS&B), surveyed high school seniors (and sophomores in HS&B) through high school, postsecondary education, and work and family formation experiences. Unlike its predecessors, NELS:88 begins with a cohort of eighth grade students. In 1988, some 26,000 eighth graders, their parents, their teachers, and their school principals were surveyed. The first followup will revisit the same sample of students in 1990, when they are in the 10th grade.

NELS:88 is designed to provide trend data about critical transitions experienced by young people as they develop, attend school, and embark on their careers. It will complement and strengthen State and local efforts by furnishing new information on how school policies, teacher practices, and family involvement affect student educational outcomes (i.e., academic achievement, persistence in school, and par-

ticipation in postsecondary education). For the base year, NELS:88 is a multifaceted study questionnaire and four cognitive tests, a parent questionnaire, a teacher questionnaire, and a school questionnaire.

Designed to ensure that private schools, rural schools, and schools with high minority membership were adequately represented, sampling was first conducted at the school level and then at the student level within schools. Additionally, oversamples of students with Hispanic and Asian or Pacific Island heritage were drawn. The data represented in this edition of the *Digest* are drawn from a nationally representative sample of 1,000 schools (800 public schools; and 200 private schools, including parochial institutions). Within this school sample, 26,000 eighth-grade students were selected at random. Followups to this survey are to be conducted every 2 years, the first occurring in 1990.

Further information about the NELS:88 survey can be obtained from:

Washington, DC 20208-5651

National Longitudinal Study

The National Longitudinal Study (NLS) of the High School Class of 1972 began with the collection of base-year survey data from a sample of about 19,000 high school seniors in spring of 1972. Five more followup surveys of these students were conducted in 1973, 1974, 1976, 1979, and 1986. The NLS was designed to provide the education community with information on the transitions of young adults from high school through postsecondary education and the workplace.

The sample design for the NLS is a stratified, two-stage probability sample of students from all schools, public and private, in the 50 States and the District of Columbia with a 12th-grade enrollment during the 1971-72 school year. During the first stage of sampling, about 1,070 schools were selected for participation in the base-year survey. As many as 18 students were selected at random from each of the sample schools. Both the size of the school and student samples were increased during the first followup survey. Beginning with the first followup and continuing through the fourth followup, about 1,300 schools participated in the survey and slightly under 23,500 students were sampled. The response rates for each of the different rounds of data collection have been 80 percent or higher.

Sample retention rates across the survey years have been quite high. For example, of the individuals

responding to the base-year questionnaire, the percentages who responded to the first, second, third, and fourth followup questionnaires were about 94, 93, 89, and 83 percent, respectively.

Approximate standard errors for the percentage estimates based on NLS data reported in this publication may be estimated by the formula

$$se_p = DEFT \sqrt{p(100-p)/n}$$

where p is the estimated percentage and n is the sample size. DEFT is the root design effect factor used to adjust for the sample design used in NLS. For the first, second, and third followup surveys, the root design effect adjustment factors are 1.18, 1.16, and 1.20. Standard errors for the fourth followup survey data are adjusted by a generalized design effect factor of 1.20. Table A7 lists the approximate respondent counts for the classification variables used in this year's *Digest*. Table A8 gives examples of the approximate standard errors of percentage estimates based on the fourth followup survey for different sample sizes.

National Postsecondary Student Aid Study

The National Postsecondary Student Aid Study (NPSAS) is the most comprehensive nationwide study of how students and their families pay for postsecondary education. It includes national representative samples of undergraduates, graduates, and first-professional students; students attending less than 2-year institutions, 2- to 3-year schools, 4-year colleges, and major universities. Participants included students who do not receive aid and their parents as well as the students and parents who do receive financial aid. Study results are used to help determine future Federal policy regarding student financial aid. The study is conducted every three years.

The first NPSAS was conducted during the 1986-87 school year. Data were gathered from about 1,130 colleges, universities, and other postsecondary institutions; 55,000 students; and 16,000 parents. These data provided information on the cost of postsecondary education, the distribution of financial aid, and the characteristics of both aided and nonaided students and their families.

As a part of the 1989-90 NPSAS, information on nearly 70,000 undergraduates and graduate students enrolled during the school year was collected at more than 1,130 postsecondary institutions. The sample included students enrolled at any time between July 1, 1989 and June 30, 1990. About 51,000 students and a subsample of about 16,000 of their parents were interviewed by telephone.

This *Digest* contains preliminary information from the 1989-90 NPSAS based on institutional records of 25,000 aided undergraduates, in addition to data from the 1986-87 survey.

National Survey of Postsecondary Faculty

The National Survey of Postsecondary Faculty (NSOPF), a survey of instructional faculty in postsecondary institutions, was conducted for the first time in the 1987-88 academic year by NCES. The study consisted of three major components: the Institutional Survey, a stratified random sample of 480 institution-level respondents; the Faculty Survey, a stratified random sample of 11,013 eligible faculty members within the participating institutions; and the Department Chair Survey, a stratified random sample of 3,029 eligible department chairpersons (or their equivalent) within the participating 2- and 4-year institutions.

Institutions were selected from nonproprietary U.S. postsecondary institutions that grant a 2-year (A.A.) or higher degree, and have been accredited by organizations recognized by the U. S. Department of Education. Included in this group are religious, medical, and other specialized institutions, as well as 2- and 4-year non-specialized institutions. This universe consisted of 3,159 institutions, from the 1987 Integrated Postsecondary Education Data System (IPEDS).

Information was gathered on the following: backgrounds, responsibilities, workloads, salaries, benefits, and attitudes of both full- and part-time faculty. Additional information was collected on faculty composition, turnover and recruitment, and retention and tenure policies from institutional and department-level respondents. The survey, to be renamed the National Study of Postsecondary Faculty, will be repeated in the 1992-93 academic year so that changes over time in institutional policies, and faculty characteristics, behaviors, and attitudes can be assessed.

Survey on Principal's Perceptions of Academic Reform

This sample survey used the NCES Fast Response Survey System (FRSS), which is designed to gather timely information for policymakers. In October 1987, questionnaires were mailed to a national probability sample of 930 public high schools from a universe of approximately 14,500. A public high school was defined as any regular public school with a principal, enrollment in grade 12, and no pupils below grade 7. Questionnaires were completed by the high school principal. Data collection was completed in December with a response rate of 98 percent. The sampling frame used for the survey was the 1985-86 Common Core of Data Universe of Public School Systems. States were classified by patterns of academic reforms, each of which might be present or absent, giving 64 patterns. Six possible reforms were examined. Twenty-seven patterns occurred and each of the 27 was used as a stratum. The survey data were weighted using the universe of the probability of selection as the weights, and were adjusted for nonresponse. Since the estimates were obtained from a sample of districts, they are subject to sampling variability. Estimates of standard errors for the estimates were computed using a replication technique known as jackknife replication. This survey is also subject to nonsampling error which can occur from a variety of sources such as differences in the respondents' interpretation of the meaning of the questions, differences related to the particular time the survey was conducted, or errors in data preparation. Considerable effort was made to eliminate these biases. Thus, it appears unlikely that nonsampling errors severely biased the data from this survey.

Elementary and Secondary Education Statistics
Division
National Center for Education Statistics
555 New Jersey Avenue NW
Washington, DC 20208-5651

1985-86 Private School Survey

The 1985-86 Private School Survey was based on the sampling system developed for the 1983 Private School Survey. The "1983 Private School Survey" was carried out in two parts, one based on a "list" frame and one based on an "area" frame. The area frame was used under the assumption that the lists

available to NCES were not comprehensive and that list-building techniques applied to a sample of census areas would reveal some additional private schools. NCES started with the most complete list available, comprising some 21,000 schools, and updated it in 1983, based on review of new directories and other published sources. This effort resulted in a list of just under 27,000 schools. This frame was then stratified into 12 strata based on various combinations of religious affiliation and school level. A systematic sample of 1,320 schools was selected with probabilities equal to the square root of the enrollment of the school divided by the sum of the square roots of enrollment for all of the schools in the stratum. Inflating this sample provided an estimated universe, which was subsequently reduced by removing the estimated numbers of duplicates, nonrespondents, coding errors, and ineligible. The final estimated list universe of schools was 21,710. The response rate for the list sample was 91 percent (1,074 of 1,176 schools), and the response rate for the area sample was 81 percent (733 of 901 schools).

For the area sample, the basic frame was a list of all counties reported from the 1980 census, adjusted so that independent cities were treated as counties and smaller counties were combined with other contiguous counties. This produced a list of 2,497 sampling units. These sampling units were stratified according to census region, in or out of a Standard Metropolitan Statistical Area (SMSA), and above or below the median private school enrollment for that region and SMSA status, yielding 16 strata. The final sample was a systematic one comprising 75 sampling units, 8 of which were drawn with certainty based upon populations exceeding 1.7 million in the 1980 census. The remaining units were selected with probabilities proportionate to the square root of the population of the unit within the stratum.

For each of the sampling units in the area design, schools not overlapping with the list-frame schools were sought by reviewing directories of various types (e.g., private school organizations, telephone) and by telephoning officials, churches, chambers of commerce, and selected vendors, such as milk companies. This search produced 901 schools which met NCES criteria for functioning private schools. When weighted, these data inflated to approximately 6,000 schools nationally. Since the area frame was designed not to overlap with the list frame, results for the area sample were combined with those for the list sample.

A followup survey was conducted in 1985. The schools within the sampling areas were drawn from the lists of schools created in the same sample areas from the "1983 Private School Survey." Since the lists were not updated, schools established after 1983 were not generally eligible for sampling. The

estimates for the 1985–86 study are valid for schools that were in existence in 1983. Some of the estimates contain extrapolations for newly established schools, based on assumptions made from the 1983 survey data.

During the fall of 1985, the principal of each sampled school was contacted to obtain the school's participation in the study and to sample up to 10 teachers at the school. During January 1986, questionnaires were mailed to schools and teachers. Follow-up for questionnaire and item nonresponse was conducted during the spring of 1986. Imputations were made for item nonresponse. Of the 1,387 eligible schools, 1,174 responded (85 percent). A total of 5,295 teacher questionnaires were completed, for a teacher response rate of 76 percent.

Projections of Education Statistics

Since 1964, NCES has published projections of key statistics for elementary and secondary schools and institutions of higher education. These projections include statistics such as enrollments, instructional staff, graduates, and earned degrees. The Projections reports include several alternative projection series and a methodology section describing the techniques and assumptions used to prepare them. Data in this edition of the *Digest* reflect the intermediate projection series only.

Differences between the reported and projected values are, of course, almost inevitable. An evaluation of past projections revealed that, at the elementary and secondary level, projections of enrollments have been quite accurate: mean absolute percentage differences for enrollment were less than 1 percent for projections from 1 to 5 years in the future, while those for teachers were less than 4 percent. At the higher education level, projections of enrollment have been fairly accurate: mean absolute percentage differences were 5 percent or less for projections from 1 to 5 years into the future.

Since projections of time series are subject to errors both by the nature of statistics and the properties of projection methodologies, users are cautioned not to place too much confidence in the numerical values of the projections. Important, but unforeseeable, economic and social changes may lead to differences, particularly at the higher education level. Rather, projections are to be considered as indicators of broad trends.

Washington, DC 20208–5654

1985 Survey of Public and Private School Libraries and Media Centers

Statistics of public school libraries have been collected periodically since 1958. Prior to 1985, the last survey was conducted in 1978. The 1978 survey form was substantially revised for the 1985 data collection, based on consultations with various associations and individuals, including the American Library Association and the American Association of School Librarians. This sample survey was conducted under contract to NCES. The survey forms were mailed to a nationally representative sample of 4,500 public schools in the fall of 1985 and to a sample of 1,700 private schools in January of 1986. Data collection continued throughout the 1985–86 school year until a response rate of 92 percent for public schools and 85 percent for private schools was attained.

Estimates in the library survey tables are based on samples and are subject to sampling variability. Caution should be exercised in interpreting figures based on a relatively small number of cases. Although the standard errors are quite low for most of the national statistics, they can be substantial when comparing data from State to State. In a number of States, budgets restricted sample sizes to 75. Table A1 gives standard errors for several representative statistics. For example, the national estimate of per-pupil expenditures for books is \$6.24, and the standard error is \$.15. Thus, the chances are 95 out of 100 that the result from a complete census would differ from the estimate by less than \$.30 (1.96 times the standard error). The 95 percent confidence interval is thus \$5.94 to \$6.54.

Additional information on these school library studies is available from:

Postsecondary Education Statistics Division
National Center for Education Statistics
555 New Jersey Avenue NW
Washington, DC 20208–5652

Survey of Recent College Graduates

NCES has conducted periodic surveys of persons, about 1 year after graduation, to collect information on college outcomes. The "Recent College Graduates" surveys have concentrated on those graduates entering the teaching profession. To obtain accurate results on this subgroup, graduates who are newly qualified to teach have been oversampled in each of

the surveys. The survey involves a two-stage sampling procedure. First, a sample of institutions awarding bachelor's and master's degrees is selected and stratified by percentage of education graduates, control, and type of institution. Second, for each of the selected institutions, a sample of degree recipients is chosen. The response rates on the Recent College Graduates survey have tended to be low because of the great difficulty in tracing the students after graduation. Much more of the nonresponse can be attributed to invalid mailing addresses than to refusals to participate. Despite their shortcomings, the data are presented in this report because they provide valuable information not available elsewhere about college outcomes. Users should be cautious about drawing conclusions based on data from small samples. It is also likely that the data are somewhat biased since the more mobile students, such as graduate students, are the most difficult to track for the survey.

The 1976 survey of 1974-75 college graduates was the first and smallest of the series. The sample consisted of 209 schools, of which 200 (96 percent) responded. Of the 5,506 graduates in the sample, 4,350 responded, for a response rate of 79 percent.

The 1981 survey was somewhat larger, with a coverage of 301 institutions and 15,852 graduates. Responses were obtained from 286 institutions, for an institutional response rate of 95 percent, and from 9,312 graduates (716 others were determined to be out of scope), for a response rate of 62 percent.

The 1985 survey requested data from 18,738 graduates from 404 colleges. Responses were obtained from 13,200 students, for a response rate of 74 percent (885 were out of scope). The response rate for the colleges was 98 percent. The 1987 survey form was sent to 21,957 graduates. Responses were received from 16,878, for a response rate of 79.7 percent. Table A9 contains sample sizes for number of graduates, by field, for the 1976, 1981, 1985, and 1987 surveys.

Postsecondary Education Statistics Division
National Center for Education Statistics
555 New Jersey Avenue NW
Washington, DC 20208-5652

Survey of School Discipline Policies and Practices

This sample survey used the NCES Fast Response Survey System (FRSS), which is designed to gather timely information for policymakers. In February 1985, questionnaires were mailed to a stratified national probability sample of 900 public junior and senior high schools, representing approximately 30,000 schools. About 60 schools were determined

to be out of the scope for the survey since they did not have regular secondary school programs. The final sample represents an estimated 26,365 schools. The sample was allocated proportionately to the number of schools in each of four strata—junior high, senior high, combined, and other (including ungraded, vocational education, special education, and alternative schools). The survey form was completed by the school administrator (often the principal) most familiar with discipline policies of the school. The response rate for the survey was 93 percent. Responses were adjusted for nonresponse and weighted to national totals. Standard errors for selected items are shown in table A10 as a general guide to the precision of the numbers.

Elementary and Secondary Education Statistics
Division
National Center for Education Statistics
555 New Jersey Avenue NW
Washington, DC 20208-5651

Second International Mathematics Study

The "Second International Mathematics Study" was organized as a cooperative undertaking of research institutes in about 24 countries represented in the International Association for Evaluation of Educational Achievement (IEA). Sample surveys of two population groups were conducted during the 1981-82 school year in 20 countries. Data were collected from school administrators, teachers, and students.

"Population A" included all students in the grade in which the majority of students had attained the age of 13.0 to 13.1 years by the middle of the school year. In all countries, school enrollment is nearly universal at that age, which represents the final year of elementary school for most countries. For the United States, Population A was the eighth grade. For Japan and Hong Kong, the seventh grade was chosen for study because the cognitive mathematics tests were more appropriate for that grade level.

"Population B" was defined as all students who were in the terminal grade of secondary education and who were studying mathematics as a substantial part of their academic program, taking at least 5 hours of mathematics classes each week. In the United States, classes of precalculus and calculus were chosen. These classes represented about 12 percent of the total age group. In other countries, Population B represented between 6 and 50 percent of the age group.

About 20 countries' education systems participated in the Population A survey and 15 systems participated in the Population B survey. The 35 samples ranged in size from 1,000 to 8,800 students.

Because of the variations in student curriculum, survey design, and other factors from country to country, the results of this survey should be used with care. Further information on the sampling methodology and response rates is available from:

Data Development Division
National Center for Education Statistics
555 New Jersey Avenue NW
Washington, DC 20208-5650

Schools and Staffing Survey

The "Schools and Staffing Survey" (SASS) data were collected through a sample survey of school districts, schools, school administrators, and teachers. The surveys of schools and school principals were based on the 9,317 public and 3,513 private schools in the school samples. In addition, 56,242 public school teachers and 11,529 private school teachers participated in the teacher survey.

The public school sample was selected from the Quality Education Data (QED) file of public schools. All public schools in the file were stratified by State and by three grade levels (elementary, secondary, and combined). Within each stratum, the schools were sorted by urbanicity, zip code, highest grade in the school, and the enrollment. For each stratum within each State, sample schools were selected by systematic sampling with probability proportional to the square root of the number of teachers within a school.

The private school sample was selected primarily from the QED file of private schools. To improve coverage, two additional steps were taken. The first step was to update the QED file with current lists of schools from 17 private school associations. All private schools in the file were stratified by State and then by three grade levels (elementary, secondary, and combined) and 13 affiliation groups. Within each stratum, the schools were sorted by urbanicity, zip code, highest grade in the school, and the enrollment. For each stratum within each State, sample schools were selected by systematic sampling with probability proportional to the square root of the number of teachers within a school. The second step was to include an area-frame sample, contained in 75 Primary Sampling Units (PSUs), each PSU consisting of a county or group of counties. Within each PSU, an attempt was made to find all eligible private schools. A telephone search was made, using such sources as yellow pages, religious institutions, local education agencies, chamber of commerce, local government offices, commercial milk companies, and real estate offices. The PSUs were stratified by Census geographic region, Standard Metropolitan Statistical Area status, and private school enrollment. These PSUs were selected from the universe of 2,497 PSUs with

probability proportional to the square root of the PSU population. All schools not on the QED file or the lists from the private school associations were eligible to be selected for the area-frame sample. Schools in the area frame that could be contacted were sampled with probability proportional to the square root of the number of teachers. A systematic equal probability sample was then drawn from the schools in the area frame that could not be contacted.

The School Administrator Questionnaire was mailed to the administrator of each sampled school in February 1988. Weighted response rates for the School Administrator Questionnaire were 94.4 percent for public school administrators and 79.3 percent for private school administrators. There was no explicit imputation for item nonresponse and for a small number of schools which were found to be missing from the QED lists of public schools. The national estimate for public school principals is underestimated because of missing schools.

The weighted response rate for the Private School Questionnaire was 78.6 percent for private schools. The data were weighted to reflect the universe of private schools, and the weights were adjusted for nonresponse. A private school was excluded from the sample if it did not have any students in any of the grades from 1 to 12, if it operated in a private home that was used as a family residence, or if it was undetermined whether it operated in a private home and its enrollment was less than 10 or it had only one teacher.

Second International Science Study

The "Second International Science Study" was organized by the International Association for the Evaluation of Educational Achievement (IEA). Sample surveys were conducted in 19 countries in 1970 and, in the mid-1980s, the same was done in 24 countries.

"Population 1" is defined as either 10-year-olds or all children in grades where most 10-year-olds were to be found in the system. This population was given a core test of 24 items.

"Population 2" is constituted in the same manner as Population 1, but the test population consists of 14-year-olds. This population was given a core test of 30 items.

"Population 3" includes science students in the terminal grade. This is grade 12 except for Ontario, Canada (English), England, Hong Kong, Singapore, and the technology track in Sweden, where it is grade 13. Population 3 consists of two groups: a) the group studying biology, chemistry, or physics (these three subgroups are known as populations 3B, 3C, and 3P, respectively); and b) those students not studying science (population 3N) in the terminal grade.

Further information on the sampling methodology and response rates is available from:

State Survey on Substance Abuse Education

This survey used the NCES Fast Response Survey System (FRSS), which is designed to gather timely information for policymakers. In May of 1987, questionnaires were mailed to each State's coordinator of alcohol and drug abuse education, who was asked to have it completed by the person most knowledgeable about the State's substance abuse prevention activities. Surveys were mailed to the 50 States and the District of Columbia. Data collection was completed in June with a response rate of 100 percent. Because this survey was a census and had a 100 percent response rate, sampling error is not a factor. However, nonsampling error can occur for a variety of reasons, such as differences in the respondents' interpretation of the meaning of the questions, differences related to the particular time the survey was conducted, or errors in data preparation. Considerable effort was made to eliminate these biases. Thus, it appears unlikely that nonsampling errors severely biased the data from this survey.

For more information about this survey, contact:

Elementary and Secondary Education Statistics
Division
National Center for Education Statistics

Washington, DC 20208-5651

District Survey on Substance Abuse Education

This sample survey, compiled by NCES, used the NCES Fast Response Survey System (FRSS), which is designed to gather timely information for policymakers. In May of 1987, questionnaires were mailed to a national probability sample of 700 public school districts from a universe of approximately 15,300. Questionnaires were mailed to the school district su-

perintendents who were asked to have it completed by the person most knowledgeable about the district's substance abuse prevention activities. Data collection was completed in June with a response rate of 98 percent. The sampling frame used for the survey was the 1983-84 Common Core of Data, "Universe of Public School Systems." The sample was stratified by enrollment size and metropolitan status. Districts within a stratum were sampled with equal probability. The survey data were weighted to reflect these sampling rates and were adjusted for nonresponse. Since the estimates were obtained from a sample of districts, they are subject to sampling variability. Estimates of standard errors for the estimates were computed using a balanced half-sampling technique known as balanced repeated replications. This survey is also subject to nonsampling error which can occur for a variety of reasons, such as differences in the respondents' interpretation of the meaning of the questions, differences related to the particular time the survey was conducted, or errors in data preparation. Considerable effort was made to eliminate these biases. Thus, it appears unlikely that nonsampling errors severely biased the data from this survey.

Other Governmental Agencies

Office for Civil Rights

Civil Rights Survey of Elementary and Secondary Schools

The Office for Civil Rights (OCR), U.S. Department of Education, conducts biennial surveys of public school districts and of schools within those districts. Data are obtained on the characteristics of pupils enrolled in public schools throughout the Nation. Such information is required under Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, and Section 504 of the Rehabilitation Act of 1973 to enable OCR to carry out its compliance responsibilities. The 1986 survey included the 100 largest public school districts, those of special interest (i.e., court order, compliance review), and a stratified random sample of approximately 3,700 districts representing approximately 37,000 schools. The sample was stratified by State, district size, and estimated number of minority students.

Office of Special Education and Rehabilitative Services

Annual Report to Congress on the Implementation of the Education of the Handicapped Act

The Education of the Handicapped Act (EHA) requires the Secretary of Education to transmit to Congress annually a report describing the progress in serving the Nation's handicapped children. The annual report contains information on children served by the public schools under the provisions of Part B of the EHA and for children served in State-operated programs (SOP) for the handicapped under Chapter I of the Education Consolidation and Improvement Act (ECIA). Statistics on children receiving special education and related services in various settings and school personnel providing such services are reported in an annual submission of data to the Office of Special Education and Rehabilitative Services (OSERS) by the 50 States, the District of Columbia, and the outlying areas. The child count information is based on the number of handicapped children receiving special education and related services on December 1st of each year for EHA and October 1st for Chapter I of ECIA/SOP.

Since each participant in programs for the handicapped is reported to OSERS, the data are not subject to sampling error. However, nonsampling error can occur from a variety of sources. Some States follow a noncategorical approach to the delivery of special education services, but produce counts by handicapping condition because EHA-B requires it. In those States that do categorize their handicapped students, definitions and labeling practices vary.

Further information on the Annual Report to Congress may be obtained from:

Office of Special Education and Rehabilitative Services

330 C Street SW
Washington, DC 20202

National Longitudinal Transition Study of Special Education Students

As part of the 1983 amendments to the Education of All Handicapped Children Act (EHA), Congress re-

quested that the U.S. Department of Education conduct a national longitudinal study of the transition of secondary special education students to determine how they fare in terms of education, employment, and independent living. A 5-year study was mandated, which was to include youth from ages 13 to 21 who were in special education at the time they were selected and who represented all 11 Federal disability categories. Data are drawn from extensive telephone interviews with parents, from school records, and from a survey of educators in secondary schools attended by youth in the study.

The study is being conducted by SRI International and began in April 1987. The National Transition Study involves a nationally representative sample of more than 8,000 secondary-age youth with disabilities. A sample of 450 school districts was randomly selected from the universe of approximately 14,000 school districts serving secondary special education students. An additional replacement sample of 176 additional districts was selected due to a low rate of agreement to participate from the initial group of districts. Participation in the study was invited from the approximately 80 special schools serving secondary-age deaf, blind, and deaf-blind students. A total of approximately 300 school districts and 25 special schools agreed to have youth selected for the study.

Bureau of the Census

Current Population Survey

Current estimates of school enrollment, as well as social and economic characteristics of students, are based on data collected in the Census Bureau's monthly household survey of about 60,000 households. The monthly Current Population Survey (CPS) sample consists of 729 areas comprising 1,973 counties, independent cities, and minor civil divisions throughout the 50 States and the District of Columbia. The sample was initially selected from the 1980 census files and is periodically updated to reflect new housing construction.

The monthly CPS deals primarily with labor force data for the civilian noninstitutional population (i.e., excluding military personnel and their families living on post and inmates of institutions). In addition, in October of each year, supplemental questions are asked about highest grade completed, level and grade of current enrollment, attendance status, number and type of courses, degree or certificate objective, and type of organization offering instruction for

each member of the household. In March of each year, supplemental questions on income are asked. The responses to these questions are combined with answers to two questions on educational attainment: highest grade of school ever attended, and whether that grade was completed.

The estimation procedure employed for the monthly CPS data involves inflating weighted sample results to independent estimates of characteristics of the civilian noninstitutional population in the United States by age, sex, and race. These independent estimates are based on statistics from decennial censuses; statistics on births, deaths, immigration, and emigration; and statistics on the population in the armed services. Generalized standard error tables are provided in the *Current Population Reports*. The data are subject to both nonsampling and sampling errors.

Further information is available in the *Current Population Reports*, Series P-20, or by contacting:

Education and Social Stratification Branch
Population Division
Bureau of the Census
U.S. Department of Commerce
Washington, DC 20233

School Enrollment

Each October, the Current Population Survey (CPS) includes supplemental questions on the enrollment status of the population 3 years old and over. The main sources of nonsampling variability in the responses to the supplement are those inherent in the survey instrument. The question of current enrollment may not be answered accurately for various reasons. Some respondents may not know current grade information for every student in the household, a problem especially prevalent for households with members in college or in nursery school. Confusion over college credits or hours taken by a student may make it difficult to determine the year in which the student is enrolled. Problems may occur with the definition of nursery school (a group or class organized to provide educational experiences for children), where respondents' interpretations of "educational experiences" vary.

Examples of sampling variability in the estimates of school enrollment rates are given in table A11. Questions concerning the CPS "School Enrollment" survey may be directed to:

Education and Social Stratification Branch
Bureau of the Census
U.S. Department of Commerce
Washington, DC 20233

Educational Attainment

Data on years of school completed are derived from two questions on the Current Population Survey (CPS) instrument. Formal reports documenting educational attainment are produced by the Bureau of the Census using March CPS results. The latest report is *Educational Attainment in the United States, March 1987 and 1986*, Series P-20, No. 415, which is available from the Government Printing Office.

In addition to the general constraints of the CPS, some data indicate that the respondents have a tendency to overestimate the educational level of members of their household. Some inaccuracy is due to a lack of the respondent's knowledge of the exact educational attainment of each household member and the hesitancy to acknowledge anything less than a high school education. Another cause of nonsampling variability is the change in the numbers in the armed services over the years. In 1970, 25 percent of all males 20 and 21 years old were in the armed services. By 1974, this had decreased to less than 10 percent. The exclusion of members of the armed services appears to increase the proportion of the CPS population with some college and decrease the proportion of those who finished high school but went no further. After 1974, there was more stability in the proportion of young men in the military.

Beginning with the data for March 1980, tabulations have been controlled to the 1980 census. Examples of the sampling variability in the estimates of educational attainment are given in table A12. The figures shown in the table hold for total or white population estimates only. The variability in estimates for subgroups (region, household relationships, etc.) can be estimated using the tables presented in *Current Population Reports*.

Questions concerning "Educational Attainment in the United States" may be directed to:

Education and Social Stratification Branch
Bureau of the Census
U.S. Department of Commerce
Washington, DC 20233

Participation in Adult Education Survey

In May of 1969, 1972, 1975, 1978, 1981, and 1984, the Current Population Survey (CPS) included a supplemental inquiry on "Participation in Adult Education" (PAE). In addition to the questions on the CPS, interviewers asked if anyone in the household 17 years of age or older had participated in adult education in the 12-month period prior to the survey date. A survey form was filled out by the interviewer or left with a proxy member of the household for participants who were not at home at the time of the interview. In 1981, the supplement form was no

longer left with the proxy but completed by the interviewer.

The PAE response rate of 94 percent in 1981 must be viewed in conjunction with the 96 percent response rate of the CPS. The overall response rate for the PAE survey in 1981 is then 90 percent. Examples of the sampling variability in the estimates from the PAE survey are given in tables A13 and A14.

The figures shown in the tables hold for total or white population estimates only. The variability in estimates for subgroups (employment status, income, education, etc.) can be estimated using the tables presented in *Current Population Reports*.

Further information concerning the PAE survey may be obtained from:

Postsecondary Education Statistics Division
National Center for Education Statistics
555 New Jersey Avenue NW
Washington, DC 20208-5652

Governmental Finances

The Census Bureau conducts an Annual Survey of Government Finances as authorized by law under Title 13, United States Code, Section 182. This survey covers the entire range of government finance activities: revenue, expenditure, debt, and assets. Revenues and expenditures comprise actual receipts and payments of a government and its agencies, including government-operated enterprises, utilities, and public trust funds. The expenditure reporting categories comprise all amounts of money paid out by a government and its agencies with the exception of amounts for debt retirement and for loan, investment, agency, and private trust transactions.

Most of the Federal Government statistics for 1988 are based on figures for 1986 that appear in *The Budget of the United States Government for the Fiscal Year 1990*. Since the classification used by the Census Bureau for reporting State and local government finance statistics differs in a number of important respects from the classification used in the United States budget, it was necessary to adjust the Federal data. For this report, Federal budget expenditures include interest accrued, but not paid, during the fiscal year; Census data on interest are on a disbursement basis.

The State government finances for 1988 are based primarily on the annual Census Bureau survey of State finances for fiscal year 1988. Census staff compiled figures from official records and reports of the various States for most of the State financial data.

The sample of local governments is drawn from the 1982 Census of Governments and consists of

certain local governments taken with certainty plus a sample below the certainty level.

The statistics in this Census report, *Governmental Finances*, that are based wholly or partly on data from the sample are subject to sampling error. State government finance data are not subject to sampling error. Estimates of major United States totals for local governments are subject to a computed sampling variability of less than one-half of 1 percent. The estimates are also subject to the inaccuracies in classification, response, and processing which would occur if a complete census had been conducted under the same conditions as the sample.

Further information can be obtained from:

Governments Division
Bureau of the Census
U.S. Department of Commerce
Washington, DC 20233

National Center for Health Statistics

Monthly Vital Statistics Report

Data in this report are based on the birth certificates in all States and the District of Columbia. The data are provided to the National Center for Health Statistics through the Vital Statistics Cooperative Program. In 1983 and 1984, the program included 46 States, accounting for 83 to 84 percent of all births in the United States. Data for Arizona, California, the District of Columbia, and Georgia were based on a 50 percent sample of birth certificates filed as far back as 1982.

Birth and fertility rates are based on population estimates by the Census Bureau. Birth and fertility rates for 1985 are based on the 1980 Census count.

Further information may be obtained from:

U.S. Department of Health and Human Service
Public Health Services
National Center for Health Statistics
3700 East-West Highway
Hyattsville, MD 20782

National Institute on Drug Abuse

The National Institute on Drug Abuse of the U.S. Department of Health and Human Services is the primary supporter of the long-term study entitled "Monitoring the Future: A Continuing Study of the Lifestyles and Values of Youth," conducted at the University of Michigan, Institute for Social Research. One component of the study deals with student drug abuse. Results of a national sample survey have been published annually since 1975. Approximately 125 to 135 schools have participated each year. With the exception of 1975 when about 9,400 students participated in the survey, more than 15,000 students have participated in the survey annually. For the

class of 1988, about 16,300 students responded to the survey. Over the years, the response rate has varied from 77 to 84 percent. Table A15 provides examples of the survey's sampling error.

The data in this survey represent only high school seniors. Understandably, there will be some reluctance to admit illegal activities. Also, students who were out of school on the day of the survey were nonrespondents. The survey did not include high school dropouts. The inclusion of these two groups would tend to increase the proportion of individuals who had used drugs. A 1983 study found that the inclusion of the absentees could increase some of the drug usage estimates by as much as 2.7 percent. (Details on that study and its methodology were published in *Drug Use Among American High School Students, College Students, and Other Young Adults*, by Lloyd D. Johnston, Patrick M. O'Malley, and Jerald G. Bachman, available from the National Clearinghouse on Drug Abuse Information, 5600 Fishers Lane, Rockville, MD 20857.)

Further information on this survey may be obtained from:

National Institute on Drug Abuse
Division of Epidemiology and Statistical Analysis
5600 Fishers Lane
Rockville, MD 20857

National Science Foundation

Survey of Earned Doctorates Awarded in the United States

The Survey of Earned Doctorates Awarded in the United States has collected basic statistics from the universe of doctoral recipients in the United States each year since the 1920s. It has been supported by five Federal agencies: the National Science Foundation, in conjunction with the U.S. Department of Education; the National Endowment for the Humanities; the U. S. Department of Agriculture; and the National Institute of Health.

A survey form is distributed, with the assistance of graduate deans, to each person completing the requirements for a doctorate. Of the approximately 31,000 persons eligible for the survey, approximately 95 percent respond. The questionnaire obtains information on sex, race/ethnicity, marital status, citizenship, handicaps, dependents, specialty field of doctorate, educational institutions attended, time spent in completion of doctorate, financial support, educational debt, postgraduation plans, and educational attainment of parents. The data are collected, edited, and published by the National Academy of Sciences.

For further information contact:

Susan Hill
National Science Foundation
1800 G Street NW
Washington, DC 20550

Federal Obligations to Colleges and Universities and Selected Nonprofit Institutions

Each year, the National Science Foundation collects data on obligations to colleges and universities from Federal agencies. Obligations differ from expenditures in that funds obligated during one fiscal year may be spent by the recipient in later years. The fiscal year 1987 data were submitted by 15 Federal agencies. Obligation amounts include direct Federal support, so that amounts subcontracted to other institutions are included. Those funds received through subcontracts are excluded. Also excluded from the data are certain types of financial assistance, such as the Department of Education's Guaranteed Student Loan Program and obligations to the U.S. service academies. For purposes of tabulations in this publication, university administered federally funded research and development centers (FFRDCs) have been included in appropriate State totals.

The universe of academic institutions for this survey is based on the Integrated Postsecondary Education Data Survey conducted by the National Center for Education Statistics (see above). Institutions without Federal support were excluded and some systems were combined into single reporting units.

Further information on this survey may be obtained from *Federal Support to Universities, Colleges, and Selected Nonprofit Institutions*, published by the National Science Foundation, or by contacting:

Universities and Nonprofit Institutions Study Group
Division of Science Resources Studies
National Science Foundation, Room L-602
Washington, DC 20550

Survey of Scientific and Engineering Expenditures at Universities and Colleges

The universe for this survey included 563 institutions in the United States and outlying areas that had a master's or doctor's degree program in the sciences or engineering. In addition, schools that had \$50,000 or more in separately budgeted research and development expenditures and the 19 federally funded research and development centers were included. Altogether, these institutions represented approximately 99 percent of all college and university research and development.

The survey instrument has remained essentially unchanged in recent years to facilitate consistent responses. The field of study details match the standard field codes in the *Classification of Instructional Programs*, published by NCES. The response rate for the 1982 survey was 81 percent. The remaining institutions were imputed. The imputation amounted to only 6 percent of the total expenditures reported, since the nonrespondents tended to be smaller institutions. The survey process included a verification procedure in which trend data for the past two reports and the current survey were sent to each institution. The institutions were given an opportunity to amend the current and past figures. These revisions have been incorporated in the National Science Foundation database.

Further information on this survey may be obtained from Academic Science/Engineering, R&D Funds, published by the National Science Foundation, or by contacting:

Universities and Nonprofit Institutions Study Group
Division of Science Resources Studies
National Science Foundation, Room L-602
Washington, DC 20550

Other Organization Sources

American Association of Colleges for Teacher Education

The Committee on Research and Information of the American Association of Colleges for Teacher Education (AACTE) initiated the Research About Teacher Education (RATE) Project in 1985. The project is devoted to collecting information about institutions of higher education that engage in teacher education. The data in the report, *Teaching Teachers: Facts and Figures*, were culled from analyses of three survey instruments—institutional, faculty, and student. Archival data from institutions covered the 1985 calendar year. Self-reported perceptual and factual data from faculty and students were collected in spring 1986. The institutions were selected from a stratified random sample of the 713 member institutions of AACTE in 1985. The institutions were stratified according to the highest degree offered within the school, college, or department of education. Thirty institutions were randomly selected from each stratum for a total of 90 institutions. Of these, 76 institutions provided complete data, representing 84 percent of the sample.

To provide a more complete picture, surveys were administered to 360 education faculty and 900 students. These groups were drawn from secondary education methods courses. The current report contains data from 215 faculty and 876 students.

For those interested in more technical information from the RATE Project, supporting documentation for this report is available from:

American Association of Colleges for Teacher Education
One Dupont Circle
Suite 610
Washington, DC 20036-2412

American College Testing Program

The American College Testing (ACT) Assessment is designed to measure educational development in the areas of English, mathematics, social studies, and natural sciences. The ACT Assessment is taken by college-bound high school students and the test results are used to predict how well students might perform in college.

Prior to the 1984-85 school year, national norms were based on a 10 percent sample of the students taking the test. Since then, national norms are based on the test scores of all students taking the test. Moreover, beginning with 1984-85, these norms have been based on the most recent ACT scores available from students scheduled to graduate in the spring of the year. Duplicate test records are no longer used to produce national figures.

Separate ACT standard scores are computed for English, mathematics, social studies, and natural science. ACT standard scores are reported for each subject area on a scale from 1 to 36. The four ACT standard scores have a mean (average) of about 19 and a standard deviation of about 6 for college-bound students nationally. A composite score is obtained by taking the simple average of the four standard scores and is an indication of student's overall academic development across these subject areas.

It should be noted that college-bound students who take the ACT Assessment are not representative in some respects of college-bound students nationally. First, students who live in the Midwest, Rocky Mountains and Plains, and the South are overrepresented among ACT-tested students as compared with college-bound students nationally. Second, ACT-tested students tend to enroll in public colleges and universities more frequently than do college-bound students nationally.

Iowa City, IA 52243

American Federation of Teachers

The American Federation of Teachers (AFT) reports national and State average salaries and earn-

ings for teachers, other school employees, government workers, and professional employees over the past 25 years. The AFT's survey of State departments of education obtains information on minimum salaries, experienced teachers reentering the classroom, and teacher age and experience. Most data from the survey are reported as received, although some data are confirmed by telephone. These data are available in the AFT's annual report *Salary and Analysis of Salary Trends*. While serving as the primary vehicle for reporting the results of the AFT's annual survey of State departments of education, several other data sources are also used in this report.

Further information on this survey can be obtained from:

American Federation of Teachers
555 New Jersey Avenue NW
Washington, DC 20001

Carnegie Foundation for the Advancement of Teaching

The Carnegie Foundation for the Advancement of Teaching (CFAT) conducted the National Survey of Public School Teachers in the spring of 1987. The survey was mailed to 40,000 public elementary and secondary school teachers in all 50 States. Questionnaires were returned by 21,698 teachers, representing a response rate of 54.3 percent. Elementary teachers compose 29.6 percent (11,827) of the sample and secondary teachers compose 29.1 percent (11,651). Some of the teachers taught at both levels.

A stratified random sample design was used. The total survey size is composed of simple random samples from each State. Each survey response was weighted based on the level and State of the responding teacher. The maximum sampling error for this survey is less than plus or minus 1 percent for the total sample. In general, more than 95 percent of the teachers who returned the questionnaire answered each question.

Results from this survey may be found in *Teacher Involvement in Decisionmaking: A State-By-State Profile and The Condition of Teaching: A State-By-State Analysis, 1988*. For additional information on the data obtained from this survey, contact:

Robert Hochstein
Carnegie Foundation for the Advancement of Teaching
1775 Massachusetts Avenue NW
Washington, DC 20036

College Entrance Examination Board

The Admissions Testing Program of the College Board comprises a number of college admissions tests, including the Preliminary Scholastic Aptitude

Test (PSAT) and the Scholastic Aptitude Test (SAT). High school students participate in the testing program as sophomores, juniors, or seniors—some more than once during these 3 years. If they have taken the tests more than once, only the most recent scores are tabulated. The PSAT and SAT report subscores in the areas of mathematics and verbal ability.

The SAT results are not representative of high school students or college-bound students nationally since the sample is self-selected. Generally, tests are taken by students who need the results to attend a particular college or university. The State totals are greatly affected by the requirements of its State colleges. Public colleges in a number of States require ACT scores rather than SAT scores. Thus, the proportion of students taking the SAT in these States is very low and is inappropriate for any comparison. In recent years, about 1 million high school students have taken the examination annually.

Further information on the SAT can be obtained from:

College Entrance Examination Board
Educational Testing Service
Princeton, NJ 08541

Council for Aid to Education

The Council for Aid to Education, Inc., (CFAE) is a not-for-profit corporation funded by contributions from business. CFAE sponsors public service campaigns and provides consulting and research services on voluntary support for education institutions. Each year, CFAE conducts a survey of colleges and universities and private elementary and secondary schools to obtain information on the amounts, sources, and purposes of private gifts, grants, and bequests received during the academic year. In the 1986–87 study, survey forms were sent to approximately 2,800 colleges and universities and 1,174 responded, which was 1.7 percent below the 1985–86 level. The response rates were much higher for the 4-year colleges than for the 2-year colleges. For example, 90 percent of the doctoral-level institutions and 63 percent of the comprehensive and general baccalaureate colleges participated in the survey. CFAE estimates that about 85 percent of all voluntary support is reported in the survey because of the high participation of institutions receiving large amounts of funding. Survey forms are reviewed by CFAE for internal consistency before preparing a computerized database. Institutional reports of voluntary support data from the CFAE "Survey of Voluntary Support of Education" are more comprehensive and detailed than the related data in the "Financial Statistics of Institutions of Higher Education" survey conducted by NCES. The results from the "Survey of

Voluntary Support of Education" are published in the annual Voluntary Support of Education, which may be purchased from CFAE.

New York, NY 10019

Council of Chief State School Officers

The Council of Chief State School Officers (CCSSO) is a nonprofit organization of the 57 public officials who head departments of public education in every State, the outlying areas, the District of Columbia, and the Department of Defense Dependents Schools. In 1985, the CCSSO founded the State Education Assessment Center to provide a locus of leadership by the States to improve the monitoring and assessment of education. *State Education Indicators, 1988* is the principal report of the Assessment Center's program of indicators on education. Most of the data is obtained from a member questionnaire; the remainder of the data is obtained from Federal Government agencies.

Ramsay Selden
State Education Assessment Center
Council of Chief State School Officers
379 Hall of States
400 North Capitol Street NW
Washington, DC 20001

Council of State Directors of Programs for the Gifted

The Council of State Directors of Programs for the Gifted is composed of the director or individual in the leadership position for gifted education in each of the 50 States, the District of Columbia, and the outlying areas. The Council has conducted many surveys in the past and most recently conducted two comprehensive State surveys in order to produce a profile of gifted education throughout the Nation. These data are reported in the 1985 and 1987 "State of the States Gifted and Talented Education" reports. This edition of the *Digest* uses data from the 1986-87 school year. Responses for the 1986-87 survey were received from all 50 States, Puerto Rico, and Guam. The Council is in the process of deciding whether future surveys will be conducted annually or biennially.

Further information is available from:

Council of State Directors of Programs for the Gifted
Office of Public Instruction
Room 106, State Capitol
Helena, MT 59620

Education Commission of the States

The Education Commission of the States (ECS) Clearinghouse collects information on laws and standards in the field of education and reports them periodically in "Clearinghouse Notes." The Commission collects information about administrators, principals, and teachers. It also examines policy areas, such as assessment and testing, collective bargaining, early childhood issues, quality education, and school schedules. The information is collected by reading State newsletters, tracking State legislation, and surveying State education agencies. Data are verified by the individual States when necessary. Even though ECS monitors State activity on a continuous basis, it updates the reports only when there is significant change in State activity.

Melody Bush or Chris Pipho
Education Commission of the States
1860 Lincoln Street, Suite 300
Denver, CO 80295

Gallup Poll

Each year the Gallup Poll conducts the "Public Attitudes Toward the Public Schools" survey, funded by Phi Delta Kappa. The survey includes interviews with over 1,600 adults representing the civilian noninstitutional population 18 years old and over.

The sample used in the 22nd annual survey was made up of a total of 1,594 respondents and is described as a modified probability sample of the Nation. Personal, in-home interviewing was conducted in representative communities of the Nation.

The survey is a sample survey and is subject to sampling error. The size of error depends largely on the number of respondents providing data. Table A16 shows the approximate sampling errors associated with different percentages and sample sizes for the survey. Table A17 also provides approximate sampling errors for comparisons of two sample percentages.

For example, an estimated percentage of about 10 percent based on the responses of 1,000 sample members has an approximate sampling error of 2

percent at the 95 percent confidence level. The sampling error for the difference in two percentages (50 percent versus 41 percent) based on two samples of 750 members and 400 members, respectively, is about 8 percent at the 95 percent confidence level. Table A17 contains approximate sampling errors for the difference in two percentages.

Further information on this survey can be obtained from:

Gallup Poll
Phi Delta Kappa
P.O. Box 789
Bloomington, IN 47402-0789

Independent Sector

In 1988, Independent Sector commissioned the Gallup Poll to conduct a national survey on the giving and volunteering behavior of Americans. This survey is the beginning of a series of surveys that will be conducted every 2 years. The information was obtained from in-home personal interviews conducted from March 8 to March 22, 1988, with a representative national sample of 2,775 adult Americans 18 or more years old. The sampling procedure did not include those with incomes above \$200,000 because they constitute such a small percentage of the population.

The results from this survey are published in *Giving and Volunteering in the United States* and may be purchased from:

Independent Sector
1828 L Street NW
Washington, DC 20036

Institute of International Education

Each year the Institute of International Education (IIE) conducts a survey of the number of foreign students studying in American colleges and universities and reports these data in *Open Doors*, an annual publication. All of the regionally accredited institutions in the *Education Directory, Colleges and Universities*, published by NCES, are surveyed by IIE. The data presented in the *Digest* are drawn from the IIE survey, which requests the total enrollment of foreign students in an institution and information on student characteristics, such as country of origin. For the 1989-90 survey, 2,546 out of 2,840 (90 percent) institutions surveyed reported data for the survey.

Additional information can be obtained from the publication *Open Doors* or by contacting:

Alfred Julian
Institute of International Education
809 United Nations Plaza
New York, NY 10017

Market Data Retrieval

Market Data Retrieval (MDR) is a market research company that compiles mailing lists of schools and school districts. MDR also conducts special analyses of school characteristics. In recent years, MDR has conducted surveys of computer use in public and private schools.

During its annual summer survey of public school districts, MDR included questions on computer use in public schools. All school districts were asked about the number of their schools using computers. In the fall, an additional mail survey was conducted to gather more information on the number and type of computers being used. Data on computer utilization were reported for 86 percent of public schools. These data were used to generate State-by-State estimates which were aggregated to construct a national total.

Private school data were compiled through mail and telephone surveys during the middle of the 1982-83 and 1983-84 school years. The 1983-84 response rate for Catholic schools was 96 percent, and the rate for other private schools was 89 percent.

Further information on these surveys may be obtained from:

Market Data Retrieval
16 Progress Drive
Shelton, CT 06484

Metropolitan Life Insurance Company

Louis Harris and Associates conducted the 1989 Metropolitan Life Survey of the American Teacher for the Metropolitan Life Insurance Company. During May and June 1989, 2,000 telephone interviews were conducted with current public school teachers in kindergarten through grade 12. The survey included all states of the U.S. and the District of Columbia.

A list of 1.2 million teachers was compiled by Market Data Retrieval of Westport, Connecticut, from which Louis Harris and Associates drew a random sample of current teachers. NCES statistics on public school teachers were used to compute sample sizes for complete interviews for each state.

Thirty open-ended in-depth interviews with teachers around the country were used to develop the final questionnaire. School contacts numbered 6,642, of which 2,000 became interviews. The rate of completion for the teacher interviews was 83 percent. The sampled data were adjusted by race and regional data provided by the respondents to accurately reflect their actual proportions in the population.

New York, NY 10010

National Association of Secondary School Principals

The National Association of Secondary School Principals (NASSP) survey is the third in a series of national studies of high school principals dating back to 1965. The major purpose of this study is to analyze and describe high school leaders and their schools.

A sample of 1,028 secondary schools was drawn randomly from NASSP's national database of all American schools in grade 12. Survey forms were mailed in early 1987. A preliminary analysis of the returns indicated a disproportionate response rate, primarily from smaller schools in the Midwest. A second set of surveys was mailed in late March of 1987 and targeted by zip codes to redress the imbalance in preliminary returns. In all, 1,544 survey forms were sent and 716 were returned by principals. The response rate for principals was 46 percent.

Further information on this survey may be obtained from *High School Leaders and Their Schools* or by contacting:

National Association of Secondary School Principals
1904 Association Drive
Reston, VA 22091

National Association of State Scholarship and Grant Programs

The National Association of State Scholarship and Grant Programs (NASSGP) is an association of States with general programs of scholarship or grant assistance for undergraduate study. Executive officers responsible for grant program administration represent each State in the Association. The publication of the *19th Annual Survey Report: 1987-88 Academic Year* represents the eighth year that the Pennsylvania Higher Education Assistance Agency has produced the NASSGP annual report. Data are reported for all 50 States, the District of Columbia, and Puerto Rico.

Jerry S. Davis
Research and Statistics
Pennsylvania Higher Education Assistance Agency
Towne House
660 Boas Street
Harrisburg, PA 17102

National Education Association

The National Education Association (NEA) reports enrollment, expenditure, revenue, graduate, teacher, and instructional staff salary data in its annual publication, *Estimates of School Statistics*. Each year NEA prepares regression-based estimates of financial and other education statistics and submits them to the States for verification. Generally about 30 States adjust these estimates based on their own data. These preliminary data are published by NEA along with revised data from previous years. States are asked to revise previously submitted data as final figures become available. The most recent publication contains all changes reported to the NEA.

Further information on NEA surveys can be obtained from:

National Education Association—Research
1201 16th Street NW
Washington, DC 20036

Status of the American Public School Teacher

The "Status of the American Public School Teacher" survey is conducted every 5 years by the National Education Association (NEA). The survey was designed by the NEA Research Division and initially administered in 1956. The intent of the survey is to solicit information covering various aspects of public school teachers' professional, family, and civic lives.

Participants for the survey are selected using a two-stage sample design, with the first-stage stratum determined by the number of students enrolled in the districts. Selection probabilities are determined so that the resulting sample is self-weighting. In 1985-86, a sample of 1,998 was selected from the approximately 2,207,000 public school teachers. The sample was adjusted to 1,784 to reflect the 214 responses that were unusable because the respondent could not be located or the respondent was not a teacher. After followup procedures, 1,291 usable replies were obtained, yielding a response rate of 72 percent.

Possible sources of nonsampling errors are nonresponses, misinterpretation, and—when comparing data over years—changes in the sampling method and instrument. Misinterpretation of the survey items should be minimal, as the sample responding is not from the general population but one knowledgeable about the area of concern. Since the sam-

pling procedure changed after 1956, and some wording of items has changed over the different administrations, care is taken to present only comparable data.

Since sampling is used, sampling variability is inherent in the data. An approximation to the maximum standard error for estimating the population percentages is 1.4 percent. To estimate the 90 percent confidence interval for population percentages, the maximum standard error of 1.4 percent is multiplied by 1.65 (1.4×1.65). The resulting percentage (2.3) is added and subtracted from the population estimate to establish upper and lower bounds for the confidence interval. For example, if a sample percentage is 60 percent, there is a 90 percent chance that the population percentage lies between 57.7 percent and 62.3 percent ($60 \text{ percent} \pm 2.3 \text{ percent}$). If comparisons of two percentages are to be made, table A20 gives maximum differences for significance at the 90 percent confidence level.

Questions concerning the "Status of the American Public School Teacher" survey may be directed to:

National Education Association—Research
1201 16th Street NW
Washington, DC 20036

United Nations Educational, Scientific, and Cultural Organization

The United Nations Educational, Scientific, and Cultural Organization (UNESCO) conducts annual surveys of education statistics of its member countries. Besides official surveys, data are supplemented by information obtained by UNESCO through other publications and sources. Each year more than 200 countries reply to the UNESCO surveys. In some cases, estimates are made by UNESCO for particular items such as world and continent totals. While great efforts are made to make them as comparable as possible, the data still reflect the vast differences among the countries of the world in the structure of education. While there is some agreement about the reporting of first- and second-level data, the third level (postsecondary education) presents numerous substantial problems. Some countries report only university enrollment while other countries report all postsecondary, including vocational and technical schools and correspondence programs. A very high proportion of some countries' third-level students attend institutions in other countries. While definition

problems are many in this sort of study, other survey problems should not be overlooked. The member countries that provide data to UNESCO are responsible for their validity. Thus, data for particular countries are subject to nonsampling error and perhaps sampling error as well. Some countries may furnish only rough estimates, while data from other countries may be very accurate. Other difficulties are caused by the varying periodicity of data collection among the countries of the world. In spite of such problems, many researchers use UNESCO data because they are the best available. Users should examine footnotes carefully to recognize some of the data limitations.

More complete information may be obtained from the *Statistical Yearbook* published by UNESCO or from:

France

Organization for Economic Cooperation and Development

The Organization for Economic Cooperation and Development (OECD) publishes analyses of national policies in education, training, and economics in 23 countries. The countries surveyed are: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany (West), Ireland, Italy, Japan, Luxembourg, Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom, United States, and Yugoslavia. Two OECD publications, *A Compendium of Statistical Information* and *National Accounts*, were used to develop tables for the *Digest* chapter on international education.

Since only developed nations, mostly European, are included in these studies the range of analysis is limited. However, OECD data allow for some detailed international comparison of financial resources or other education variables to be made for this selected group of countries.

¹ The SES index is a composite of five equally-weighted measures: father's education, mother's education, family income, father's occupation, and presence of certain items in the respondent's household.

² Includes attendance at a vocational, trade, or business school, or 2-year college, or attendance at a 4-year college resulting in less than a bachelor's degree.

³ Includes those with a bachelor's or higher level degree.

⁴ Postsecondary education status was determined by students' enrollment in academic or vocational study during the four semesters—fall 1982, spring 1983, fall 1983, and spring 1984—following their scheduled high school graduation. Students who enrolled in full-time study in each of the four semesters were classified as full-time. Students who were enrolled in part-time study in any of the four semesters and those who were enrolled in full-time study in fewer than four semesters were classified as part-time. Students who had neither enrolled on a full-time nor part-time basis in each of the four semesters were classified as never enrolled.

⁵ Responses to questions concerning participation in each of 15 different extracurricular activity areas (i.e., varsity sports, debate, band, subject-matter clubs, etc.) were used to classify students' overall level of participation in extracurricular activities. The difference between the sum of the three category respondent counts and the total sample size is due to missing data.

—Data not applicable.

NOTE.—Data from students who dropped out of school between the 10th and 12th grades were not used in analyses of sophomore samples.

Table A3.—Design effects (DEFF) and root design effects (DEFT) for selected High School and Beyond surveys and subsamples

Table A7.—Respondent counts for selected National Longitudinal Study surveys

Classification variable and subgroup	Base year survey of 1972 seniors	Followup survey of 1972 seniors in 1974-75	Followup survey of 1972 seniors in 1976-77	Followup survey of 1972 seniors in 1979-80
Total respondents (unweighted)	16,409	19,328	19,422	17,519
Sex				
Male	7,081	9,350	9,394	8,385
Female	7,290	9,962	9,898	9,036
Race/ethnicity	14,371	—	—	15,914
White, non-Hispanic	12,333	—	—	13,812
Black, non-Hispanic	2,038	—	—	2,102
Hispanic	—	—	—	665
Asian	—	—	—	210
Socioeconomic status composite (SES)¹				
Low	—	—	—	4,786
Middle	—	—	—	8,322
High	—	—	—	4,171
Father's highest level of education				
Less than high school	3,811	—	—	—
High school graduate ²	6,223	—	—	—
College graduate ³	2,404	—	—	—
High school program (self-reported)				
Academic	4,471	—	—	—
General	6,336	—	—	—
Vocational	3,564	—	—	—

¹ The SES index is a composite of five equally-weighted measures: father's education, mother's education, family income, father's occupation, and presence of certain items in the respondent's household.

² Includes attendance at a vocational, trade, or business school, or 2-year college, or attendance at a 4-year college resulting in less than a bachelor's degree.

³ Includes those with a bachelor's or higher-level degree.

—Data not applicable.

NOTE—Sample sizes for categories of classification variables may not sum to the total number of respondents because of missing or excluded data. Because of item nonresponse, the actual number of respondents answering each question in a series of related questions will vary.

Table A8.—Approximate standard errors for percentages estimated from National Longitudinal Study survey: 1979

Size of sample	Estimated percentages				
	10 or 90	20 or 80	30 or 70	40 or 60	50

Table A14.—Estimated educational attainment rates and standard errors in the March Current Population Survey

Estimate	Base of percentage, in thousands	Standard error	90 percent confidence interval
2 or 98 ¹	100	2.00	0 to 5.2
	100,000	0.06	1.9 to 2.1
10 or 90	100	4.3	3.1 to 16.9
	100,000	0.14	9.8 to 10.2
50	100	7.20	38.5 to 61.5
	100,000	0.20	49.7 to 50.3

¹ The confidence interval for the larger values can be found by taking the complement of that shown, e.g. for 98 it would be 94.8 to 100.

Table A15.—Estimated standard errors for selected estimates of persons from the "Participation in Adult Education" CPS supplement

Estimate	Standard Error	90 percent confidence interval
10	4.5	2.8 to 17.2
50	10.2	33.7 to 66.3
500	30.0	452 to 548
50,000	253.0	49,595 to 50,405

Table A16.—Estimated participation rates and standard errors in the "Participation in Adult Education" CPS supplement

	Base of Percentage in thousands	Standard error	90 percent estimate confidence interval
1 or 99 ¹	50	2.4	0 to 4.8
	5,000	0.2	0.68 to 1.3
10 or 90	50	7.1	0 to 21.4
	5,000	0.7	8.9 to 11.1
50	50	11.8	31.1 to 68.9
	5,000	1.2	48.1 to 51.9

¹ The confidence interval for the larger values can be found by taking the complement of that shown, e.g., for 99 it would be 95.2 to 100.

Table A17.—Percent of seniors who had ever used selected drugs and 95 percent confidence limits: 1986¹

Drug	Lower limit	Observed estimate	Upper limit
Alcohol	89.7	91.3	92.7
Marijuana/hashish	48.7	50.9	53.1
LSD	6.3	7.2	8.2
PCP	3.8	4.8	6.0
Cocaine	15.5	16.9	18.4
Heroin	0.8	1.1	1.4

¹ Approximate sample size = 15,200.**Table A18.—Sampling errors (95 percent confidence level) for percentages estimated from the Gallup Poll, 1987**

Percent	Size of sample						
	1,500	1,000	750	600	400	200	100

Percentages near 40 or 60	3	4	5	5	6	9	12
Percentages near 50	3	4	5	5	6	9	13

Table A19.—Sampling errors (95 percent confidence level) for the difference in two percentages estimated from the Gallup Poll: 1987

Size of sample	Size of sample					
	1,000	750	600	400	200	100
Recommended allowance for sampling error of a difference in percentages (percentages near 80 or 20)						
1,500	4					
1,000	4	5				
750	5	5	5			
600	5	5	6	6		
400	6	6	6	7	7	
200	8	8	8	8	9	10
Recommended allowance for sampling error of a difference in percentages (percentages near 50)						
1,500	5					
1,000	5	6				
750	6	6	7			
600	6	7	7	7		
400	7	8	8	8	9	
200	10	10	10	10	11	13

Table A20.—Approximate sampling errors (95 percent confidence level) for percentages estimated from Metropolitan Life Survey of the American Teacher, 1987

Percentage	Size of sample					
	2000	1500	1000	500	200	100
Recommended allowance for sampling error of a percentage						
Percentages near 10 or 90	1	2	2	3	4	6
Percentages near 20 or 80	2	2	2	4	6	8
Percentages near 30 or 70	2	2	3	4	6	9
Percentages near 40 or 60	2	3	3	4	7	10
Percentages near 50	2	3	3	4	7	10

Table A21.—Approximate sampling errors (95 percent confidence level) for the differences in two percentages estimated from the Metropolitan Life Survey of the American Teacher, 1987

Sample sizes of two groups being compared	Recommended allowance for sampling error of a difference in percentages				
	Percentage result at 10% or 90%	Percentage result at 20% or 80%	Percentage result at 30% or 70%	Percentage result at 40% or 60%	Percentage result at 50%
2,000 vs. 1,000	2	3	4	4	4
1,000 vs. 1,000	3	4	4	4	4
1,000 vs. 200	5	6	7	7	8
1,000 vs. 100	6	8	9	10	10
200 vs. 100	7	10	11	12	12

Table A22.—Maximum differences required for significance (90 percent confidence level) between sample subgroups of the Status of the American Public School Teacher survey

Size of one subgroup	Size of other subgroup						
	100	200	300	400	500	600	700
100	11.6	10.1	9.5	9.2	9.0	8.9	8.8
200	10.1	8.2	7.5	7.1	6.9	6.7	6.6
300	9.5	7.5	6.7	6.3	6.0	5.8	5.7
400	9.2	7.1	6.3	5.8	5.5	5.3	5.2
500	9.0	6.9	6.0	5.5	5.2	5.0	4.8
600	8.9	6.7	5.8	5.3	5.0	4.7	4.6
700	8.8	6.6	5.7	5.2	4.8	4.6	4.4

Definitions

Academic support This category of college expenditures includes expenditures for support services that are an integral part of the institution's primary missions of instruction, research, or public service. Includes expenditures for libraries, galleries, audio/visual services, academic computing support, ancillary support, academic administration, personnel development, and course and curriculum development.

Achievement test An examination that measures the extent to which a person has acquired certain information or mastered certain skills, usually as a result of specific instruction.

Agriculture Courses designed to improve competencies in agricultural occupations. Included is the study of agricultural production, supplies, mechanization and products, agricultural science, forestry, and related services.

American College Testing Program (ACT) The ACT assessment program measures educational development and readiness to pursue college-level coursework in English, mathematics, natural science, and social studies. Student performance on the tests does not reflect innate ability and is influenced by a student's educational preparedness.

Appropriation (institutional revenues) An amount (other than a grant or contract) received from or made available to an institution through an act of a legislative body.

Appropriations (Federal funds) Budget authority provided through the congressional appropriation process that permits Federal agencies to incur obligations and to make payments.

Associate degree A degree granted for the successful completion of a sub-baccalaureate program of studies, usually requiring at least 2 years (or equivalent) of full-time college-level study. This includes degrees granted in a cooperative or work-study program.

Auxiliary enterprises This category includes those essentially self-supporting operations which exist to furnish a service to students, faculty, or staff, and which charge a fee that is directly related to, although not necessarily equal to, the cost of the serv-

ice. Examples are residence halls, food services, college stores, and intercollegiate athletics.

Average daily attendance (ADA) The aggregate attendance of a school during a reporting period (normally a school year) divided by the number of days school is in session during this period. Only days on which the pupils are under the guidance and direction of teachers should be considered days in session.

Average daily membership (ADM) The aggregate membership of a school during a reporting period (normally a school year) divided by the number of days school is in session during this period. Only days on which the pupils are under the guidance and direction of teachers should be considered as days in session. The average daily membership for groups of schools having varying lengths of terms is the average of the average daily memberships obtained for the individual schools.

Bachelor's degree A degree granted for the successful completion of a baccalaureate program of studies, usually requiring at least 4 years (or equivalent) of full-time college-level study. This includes degrees granted in a cooperative or work-study program.

Budget authority (BA) Authority provided by law to enter into obligations that will result in immediate or future outlays. It may be classified by the period of availability (1-year, multiple-year, no-year), by the timing of congressional action (current or permanent), or by the manner of determining the amount available (definite or indefinite).

Business Program of instruction that prepares individuals for a variety of activities in planning, organizing, directing, and controlling business office systems and procedures.

Carnegie unit A standard of measurement that represents one credit for the completion of a 1-year course.

Catholic school A private school over which a Roman Catholic church group exercises some control or provides some form of subsidy. Catholic schools for the most part include those operated or

supported by: a parish, a group of parishes, a diocese, or a Catholic religious order.

Central cities The largest cities, with 50,000 or more inhabitants, in a Metropolitan Statistical Area (MSA). A smaller city within a MSA may also qualify if it has at least 25,000 inhabitants or has a population of one-third or more of that of the largest city and a minimum population of 25,000. An exception occurs where two cities have contiguous boundaries and constitute, for economic and social purposes, a single community of at least 50,000, the smaller of which must have a population of at least 15,000.

Class size The membership of a class at a given date.

Classroom teacher A staff member assigned the professional activities of instructing pupils in self-contained classes or courses, or in classroom situations. Usually expressed in full-time equivalents.

Cohort A group of individuals that have a statistical factor in common, for example, year of birth.

College A postsecondary school which offers general or liberal arts education, usually leading to an associate, bachelor's, master's, doctor's, or first-professional degree. Junior colleges and community colleges are included under this terminology.

Combined elementary and secondary school A school which encompasses instruction at both the elementary and the secondary levels. Examples of combined elementary and secondary school grade spans would be 1 through 12 or 5 through 12.

Computer science A group of instructional programs that describes computer and information sciences, including computer programming, data processing, and information systems.

Constant dollars Dollar amounts that have been adjusted by means of price and cost indexes to eliminate inflationary factors and allow direct comparison across years.

Consumer, personal, and miscellaneous services A group of instructional programs that describes the fundamental skills a person is normally thought to need in order to function productively in society. Some examples are child development, consumer education, and family relations.

Consumer Price Index (CPI) This price index measures the average change in the cost of a fixed market basket of goods and services purchased by consumers.

Consumption That portion of income which is spent on the purchase of goods and services rather than being saved.

Credit The unit of value, awarded for the successful completion of certain courses, intended to indicate the quantity of course instruction in relation to the total requirements for a diploma, certificate, or degree. Credits are frequently expressed in terms such as "Carnegie units," "semester credit hours," and "quarter credit hours."

Current dollars Dollar amounts that have not been adjusted to compensate for inflation.

Current expenditures (elementary/secondary) The expenditures for operating local public schools, excluding capital outlay and interest on school debt. These expenditures include such items as salaries for school personnel, fixed charges, student transportation, school books and materials, and energy costs. Beginning in 1980-81, expenditures for State administration are excluded.

Current expenditures per pupil in average daily attendance Current expenditures for the regular school term divided by the average daily attendance of full-time pupils (or full-time equivalency of pupils) during the term. See also *Current expenditures* and *Average daily attendance*.

Current-fund expenditures (higher education) Money spent to meet current operating costs, including salaries, wages, utilities, student services, public services, research libraries, scholarships and fellowships, auxiliary enterprises, hospitals, and independent operations. Excludes loans, capital expenditures, and investments.

Current-fund revenues (higher education) Money received during the current fiscal year from revenue which can be used to pay obligations currently due, and surpluses reappropriated for the current fiscal year.

Current Population Survey See Guide to Sources.

Disposable personal income Current income received by persons less their contributions for social insurance, personal tax, and nontax payments. It is the income available to persons for spending and saving. Nontax payments include passport fees, fines and penalties, donations, and tuitions and fees paid to schools and hospitals operated mainly by the government. See also *Personal income*.

Doctor's degree An earned degree carrying the title of Doctor. The Doctor of Philosophy degree (Ph.D.) is the highest academic degree and requires mastery within a field of knowledge and demonstrated ability to perform scholarly research. Other doctorates are awarded for fulfilling specialized requirements in professional fields, such as education

(Ed.D.), musical arts (D.M.A.), business administration (D.B.A.), and engineering (D.Eng. or D.E.S.). Many doctor's degrees in academic and professional fields require an earned master's degree as a prerequisite. First-professional degrees, such as M.D. and D.D.S., are not included under this heading.

Educational attainment The highest grade of regular school attended and completed.

Educational and general expenditures The sum of current funds expenditures on instruction, research, public service, academic support, student services, institutional support, operation and maintenance of plant, and awards from restricted and unrestricted funds.

Elementary education/programs Learning experiences concerned with the knowledge, skills, appreciations, attitudes, and behavioral characteristics which are considered to be needed by all pupils in terms of their awareness of life within our culture and the world of work, and which normally may be achieved during the elementary school years (usually kindergarten through grade 8 or kindergarten through grade 6), as defined by applicable State laws and regulations.

Elementary school A school classified as elementary by State and local practice and composed of any span of grades not above grade 8. A preschool or kindergarten school is included under this heading only if it is an integral part of an elementary school or a regularly established school system.

Elementary/secondary school As reported in this publication, includes only regular school, i.e., schools that are part of State and local school systems, and also most not-for-profit private elementary/secondary schools, both religiously affiliated and nonsectarian. Schools not reported include subcollegiate departments of institutions of higher education, residential schools for exceptional children, Federal schools for American Indians, and Federal schools on military posts and other Federal installations.

Employment Includes civilian, noninstitutional persons who (1) worked during any part of the survey week as paid employees; worked in their own business, profession, or farm; or worked 15 hours or more as unpaid workers in a family-owned enterprise; or (2) were not working but had jobs or businesses from which they were temporarily absent due to illness, bad weather, vacation, labor-management dispute, or personal reasons—whether or not they were seeking another job.

Endowment A trust fund set aside to provide a perpetual source of revenue from the proceeds of the

endowment investments. Endowment funds are often created by donations from benefactors of an institution, who may designate the use of the endowment revenue. Normally, institutions or their representatives manage the investments, but they are not permitted to spend the endowment fund itself, only the proceeds from the investments. Typical uses of endowments would be an endowed chair for a particular department or for a scholarship fund. Endowment totals tabulated in this book also include funds functioning as endowments, such as funds left over from the previous year and placed with the endowment investments by the institution. These funds may be withdrawn by the institution and spent as current funds at any time. Endowments are evaluated by two different measures, book value and market value. Book value is the purchase price of the endowment investment. Market value is the current worth of the endowment investment. Thus, the book value of a stock held in an endowment fund would be the purchase price of the stock. The market value of the stock would be its selling price as of a given day.

English A group of instructional programs that describes the English language arts, including composition, creative writing, and the study of literature.

Enrollment The total number of students registered in a given school unit at a given time, generally in the fall of a year.

Expenditures Charges incurred, whether paid or unpaid, which are presumed to benefit the current fiscal year. For elementary/secondary schools, these include all charges for current outlays plus capital outlays and interest on school debt. For institutions of higher education, these include current outlays plus capital outlays. For government, these include charges net of recoveries and other correcting transactions other than for retirement of debt, investment in securities, extension of credit, or as agency transaction. Government expenditures include only external transactions, such as the provision of perquisites or other payments in kind. Aggregates for groups of governments exclude intergovernmental transactions among the government.

Expenditures per pupil Charges incurred for a particular period of time divided by a student unit of measure, such as average daily attendance or average daily membership.

Extracurricular activities Activities that are not part of the required curriculum and that take place outside of the regular course of study. As used here, they include both school-sponsored (e.g., varsity athletics, drama and debate clubs) and community-sponsored (e.g., hobby clubs and youth organiza-

tions like the Junior Chamber of Commerce or Boy Scouts) activities.

Family A group of two persons or more (one of whom is the householder) related by birth, marriage, or adoption and residing together. All such persons (including related subfamily members) are considered as members of one family.

Federal funds Amounts collected and used by the Federal Government for the general purposes of the Government. There are four types of Federal fund accounts: the general fund, special funds, public enterprise funds, and intragovernmental funds. The major Federal fund is the general fund, which is derived from general taxes and borrowing. Federal funds also include certain earmarked collections, such as those generated by and used to finance a continuing cycle of business-type operations.

First-professional degree A degree that signifies both completion of the academic requirements for beginning practice in a given profession and a level of professional skill beyond that normally required for a bachelor's degree. This degree usually is based on a program requiring at least 2 academic years of work prior to entrance and a total of at least 6 academic years of work to complete the degree program, including both prior-required college work and the professional program itself. By NCES definition, first-professional degrees are awarded in the fields of dentistry (D.D.S. or D.M.D.), medicine (M.D.), optometry (O.D.), osteopathic medicine (D.O.), pharmacy (D.Pharm.), podiatric medicine (D.P.M.), veterinary medicine (D.V.M.), chiropractic (D.C. or D.C.M.), law (J.D.), and theological professions (M.Div. or M.H.L.).

First-professional enrollment The number of students enrolled in a professional school or program which requires at least 2 years of academic college work for entrance and a total of at least 6 years for a degree. By NCES definition, first-professional enrollment includes only students in certain programs. See *First-professional degree* for a list of programs.

Fiscal year The yearly accounting period for the Federal Government, which begins on October 1 and ends on the following September 30. The fiscal year is designated by the calendar year in which it ends; e.g., fiscal year 1988 begins on October 1, 1987, and ends on September 30, 1988. (Prior to fiscal year 1976, the fiscal year began on July 1 and ended on the following June 30.)

Foreign languages A group of instructional programs that describes the structure and use of language that is common or indigenous to people of the same community or nation, the same geographical

area, or the same cultural traditions. Programs cover such features as sound, literature, syntax, phonology, semantics, sentences, prose, and verse, as well as the development of skills and attitudes used in communicating and evaluating thoughts and feelings through oral and written language.

Full-time enrollment The number of students enrolled in higher education courses with total credit load equal to at least 75 percent of the normal full-time course load.

Full-time-equivalent (FTE) enrollment For institutions of higher education, enrollment of full-time students, plus the full-time equivalent of part-time students as reported by institutions. In the absence of an equivalent reported by an institution, the FTE enrollment is estimated by adding one-third of part-time enrollment to full-time enrollment.

Full-time instructional faculty Those members of the instruction/research staff who are employed full time as defined by the institution, including faculty with released time for research and faculty on sabbatical leave. Full-time counts exclude faculty who are employed to teach less than two semesters, three quarters, two trimesters, or two 4-month sessions; replacements for faculty on sabbatical leave or those on leave without pay; faculty for preclinical and clinical medicine; faculty who are donating their services; faculty who are members of military organizations and paid on a different pay scale from civilian employees; academic officers, whose primary duties are administrative; and graduate students who assist in the instruction of courses.

Full-time worker In educational institutions, an employee whose position requires being on the job on school days throughout the school year at least the number of hours the schools are in session. For higher education, a member of an educational institution's staff who is employed full time.

GED recipient A person who has obtained certification of high school equivalency by meeting State requirements and passing an approved exam, which is intended to provide an appraisal of the person's achievement or performance in the broad subject matter areas usually required for high school graduation.

General Educational Development (GED) program Academic instruction to prepare persons to take the high school equivalency examination. See *GED recipient*.

General program A program of studies designed to prepare students for the common activities of a cit-

izen, family member, and worker. A general program of studies may include instruction in both academic and vocational areas.

Geographic region 1) One of four regions used by the Bureau of Economic Analysis of the U.S. Department of Commerce, the National Assessment of Educational Progress, and the National Education Association, as follows: (The National Education Association designated the Central region as Middle region in its classification.)

Northeast

Connecticut
Delaware
District of Columbia
Maine

Government appropriation An amount (other than a grant or contract) received from or made available to an institution through an act of a legislative body.

Government grant or contract Revenues from a government agency for a specific research project or other program.

Graduate An individual who has received formal recognition for the successful completion of a prescribed program of studies.

Graduate enrollment The number of students who hold the bachelor's or first-professional degree, or the equivalent, and who are working towards a master's or doctor's degree. First-professional students are counted separately. These enrollment data measure those students who are registered at a particular time during the fall. At some institutions, graduate enrollment also includes students who are in postbaccalaureate classes but not in degree programs. In specified tables, graduate enrollment includes all students in regular graduate programs and all students in postbaccalaureate classes but not in degree programs (unclassified postbaccalaureate students).

Graduate Record Examination (GRE) Multiple-choice examinations administered by the Educational Testing Service and taken by applicants who are intending to attend certain graduate schools. Two generalized tests are offered, plus specialized tests in a variety of subject areas. Ordinarily, a student will take only the specialized test that applies to the intended field of study.

Graduation Formal recognition given an individual for the successful completion of a prescribed program of studies.

Gross national product (GNP) The total national output of goods and services valued at market prices. GNP can be viewed in terms of expenditure categories which include purchases of goods and services by consumers and government, gross private domestic investment, and net exports of goods and services. The goods and services included are largely those bought for final use (excluding illegal transactions) in the market economy. A number of inclusions, however, represent imputed values, the most important of which is rental value of owner-occupied housing. GNP, in this broad context, measures the output attributable to the factors of production—labor and property—supplied by U.S. residents.

Handicapped Those children evaluated as having any of the following impairments, who because of these impairments need special education and related services. (These definitions apply specifically to data from the Office of Special Education and Rehabilitative Services presented in this publication.)

Deaf Having a hearing impairment which is so severe that the student is impaired in processing linguistic information through hearing (with or without amplification) and which adversely affects educational performance.

Deaf-blind Having concomitant hearing and visual impairments which cause such severe communication and other developmental and educational problems that the student cannot be accommodated in special education programs solely for deaf or blind students.

Hard of hearing Having a hearing impairment, whether permanent or fluctuating, which adversely affects the student's educational performance, but which is not included under the definition of "deaf" in this section.

Mentally retarded Having significantly subaverage general intellectual functioning, existing concurrently with defects in adaptive behavior and manifested during the developmental period, which adversely affects the child's educational performance.

Multihandicapped Having concomitant impairments (such as mentally retarded-blind, mentally retarded-orthopedically impaired, etc.), the combination of which causes such severe educational problems that the student cannot be accommodated in special education programs solely for one of the impairments. Term does not include deaf-blind students but does include those students who are severely or profoundly mentally retarded.

Orthopedically impaired Having a severe orthopedic impairment which adversely affects a student's educational performance. The term includes impairment resulting from congenital anomaly, disease, or other causes.

Other health impaired Having limited strength, vitality, or alertness—due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes—which adversely affects the student's educational performance.

Seriously emotionally disturbed Exhibiting one or more of the following characteristics over a long period of time, to a marked degree, and adversely affecting educational performance: an inability to learn which cannot be explained by intellectual, sensory, or health factor; an inability to build or maintain satisfactory interpersonal relationships with peers and teachers; inappropriate types of behavior or feelings under normal circumstances; a general pervasive mood of unhappiness or depression; or a tendency to develop physical symptoms or fears associated with personal or school problems. This term does not include children who are socially maladjusted, unless they also display one or more of the listed characteristics.

Specific learning disabled Having a disorder in one or more of the basic psychological processes involved in understanding or in using spoken or written language, which may manifest itself in an imperfect ability to listen, think, speak, read, write, spell, or do mathematical calculations. The term includes such conditions as perceptual handicaps, brain injury, minimal brain dysfunction, dyslexia, and developmental aphasia. The term does not include children who have learning problems which are primarily the result of visual, hearing, or environmental, cultural, or economic disadvantage.

Speech impaired Having a communication disorder, such as stuttering, impaired articulation, language impairment, or voice impairment, which adversely affects the student's educational performance.

Visually handicapped Having a visual impairment which, even with correction, adversely affects the student's educational performance. The term includes partially seeing and blind children.

High school A secondary school offering the final years of high school work necessary for graduation, usually including grades 10, 11, 12 (in a 6-3-3 plan) or grades 9, 10, 11, and 12 (in a 6-2-4 plan).

High school program A program of studies designed to prepare students for their postsecondary education and occupation. Three types of programs are usually distinguished—academic, vocational, and general. An academic program is designed to prepare students for continued study at a college or university. A vocational program is designed to prepare students for employment in one or more semiskilled, skilled, or technical occupations. A general program is designed to provide students with the understanding and competence to function effectively in a free society and usually represents a mixture of academic and vocational components.

Higher education Study beyond secondary school at an institution that offers programs terminating in an associate, baccalaureate, or higher degree.

Higher education institutions (alternative classification)

Comprehensive Characterized by diverse postbaccalaureate programs (including first-professional) but not engaged in significant doctoral-level education.

Doctoral-granting Characterized by a significant level and breadth of activity in commitment to doctoral-level education as measured by the number of doctorate recipients and the diversity in doctoral-level program offerings.

General baccalaureate Characterized by primary emphasis on general undergraduate, baccalaureate-level education. Not significantly engaged in postbaccalaureate education.

Specialized Baccalaureate or postbaccalaureate institution emphasizing one area (plus closely related specialties), such as business or engineering. The programmatic emphasis is measured by the percentage of degrees granted in the program area.

New These institutions, though not necessarily newly organized, are new additions to the Integrated Postsecondary Education Data System (IPEDS) universe. When degree and award data become available, they will be reclassified.

Non-degree-granting Offering undergraduate or graduate study but not conferring degrees or awards. In this volume, these institutions are included under *Specialized*.

2-year Conferring at least 75 percent of its degrees and awards for work below the bachelor's level.

Higher education institutions (traditional classification)

4-year institution An institution legally authorized to offer and offering at least a 4-year program of college-level studies wholly or principally creditable toward a baccalaureate degree. In some tables, a further division between universities and other 4-year institutions is made. A "university" is a postsecondary institution which typically comprises one or more graduate professional schools (also see *University*). For purposes of trend comparisons in this volume, the selection of universities has been held constant for all tabulations after 1982. "Other 4-year institutions" would include the rest of the nonuniversity 4-year institutions.

2-year institution An institution legally authorized to offer and offering at least a 2-year program of college-level studies which terminates in an associate degree or is principally creditable toward a baccalaureate degree.

Higher Education Price Index A price index which measures average changes in the prices of goods and services purchased by colleges and universities through current-fund education and general expenditures (excluding expenditures for sponsored research and auxiliary enterprises).

Household All the persons who occupy a housing unit. A house, apartment, or other group of rooms, or a single room, is regarded as a housing unit when it is occupied or intended for occupancy as separate living quarters, that is, when the occupants do not live and eat with any other persons in the structure, and there is direct access from the outside or through a common hall.

Imaginative writing This type of writing can take a variety of forms, such as stories, poems, plays, or lyrics. It represents a special approach to sharing experiences and understanding the world and ourselves. In this form of writing, special attention is given to rhythm and tone; the use of anecdote; the presence of metaphor and simile; shifts in plots; and the unexpected use of words, phrases, or punctuation.

Income tax Taxes levied on net income, that is, on gross income less certain deductions permitted by

law. These taxes can be levied on individuals or on corporations or unincorporated businesses where the income is taxed distinctly from individual income.

Independent operations A group of self-supporting activities under control of a college or university. For purposes of financial surveys conducted by the National Center for Education Statistics, this category is composed principally of Federally Funded Research and Development Centers (FFRDC).

Informative writing This type of writing is used to share information and to convey messages, directions, and ideas. It often involves reporting or retelling events or experiences that have already occurred.

Institutional support The category of higher education expenditures that includes day-to-day operational support for colleges, excluding expenditures for physical plant operations. Examples of institutional support include general administrative services, executive direction and planning, legal and fiscal operations, and community relations.

Instruction That category including expenditures of the colleges, schools, departments, and other instructional divisions of higher education institutions and expenditures for departmental research and public service which are not separately budgeted. Includes expenditures for both credit and noncredit activities. Excludes expenditures for academic administration where the primary function is administration (e.g., academic deans).

Instructional staff Full-time-equivalent number of positions, not the number of different individuals occupying the positions during the school year. In local schools, includes all public elementary and secondary (junior and senior high) day-school positions that are in the nature of teaching or in the improvement of the teaching-learning situation. Includes consultants or supervisors of instruction, principals, teachers, guidance personnel, librarians, psychological personnel, and other instructional staff. Excludes administrative staff, attendance personnel, clerical personnel, and junior college staff.

Junior high school A separately organized and administered secondary school intermediate between the elementary and senior high schools, usually including grades 7, 8, and 9 (in a 6-3-3 plan) or grades 7 and 8 (in a 6-2-4 plan).

Labor force Persons employed as civilians, unemployed (but looking for work), or in the armed services during the survey week. The "civilian labor force" comprises all civilians classified as employed or unemployed.

Local education agency See *School district*.

Mandatory transfer A transfer of current funds that must be made in order to fulfill a binding legal obligation of the institution. Included under mandatory transfers are debt service provisions relating to academic and administrative buildings, including (1) amounts set aside for debt retirement and interest and (2) required provisions for renewal and replacement of buildings to the extent these are not financed from other funds.

Master's degree A degree awarded for successful completion of a program generally requiring 1 or 2 years of full-time college-level study beyond the bachelor's degree. One type of master's degree, including the Master of Arts degree, or M.A., and the Master of Science degree, or M.S., is awarded in the liberal arts and sciences for advanced scholarship in a subject field or discipline and demonstrated ability to perform scholarly research. A second type of master's degree is awarded for the completion of a professionally oriented program, for example, an M.Ed. in education, an M.B.A. in business administration, an M.F.A. in fine arts, an M.M. in music, an M.S.W. in social work, and an M.P.A. in public administration. A third type of master's degree is awarded in professional fields for study beyond the first-professional degree, for example, the Master of Laws (LL.M.) and Master of Science in various medical specializations.

Mathematics A group of instructional programs that describes the science of logical symbolic language and its application.

Mean test score The score obtained by dividing the sum of the scores of all individuals in a group by the number of individuals in that group.

Metropolitan population The population residing in Metropolitan Statistical Areas (MSAs). See *Metropolitan Statistical Area*.

Metropolitan Statistical Area (MSA) A large population nucleus and the nearby communities which have a high degree of economic and social integration with that nucleus. Each MSA consists of one or more entire counties (or county equivalents) that meet specified standards pertaining to population, commuting ties, and metropolitan character. In New England, towns and cities, rather than counties, are the basic units. MSAs are designated by the Office of Management and Budget. An MSA includes a city and, generally, its entire urban area and the remainder of the county or counties in which the urban area is located. An MSA also includes such additional outlying counties which meet specified criteria relating to

metropolitan character and level of commuting of workers into the central city or counties. Specified criteria governing the definition of MSAs recognized before 1980 are published in *Standard Metropolitan Statistical Areas: 1975*, issued by the Office of Management and Budget. New MSAs were designated when 1980 counts showed that they met one or both of the following criteria:

1. Included a city with a population of at least 50,000 within their corporate limits, or
2. Included a Census Bureau-defined urbanized area (which must have a population of at least 50,000) and a total MSA population of at least 100,000 (or, in New England, 75,000).

Migration Geographic mobility involving a change of usual residence between clearly defined geographic units, that is, between counties, States, or regions.

Minimum-competency testing Measuring the acquisition of competence or skills to or beyond a certain specified standard.

National Assessment of Educational Progress (NAEP) See Guide to Sources.

Newly qualified teacher Persons who (1) first became eligible for a teaching license during the period of the study referenced or who were teaching at the time of survey but were not certified or eligible for a teaching license and (2) had never held full-time, regular teaching positions (as opposed to substitute) prior to completing the requirements for the degree which brought them into the survey.

Nonmetropolitan residence group The population residing outside Metropolitan Statistical Areas. See *Metropolitan Statistical Area*.

Nonresident alien A person who is not a citizen of the United States and who is in this country on a temporary basis and does not have the right to remain indefinitely.

Nonsupervisory instructional staff Persons such as curriculum specialists, counselors, librarians, remedial specialists, and others possessing education certification but not responsible for day-to-day teaching of the same group of pupils.

Obligations Amounts of orders placed, contracts awarded, services received, or similar legally binding commitments made by Federal agencies during a given period that will require outlays during the same or some future period.

Occupational home economics Courses of instruction emphasizing the acquisition of competen-

cies needed for getting and holding a job or preparing for advancement in an occupational area using home economics knowledge and skills.

Off-Budget Federal entities Organizational entities, federally owned in whole or in part, whose transactions belong in the budget under current budget accounting concepts but that have been excluded from the budget totals under provisions of law.

Outlays The value of checks issued, interest accrued on the public debt, or other payments made, net of refunds and reimbursements.

Part-time enrollment The number of students enrolled in higher education courses with a total credit load less than 75 percent of the normal full-time credit load.

Personal income Current income received by persons from all sources minus their personal contributions for social insurance. Classified as "persons" are individuals (including owners of unincorporated firms), nonprofit institutions serving individuals, private trust funds, and private noninsured welfare funds. Personal income includes transfers (payments not resulting from current production) from government and business such as social security benefits, military pensions, etc., but excludes transfers among persons.

Persuasive writing This type of writing attempts to bring about some action or change. Its primary purpose is to influence others. It is concerned with the positions, beliefs, and attitudes of the readers.

Physical plant assets Includes the values of land, buildings, and equipment owned, rented, or utilized by colleges. Does not include those plant values which are a part of endowment or other capital fund investments in real estate. Excludes construction in progress.

Postbaccalaureate enrollment The number of graduate and first-professional students working towards advanced degrees and of students enrolled in graduate-level classes but not enrolled in degree programs. See also *Graduate enrollment* and *First-professional enrollment*.

Postsecondary education The provision of formal instructional programs with a curriculum designed primarily for students who have completed the requirements for a high school diploma or equivalent. This includes programs of an academic, vocational, and continuing professional education purpose, and excludes vocational and adult basic education programs.

Private school or institution A school or institution which is controlled by an individual or agency other than a State, a subdivision of a State, or the Federal Government, which is usually supported primarily by other than public funds, and the operation of whose program rests with other than publicly elected or appointed officials.

Property tax The sum of money collected from a tax levied against the value of property.

Proprietary institution An educational institution that is under private control but whose profits derive from revenues subject to taxation.

Public school or institution A school or institution controlled and operated by publicly elected or appointed officials and deriving its primary support from public funds.

Pupil/teacher ratio The enrollment of pupils at a given period of time, divided by the full-time-equivalent number of classroom teachers serving these pupils during the same period.

Racial/ethnic group Classification indicating general racial or ethnic heritage based on self-identification, as in data collected by the Bureau of the Census, or on observer identification, as in data collected by the Office for Civil Rights. These categories are in accordance with the Office of Management and Budget standard classification scheme presented below:

American Indian or Alaskan Native A person having origins in any of the original peoples of North America and maintaining cultural identification through tribal affiliation or community recognition.

Asian or Pacific Islander A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent, or the Pacific Islands. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.

Black A person having origins in any of the black racial groups in Africa. Normally excludes persons of Hispanic origin except for tabulations produced by the Bureau of the Census, which are noted accordingly in this volume.

Hispanic A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.

White A person having origins in any of the original peoples of Europe, North Africa, or the Middle

East. Normally excludes persons of Hispanic origin except for tabulations produced by the Bureau of the Census, which are noted accordingly in this volume.

Remedial education Instruction for a student lacking those reading, writing, or math skills necessary to perform college-level work at the level required by the attended institution.

Resident population Includes civilian population and armed forces personnel residing within the United States. Excludes armed forces personnel residing overseas.

Revenues All funds received from external sources, net of refunds, and correcting transactions. Noncash transactions such as receipt of services, commodities, or other receipts "in kind" are excluded as are funds received from the issuance of debt, liquidation of investments, and nonroutine sale of property.

Salary The total amount regularly paid or stipulated to be paid to an individual, before deductions, for personal services rendered while on the payroll of a business or organization.

Sales tax Tax imposed upon the sale and consumption of goods and services. It can be imposed either as a general tax on the retail price of all goods and services sold or as a tax on the sale of selected goods and services.

Scholarships and fellowships This category of college expenditures applies only to money given in the form of outright grants and trainee stipends to individuals enrolled in formal coursework, either for credit or not. Aid to students in the form of tuition or fee remissions is included. College Work-Study funds are excluded and are reported under the program in which the student is working. In the tabulations in this volume, Pell Grants are not included in this expenditure category.

Scholastic Aptitude Test (SAT) An examination administered by the Educational Testing Service and used to predict the facility with which an individual will progress in learning college-level academic subjects.

School A division of the school system consisting of students in one or more grades or other identifiable groups and organized to give instruction of a defined type. One school may share a building with another school or one school may be housed in several buildings.

School climate The social system and culture of the school, including the organizational structure of the school and values and expectations within it.

School district An education agency at the local level that exists primarily to operate public schools or to contract for public school services. Synonyms are "local basic administrative unit" and "local education agency."

Science The body of related courses concerned with knowledge of the physical and biological world and with the processes of discovering and validating this knowledge.

Secondary instructional level The general level of instruction provided for pupils in secondary schools (generally covering grades 7 through 12 or 9 through 12) and any instruction of a comparable nature and difficulty provided for adults and youth beyond the age of compulsory school attendance.

Secondary school A school comprising any span of grades beginning with the next grade following an elementary or middle-school (usually 7, 8, or 9) and ending with or below grade 12. Both junior high schools and senior high schools are included.

Senior high school A secondary school offering the final years of high school work necessary for graduation and invariably preceded by a junior high school.

Social studies A group of instructional programs that describes the substantive portions of behavior, past and present activities, interactions, and organizations of people associated together for religious, benevolent, cultural, scientific, political, patriotic, or other purposes.

Socioeconomic status (SES) For the High School and Beyond study and the National Longitudinal Study of the High School Class of 1972, the SES index is a composite of five equally weighted, standardized components: father's education, mother's education, family income, father's occupation, and household items. The terms high, middle, and low SES refer to the upper, middle two, and lower quartiles of the weighted SES composite index distribution.

Special education Direct instructional activities or special learning experiences designed primarily for students identified as having exceptionalities in one or more aspects of the cognitive process or as being underachievers in relation to general level or model of their overall abilities. Such services usually are directed at students with the following conditions: (1) physically handicapped; (2) emotionally handicapped; (3) culturally different, including compensatory education; (4) mentally retarded; and (5) students with learning disabilities. Programs for the mentally gifted

and talented are also included in some special education programs. See also *Handicapped*.

Standardized test A test composed of a systematic sampling of behavior, administered and scored according to specific instructions, capable of being interpreted in terms of adequate norms, and for which there is data on reliability and validity.

Standardized test performance The weighted distributions of composite scores from standardized tests used to group students according to performance.

Standard Metropolitan Statistical Area (SMSA) See *Metropolitan Statistical Area (MSA)*.

Student An individual for whom instruction is provided in an educational program under the jurisdiction of a school, school system, or other education institution. No distinction is made between the terms "student" and "pupil," though "student" may refer to one receiving instruction at any level while "pupil" refers only to one attending school at the elementary or secondary level. The term "student" is used to include individuals at all instructional levels. A student may receive instruction in a school facility or in another location, such as at home or in a hospital. Instruction may be provided by direct student-teacher interaction or by some other approved medium such as television, radio, telephone, and correspondence.

Subject-matter club Organizations that are formed around a shared interest in a particular area of study and whose primary activities promote that interest. Examples of such organizations are math, science, business, and history clubs.

Supervisory staff Principals, assistant principals, and supervisors of instruction. Does not include superintendents or assistant superintendents.

Tax base The collective value of objects, assets, and income components against which a tax is levied.

Tax expenditures Losses of tax revenue attributable to provisions of the Federal income tax laws that allow a special exclusion, exemption, or deduction from gross income or provide a special credit, preferential rate of tax, or a deferral of tax liability affecting individual or corporate income tax liabilities.

Teacher shortage The number of teaching positions vacant, abolished, or withdrawn because a candidate was sought and not found, courses were eliminated because of budget cuts or administrative decisions not to offer courses in a given field, a teacher was laid off, or a position was filled by a temporary substitute.

Technical education A program of vocational instruction that ordinarily includes the study of the sciences and mathematics underlying a technology, as well as the methods, skills, and materials commonly used and the services performed in the technology. Technical education prepares individuals for positions—such as draftsman or lab technician—in the occupational area between the skilled craftsman and the professional person.

Total expenditure per pupil in average daily attendance Includes all expenditures allocable to per pupil costs divided by average daily attendance. These allocable expenditures include current expenditures for regular school programs, interest on school debt, and capital outlay. Beginning in 1980–81, expenditures for State administration are excluded and expenditures for other programs (summer schools, community colleges, and private schools) are included.

Trade and industrial occupations The branch of vocational education which is concerned with preparing persons for initial employment or with updating or retraining workers in a wide range of trade and industrial occupations. Such occupations are skilled or semiskilled and are concerned with layout designing, producing, processing, assembling, testing, maintaining, servicing, or repairing any product or commodity.

Transcript An official list of all courses taken by a student at a school or college showing the final grade received for each course, with definitions of the various grades given at the institution.

Trust funds Amounts collected and used by the Federal Government for carrying out specific purposes and programs according to terms of a trust agreement or statute, such as the social security and unemployment trust funds. Trust fund receipts that are not anticipated to be used in the immediate future are generally invested in interest-bearing Government securities and earn interest for the trust fund.

Tuition and fees A payment or charge for instruction or compensation for services, privileges, or the use of equipment, books, or other goods.

Unclassified students Students who are not candidates for a degree or other formal award, although they are taking higher education courses for credit in regular classes with other students.

Undergraduate students Students registered at an institution of higher education who are working in a program leading to a baccalaureate degree or other formal award below the baccalaureate, such as an associate degree.

Unemployed Civilians who had no employment but were available for work and (1) had engaged in any specific jobseeking activity within the past 4 weeks, (2) were waiting to be called back to a job from which they had been laid off, or (3) were waiting to report to a new wage or salary job within 30 days.

U.S. Service Schools These institutions of higher education are controlled by the U.S. Department of Defense and the U.S. Department of Transportation. The 10 institutions counted in the NCES surveys of higher education institutions include: the Air Force Institute of Technology, Community College of the Air Force, Naval Postgraduate School, Uniformed Services University of the Health Sciences, U.S. Air Force Academy, U.S. Army Command and General Staff College, U.S. Coast Guard Academy, U.S. Merchant Marine Academy, U.S. Military Academy, and the U.S. Naval Academy.

University An institution of higher education consisting of a liberal arts college, a diverse graduate program, and usually two or more professional schools or faculties and empowered to confer degrees in various fields of study. For purposes of maintaining trend data in this publication, the selection of university institutions has not been revised since 1982.

Visual and performing arts A group of instructional programs that generally describes the historic development, aesthetic qualities, and creative processes of two or more of the visual and performing arts.

Vocational education Organized educational programs, services, and activities which are directly related to the preparation of individuals for paid or unpaid employment, or for additional preparation for a career, requiring other than a baccalaureate or advanced degree.

Vocational home economics Vocational courses of instruction emphasizing the acquisition of competencies needed for getting and holding a job or preparing for advancement in an occupational area using home economics knowledge or skills.
